Date: December 27, 2005

TIMBER SALE NOTICE

NOTICE IS HEREBY GIVEN that the Bureau of Land Management will offer for sale timber as described herein for oral auction, pursuant to Instructions to Bidders, as stated on Form No. 5440-9 and subject to Notice of Requirement for Certification of Nonsegregated Facilities, Form No. 1140-4, attached. Written and oral bids will be received by the District Manager, or his representative, at 777 NW Garden Valley Blvd., Roseburg, Oregon 97470. The timber sale will commence at 10:00 a.m., on Tuesday, January 24, 2006.

AN ENVIRONMENTAL ASSESSMENT was prepared for these sales, and a Finding of No Significant Impact has been documented. These documents are available for inspection as background for this sale at the Roseburg District Office.

THIS TIMBER SALE NOTICE does not constitute the decision document for purposes of protest and appeal of a forest management decision. Consistent with 43 CFR Subpart 5003-Administrative Remedies, the notice of a timber sale, when published as a legal ad in a newspaper of general circulation, shall constitute the decision document for purposes of protest and appeal. Protests may be filed with the Contracting Officer within 15 days of the publication of the aforementioned decision document in the newspaper. It is anticipated that the decision document will be published in *The News Review* newspaper on or about December 27, 2005. BLM does not warrant publication on this exact date. All parties considering protest of the timber sale decision document are encouraged to review the aforementioned newspaper to ensure accurate knowledge of the exact publication date.

A WRITTEN BID on Form No. 5440-9 at no less than the appraised price on a unit basis per species and the required minimum bid deposit shall be required to participate in oral bidding for each tract. Since bidding on minor species usually has little effect on the final outcome of a sale and can be disruptive to the bidding process, BLM will accept bids over appraised price for Douglas-fir only.

APPRAISED PRICES are determined by analytical appraisal methods unless otherwise noted on individual timber sale notices.

FOR SET-ASIDE TRACTS, the bidder must not have been determined by the Small Business Administration to be ineligible for preferential award of set-aside sales and must accompany his deposit with a self-certification statement that he is qualified as a small business concern as defined by the Small Business Administration in its regulations, Title 13, Chapter I, Part 121 as amended, of the Code of Federal Regulations. Form No. 5430-1, Self Certification Statement, and SBA Form 723, Small Business Certification Required on All Preferential Sales of Set-Aside Timber, are attached hereto.

THE SUCCESSFUL BIDDER, as a condition of award, will be required to complete and/or sign the following forms:

1. Form No. 1140-6, Independent Price Determination Certificate, a certification that the bid was arrived at by the bidder or offeror independently, and was tendered without collusion with any other bidder or offeror.
2. Form No. 1140-7, Equal Opportunity Affirmative Action Program Representation, for all contracts over \$10,000.
3. Form No. 1140-8, Equal Opportunity Compliance Report Certification.
4. Form No. 5430-1 Self Certification Clause
4. Form No. 5450-17, Export Determination.
5. SBA Form 723, Small Business Certification

PRE-AWARD QUALIFICATIONS. The high bidder may be required to furnish information to determine the ability to perform the obligations of the contract. If the high bidder is determined not qualified, responsible or refuses to respond within fifteen (15) days of a request for information pertaining to qualifications, the contract may be offered and awarded for the amount of the high bid to the highest of the bidders who is qualified, responsible, and willing to accept the contract.

A PERFORMANCE BOND in an amount not less than twenty (20) percent of the total purchase price will be required for all contracts of \$2,500 or more, but the amount of the bond shall not be in excess of \$500,000, except when the Purchaser opts to increase the minimum bond as provided in 43 CFR 5451.2. A minimum performance bond of not less than \$500 will be required for all installment contracts less than \$2,500.

LOG EXPORT AND SUBSTITUTION. All timber sales shall be subject to the restrictions relating to the export and substitution of unprocessed timber from the United States in accordance with P.L. 94-165 and 43 CFR 5400 and 5420, as amended.

