This is one of two volumes presenting final vital statistics for the United States, its Territories, and certain possessions for the year 1951. Their subject matter consists of vital events that occurred in these areas during the year—marriages, divorces, births, fetal deaths, infant deaths, and deaths among the general population.

This annual report is organized as follows:

Volume I. Analysis and Summary Tables

Volume II. Mortality Data

In using statistics from either volume, it is recommended that reference be made to the explanatory text in Volume I, which describes the sources and limitations of the data.