ADDITIONAL INFORMATION concerning each timber sale tract described herein is available at the above District Office. A copy of the timber sale contract is also available for inspection at the District Office.

THE VOLUMES LISTED herein are estimates only, based on 16-foot taper breaks, which must be taken into consideration if comparisons are made with volume predictions based on other standards. The volumes based on 32-foot taper breaks are shown for comparison purposes. No sale shall be made for less than the total purchase price, without regard to the amount bid per unit, even though quantity of timber actually cut or removed or designated for taking is more or less than the estimated volume or quantity so listed.

INSTALLMENT PAYMENTS may be authorized for sales of \$500 or more. Required installments will be determined by BLM. For sales under \$500,000, installments will not be less than ten (10) percent of the total purchase price. For sales of \$500,000 or more, installment payments shall be \$50,000.

CRUISE INFORMATION

The thinning volume estimates were based on a diameter-total height volume table. The average tree is 12.2 inches D.B.H.O.B.

3P (Fall, Buck & Scale)

The Douglas-fir, Grand Fir and Western Hemlock have been cruised using the 3P system to select sample trees. Part of the sample trees have been felled, bucked and scaled and the volume expanded to a total sale volume. A map showing the location and description of these sample trees is available at the Roseburg District Office.

The volume of all other species has been determined by individual tree measurements using a 100% cruise.

A total of approximately 416 trees, which are considered unmerchantable, are designated for cutting. With respect to merchantable trees of all species: the average tree is 12.2 inches D.B.H.O.B., the average log contains 44 bd. ft., the total gross volume is approximately 2642 M bd. ft., and 87% recovery is expected. Approximately 0.8% of the above volume is salvage material.

ROAD MAINTENANCE: Maintenance and rockwear fees of \$11,147.24 will be required to be paid to the BLM. DURATION OF CONTRACT will be 27 months for cutting and removal of timber. The contract will contain SPECIAL PROVISIONS regarding: logging, environmental protection, road construction, road renovation, road use, road maintenance, fire protection, slash disposal, log exporting and Non-segregated facilities. Log scaling may be required under the terms of this contract.

NOTES:

1. A new Special Provision has been added to the contract which enables the Contracting Officer to suspend the contract to facilitate protection of a certain plant or animal species, and/or to modify or terminate the contract when necessary to comply with the Endangered Species Act or a court order. This contract provision limits the liability of the Government to the actual costs incurred by the Purchaser which may not have been amortized by timber removed from the contract area.

2. This contract contains provisions for the sale and removal of additional timber necessary to facilitate safe and efficient Purchaser operations. These provisions include: (1.) The designation and sale of additional timber, such as corridor and guyline trees, at contract price, as necessary to facilitate safe and efficient logging. Such trees may be felled and removed when they are painted by the Authorized Officer; (2.) Sale of additional timber volume at current fair market value where the species and/or size of trees are not representative of the forest stand(s) being thinned; (3.) Government reservation of trees previously marked for cutting (replacement) when the Authorized Officer determines that it is necessary in order to maintain stand densities consistent with objectives set forth in management prescriptions; (4.) The use of unilateral modifications executed by BLM for such additional and replacement timber; (5.) Revocation of the Purchaser's right to cut additional timber if the Authorized Officer determines that trees have been cut and removed that were not previously marked and approved for cutting and removal by the Authorized Officer; and, (6.) It is estimated that approximately 115 MBF of such additional timber may be removed under the contract, but is not included in the advertised sale volume nor was it included in the timber sale appraisal. This estimate is a net figure reduced by the estimate of the volume of trees previously marked for cutting, which the Authorized Officer may elect to reserve.
3. There are seasonal and daily operating restrictions on this sale. No road construction or renovation shall be conducted between October 15 of one calendar year and May 15 of the following calendar year, both days inclusive. No timber falling, bucking or yarding shall be conducted on the Contract Area from April 15 to July 15 of each calendar year, both days inclusive, due to bark slip. No timber yarding, loading or hauling shall be conducted on those portions of the Contract Area accessed by temporary roads or where ground based yarding is utilized, from October 15 of one calendar year to July 15 of the following calendar year, both days inclusive. All operations associated with Harvest Area No. 2 and those portions of Harvest Areas No. 1 and No. 3 north of the 30-9-11.1 road shall be scheduled so that daily work is done during the time period from two hours after sunrise to two hours before sunset due to the potential disturbance of nesting Marbled Murrelets. This daily restriction will be in effect April 1 to August 5, both days inclusive, of each year. Note: Timber may be felled prior to May 15 to facilitate road construction and renovation only. Refer to attached seasonal restriction matrix.
4. Renovation and decommissioning of Spurs No. 1, No. 2, and No. 4 and Road No. 30-8-8.0 Segment A (portion) will be accomplished in the same operating season in which they are used for harvest activity. Spur No. 3 will be decommissioned upon completion of the timber sale. **BLM will perform all decommissioning operations.**
5. Cable yarding shall be done with a skyline yarding system capable of maintaining one-end suspension of logs, and equipped with a mechanical slack pulling carriage with a minimum of one hundred (100) feet of lateral yarding capability. Yarding corridors will be limited to a maximum width of twenty (20) feet. Spar height cannot exceed forty (40) feet with a maximum power rating of 225 HP.

ROSEBURG SALE NO. 06-01
SALE DATE: January 24, 2006
SALE NAME: Golden Gate Commercial Thinning

6. Cable yarding portions of the Harvest Areas may require the use of lift trees and/or intermediate support trees.
7. All trees shall be felled, topped, limbed and cut in log lengths not to exceed forty-one (41) feet **prior to being yarded.**
8. To prevent the spread of Port-Orford-cedar root disease or the introduction of noxious weeds to the Contract Area, all logging and road building equipment, **except log trucks,** must be steam cleaned or pressure washed prior to initial move-in or upon return to the sale area if used elsewhere.
9. In the event administrative check scaling is requested by the BLM, the Purchaser must obtain a safe location, to be approved by the Authorized Officer, where logs can be unloaded, rolled out and scaled in accordance with Eastside Scribner Decimal C Rules by BLM scalers or independent scalers contracted to the BLM. The purchase price of the contract shall be reduced accordingly as compensation for delays in log transportation time.
10. Harvest acres shown on Exhibit A are net acres after roads interior to Harvest Area boundaries have been deleted from acreage calculations.
11. Five (5) Douglas-fir seed trees are present in Harvest Area No. 1 and fourteen (14) Douglas-fir seed trees are present in Harvest Area No. 3. Care must be taken during falling and yarding operations. Damage to these trees will be assessed against the Purchaser based on total loss, including loss in value to the Government as a superior seed source.
12. Harvest Area No. 3 requires the construction of Spur No. 3 across Roseburg Resources Co. land. **License Agreements with Roseburg Resources Co. and Seneca Jones Timber Co. are required for log and mineral haul upon their roads.**

3. **INSPECTION OF TIMBER/VEGETATIVE RESOURCES** — Bidder is invited, urged, and cautioned to inspect the timber/vegetative resource prior to submitting a bid. By executing the timber/vegetative resource sale contract, bidder warrants that the contract is accepted on the basis of his examination and inspection of the timber/vegetative resource and his opinion of its value.

4. **DISCLAIMER OF WARRANTY** — Government expressly disclaims any warranty of the fitness of the designated timber/vegetative resource for any purpose of the bidder; all timber/vegetative resources are to be sold "As Is" without any warranty of merchantability by Government. Any warranty as to the quantity or quality of timber/vegetative resource to be sold is expressly disclaimed by Government.

5. **BIDS** — Sealed or written bids for not less than the advertised appraised price, per timber/vegetative resource must be submitted in duplicate to the District Manager who issued *Timber/Vegetative Resource Sale Notice*.

(a) **Sealed Bid Sales** — Bids will be received until time for opening which is set out in the Notice. Enclose both copies of bid with required bid deposit in a sealed envelope marked on the outside *Bid for Timber/Vegetative Resource*, time bid is to be opened, tract number, and legal description of land on which timber/vegetative resource is located. In event of a tie, the high bidder shall be determined by lot from among those who submitted the tie bids.

(b) **Auction Sales** — Submission of the required bid deposit and a written bid is required to qualify for oral bidding. Oral bidding shall begin from the highest written bid. No oral bid will be considered which is not higher than the preceding bid. In the event there is a tie in high written bids, and no oral bidding occurs, the bidder who was the first to submit his bid deposit and written bid shall be declared the high bidder. If the officer conducting the sale cannot determine who made the first submission of high tie written bids, the high bidder shall be determined by lot. High bidder must confirm his bid, in writing, immediately upon being declared high bidder.

(c) Except as otherwise provided in 43 CFR 5442.2, bids will not be considered in resale of timber/vegetative resource remaining from an uncompleted contract from any person or affiliate of such person who failed to complete the original contract because of (1) cancellation for the purchaser's breach or (2) through failure to complete payment by expiration date.

(d) When it is in the interest of the Government to do so, it may reject any and all bids and may waive minor deficiencies in bids or in sale advertisement.

High bidder will be determined by multiplying bid price per thousand board feet per species by Bureau of Land Management estimate of volume of each species. In the event of such sale or sales, purchaser shall also require other purchasers to maintain similar records for a period of three years (OMB Approval No. 0596-0021). A signed certificate similar to this one will be obtained from each party buying such timber and will be retained for review in event of investigation.

(c) If his concern is purchased by, becomes controlled by, or merged with a large business, so much of such timber and log volume from this preferential sale as is necessary will be sold (not bartered) to one or more small businesses for compliance with the 30 percent (50 percent in the case of Alaska) restriction.

3. He agrees that if he utilizes log volume from this preferential sale in the manufacture of a product, such manufacture will be done with his own facilities or those of another concern that qualifies as a small business.

CRUISE INFORMATION

100% Cruise

The timber volumes were based on a 100% cruise using form class tables for estimating board foot volume of trees in 16-foot logs.

A total of approximately 420 trees which are considered unmerchantable are designated for cutting. With respect to merchantable trees of all species: the average tree is 16" D.B.H.O.B., the average log contains 93 bd. Ft., the total gross volume is approximately 7,785 M bd. Ft. (MBF), or 12,785 C cu. ft. (CCF) and 88% recovery is expected. Approximately 0% of the above volume is salvage material.

CUTTING AREA: An area of approximately 134 acres in 6 units is to be regeneration harvested, an area of 206 acres in 1 unit is to be thinned and a right-of-way of 7 acres must be clearcut.

TIMBER ACREAGE: Area 1: 19 Acres Area 4: 206 Acres Area 7: 7 Acres
 Area 2: 39 Acres Area 5: 21 Acres R/W: 7 Acres
 Area 3: 36 Acres Area 6: 12 Acres

ACCESS: Access to the sale area is provided by Government, County and privately controlled roads. A road use fee of \$547.00 will be required to Seneca Jones Timber Company.

DIRECTIONS TO SALE AREA: To reach the sale area in Section 25, T. 26 S., R. 3 W., W.M. and Sections 31 & 33, T. 26 S., R. 2 W., W.M., go east from Roseburg on Highway 138 approximately 17 miles to the junction with County Road 17A (Little River Road). Go south on Little River Road approximately 5 miles to the junction with road 26-3-34.2, and follow the Exhibit "D" map to the sale area.

ROAD MAINTENANCE: Maintenance and rock-wear fees of \$29,004.60 will be required to be paid to the BLM. Maintenance and rock-wear fees required to be paid to Seneca Jones Timber Company will be at the same rate per mile per MBF as the BLM charges at time of haul. \$37,353.55 was used in the appraisal.

ROAD CONSTRUCTION: Estimates include the following: construction of 7.45 stations of 16-foot subgrade plus ditch, construction of 71.93 stations of 14-foot subgrade and improvement of 668.87 stations of 16-foot subgrade plus ditch. 71 culverts on existing roads will be replaced.

DURATION OF CONTRACT will be 36 months for cutting and removal of timber. The contract will contain SPECIAL PROVISIONS regarding: logging; environmental protection; road construction, maintenance and use; fire prevention and control; slash disposal and site preparation; log exports and Non-segregated facilities. Log scaling may be required under the terms of this contract.

NOTES:

1. A Special Provision is included in the contract which enables the Contracting Officer to suspend or terminate the contract in order to: (1) comply with the Endangered Species Act; (2) comply with a court order; (3) comply with BLM Manual 6840 as it relates to Federal proposed, Federal candidate, Bureau sensitive, or State listed species or habitat; or (4) protect raptor nests during nesting.

This contract provision limits the liability of the Government to the actual Out-of-Pocket Expenses incurred by the Purchaser which have not been amortized by the removal of timber from the contract area. In the event that operating time is lost as a result of the incorporation of additional contract requirements or suspension-related delays, an extension of time, with or without reappraisal depending on the reason for the suspension, will constitute a full and complete remedy for any claim that delays due to the suspension hindered performance of the contract or resulted in damages of any kind to the Purchaser. In the event of a suspension that lasts longer than 30 days, the First Installment may be reduced and/or the unamortized Out-of-Pocket Expenses of road or other construction may be refunded or transferred to another contract at the election of the Purchaser.

2. Seasonal restrictions on operations apply (see attached seasonal restriction matrix).
3. The one hundred thirty-four (134) acre regeneration harvest area contains approximately seventy-four (74) acres of cable yarding, sixty (60) acres of ground-based yarding and three (3) acres of right-of-way cutting. The two hundred six (206) acre commercial thinning harvest area contains approximately one hundred ninety-four (194) acres of cable yarding, twelve (12) acres of ground-based yarding and four (4) acres of right-of-way cutting. Yarding areas are shown on Exhibit "A." Timber haul routes are shown on Exhibit "D."

4. The falling and yarding of approximately 420 hardwoods is required in regeneration harvest areas 5 and 7.
5. In the cable yarding areas, varying numbers of retention trees will necessitate lateral yarding and frequent skyline re-spooling. The Authorized Officer will need to be advised when any retention trees are damaged during falling or yarding operations, or when retention trees need to be cut for yarding corridors or safety purposes.
6. Directional falling away from or parallel to property lines, unit boundaries, roads, retention trees, snags, the power line right-of-way and archeological sites and monuments is required. Directional falling away from or parallel to reserve areas is required for all trees to be cut within 100 feet of same.
7. One-end suspension is required in all cable yarding areas. Cable yarding will not be permitted in or through reserve areas, riparian buffers, the power line right-of-way or archeological site.
8. In the portions of the regeneration harvest areas designated for cable yarding, a skyline logging system with lateral yarding capability is required. In the portions of commercial thinning harvest area 4 designated for cable yarding, a skyline logging system with lateral yarding and multi-span capability is required.
9. A track-mounted log loader, or shovel yarding system, is required in the portions of the regeneration harvest areas designated for ground-based yarding. A harvester/forwarder, tractor, rubber-tired skidder or tract-mounted log loader may be used in the portions of commercial thinning harvest area 4 designated for ground-based yarding. Ground-based yarding is permitted between May 15 and October 15 in the regeneration harvest areas. Ground-based yarding is permitted between July 15 and October 15 in the commercial thinning harvest area. Minor and incidental ground-based yarding may be permitted in limited portions of the cable yarding areas; ground-based yarding seasonal restrictions apply, and the locations involved and equipment used must be approved by the Authorized Officer.
10. Approximately 71.93 stations of unsurfaced temporary road and 7.45 stations of new surfaced road will be constructed. Approximately 668.87 stations of existing road will be improved. Unsurfaced temporary roads used for more than a single season or which must overwinter prior to decommissioning will be winterized in accordance with Exhibit "C."
11. All equipment used in road construction and/or yarding operations will be cleaned and inspected for noxious weed seed prior to move-in on BLM lands.
12. A license agreement with Seneca Jones Timber Company is required for renovation and log haul upon their roads.
13. This contract contains provisions for the sale and removal of additional timber necessary to facilitate safe and efficient Purchaser operations. This authority extends to the timber necessary to clear cable yarding roads and/or skid roads; providing tailhold, tieback, and guyline trees; and removing danger trees. The timber may be immediately cut and removed when the trees have been marked in a manner determined by the Authorized Officer. Payment for such additional timber shall be executed through a unilateral modification of the timber sale contract. The volume of the timber will be determined by the Authorized Officer in accordance with Bureau of Land

Management prescribed procedures. It is estimated that approximately 60 MBF of such additional timber would be removed under the contract, but is not included in the advertised sale volume.

14. Acres shown on Exhibit "A" have been computed using a Trimble Geo 3 Global Positioning System receiver and ESRI ArcMap 9 GIS software. Acreage was calculated based on Global Positioning System traverse procedures including differential correction.
15. Slash disposal and site preparation requirements are as follows:

The Bonneville Power Administration (BPA) wants to keep you and your logging operation safe. Before conducting logging activities adjacent to or under BPA transmission lines, **contact a BPA regional representative before planning logging activities.** See the list of BPA personnel attached below.

The following are special concerns for operations on or near BPA transmission lines:

- Assume all **overhead** transmission lines **are always energized.** BPA transmission lines carry high voltage electricity that can injure or kill if conducted to ground through your equipment, fallen trees, or you.
- Do not leave strips of uncut trees between the cut unit boundary and the BPA right-of-way. Trees located near the edge of the right-of-way should be felled away from transmission lines.
- BPA access roads used for timber sale roads shall be kept reasonably free of equipment, forest products, and debris. BPA may need to have road access for emergencies. In this case “reasonably free” means; roads could be cleared within an hour of notice; and roads would be left clear and passable when the timber sale purchaser or contractors leave the area for more than an hour at a time. After project completion, access roads should be in as good or better condition than that which existed prior to the project.
- Logging trucks and equipment should be parked on the right-of-way only during emergencies. When this occurs, the truck/equipment should be grounded with a flexible wire connecting the chassis to an approved ground rod driven into the ground, or by making the connection to ground with a drag chain attached to the truck/equipment chassis.
- Haul roads or skid trail location must be at least 50 feet from the point where the steel tower legs enter the earth. If this clearance cannot be met, use of the road may be permitted if adequate protection barriers for BPA structures are provided by the use of guard devices (guard rails, posts, Jersey-type barriers, etc.). If guard devices are used, their location and design must be approved by BPA to assure they will protect the structure from vehicle and logging activity incursions.
- Yarders used near the transmission lines should be grounded with approved copper wire attached to an approved copper rod pounded six to eight feet in the ground. Skyline cables should be grounded as described above at the tailhold. Chokers should be allowed to contact mineral earth prior to contacting any personnel and equipment. Track mounted equipment is recommended for use near transmission lines to promote “drain off” of induced voltage. If rubber tire machines are used, a chain should be used to drain off voltage. Maintain a minimum separation of 25 feet between transmission line conductors and equipment, personnel, and machinery.
- No high-lead or skyline yarding across/perpendicular to the power line right-of-way.
- Avoid loaded helicopter flights over transmission facilities. If necessary, fly at right angles to the line and cross at a tower location (for better visibility), maintaining a minimum clearance of 100 feet.

- No slash or debris burning on or near the right-of-way. Concentrated columns of smoke from slash burning off right-of-way should be avoided in order to prevent electrical arc. Burning necessary or authorized by the Regional Forest Service District adjacent to the right-of-way will be discussed with BPA District Maintenance personnel prior to writing the burn plan.
- No log decking or storage of logs on the transmission line right-of-way. No storage of flammable materials on the right-of-way. No personnel carrying flammable material on the right-of-way.
- No loading of logging trucks on the right-of-way. Logging trucks shall not be loaded to a height greater than 14 feet above the roadbed when traveling underneath the line.
- No fueling of vehicles or equipment on the right-of-way.
- If a tree comes in contact with the transmission line, DO NOT ATTEMPT TO REMOVE IT. Quickly remove personnel from the immediate area. Immediately contact BPA Dittmer Dispatch Center, 24 hours per day, 7 days per week: **(800) 392-0816**.
- If a wildfire occurs on or near the right-of-way, contact BPA Dittmer Dispatch Center immediately, 24 hours per day, 7 days per week: (800) 392-0816
- For extreme safety hazard trees near the transmission line, and with advance notification, BPA may be able to provide personnel at the work site.

Regulations of the Secretary of the Interior governing sale of timber are codified in 43 CFR Group 5400.

2. **QUALIFICATIONS OF BIDDERS** — A bidder for sale of timber/vegetative resources must be either (a) a citizen of the United States, (b) a partnership composed wholly of such citizens, (c) an unincorporated association composed wholly of such citizens, or (d) a corporation authorized to transact business in the State in which the timber/vegetative resource is located.

3. **INSPECTION OF TIMBER/VEGETATIVE RESOURCES** — Bidder is invited, urged, and cautioned to inspect the timber/vegetative resource prior to submitting a bid. By executing the timber/vegetative resource sale contract, bidder warrants that the contract is accepted on the basis of his examination and inspection of the timber/vegetative resource and his opinion of its value.

4. **DISCLAIMER OF WARRANTY** — Government expressly disclaims any warranty of the fitness of the designated timber/vegetative resource for any purpose of the bidder; all timber/vegetative resources are to be sold "As Is" without any warranty of merchantability by Government. Any warranty as to the quantity or quality of timber/vegetative resource to be sold is expressly disclaimed by Government.

5. **BIDS** — Sealed or written bids for not less than the advertised appraised price, per timber/vegetative resource must be submitted in duplicate to the District Manager who issued *Timber/Vegetative Resource Sale Notice*.

(a) **Sealed Bid Sales** — Bids will be received until time for opening which is set out in the Notice. Enclose both copies of bid with required bid deposit in a sealed envelope marked on the outside *Bid for Timber/Vegetative Resource*, time bid is to be opened, tract number, and legal description of land on which timber/vegetative resource is located. In event of a tie, the high bidder shall be determined by lot from among those who submitted the tie bids.

(b) **Auction Sales** — Submission of the required bid deposit and a written bid is required to qualify for oral bidding. Oral bidding shall begin from the highest written bid. No oral bid will be considered which is not higher than the preceding bid. In the event there is a tie in high written bids, and no oral bidding occurs, the bidder who was the first to submit his bid deposit and written bid shall be declared the high bidder. If the officer conducting the sale cannot determine who made the first submission of high tie written bids, the high bidder shall be determined by lot. High bidder must confirm his bid, in writing, immediately upon being declared high bidder.

(c) Except as otherwise provided in 43 CFR 5442.2, bids will not be considered in resale of timber/vegetative resource remaining from an uncompleted contract from any person or affiliate of such person who failed to complete the original contract because of (1) cancellation for the purchaser's breach or (2) through failure to complete payment by expiration date.

(d) When it is in the interest of the Government to do so, it may reject any and all bids and may waive minor deficiencies in bids or in sale advertisement.

6. **BID FORMS** — All sealed, written bids, and confirmation of oral bids shall be submitted on forms provided by Government.

(b) **Timber Scale Sales** — Bids must state price per thousand board feet that will be paid for each species. High bidder will be determined by multiplying bid price per thousand board feet per species by Bureau of Land Management estimate of volume of each species. Such increase must be on a bond rider form supplied by Government and be approved, in writing, by Government prior to cutting timber covered by the bond increase. This increased amount of bond shall be used to assure payment for timber cut in advance of payment.*

14. **NINETY-DAY SALES** — If no bid is received within time specified in the advertisement of sale and if Government determines that there has been no significant rise in the market value of timber/vegetative resource, it may, in its discretion, keep the sale open, not to exceed ninety (90) days.

15. **UNAUTHORIZED USE OF GOVERNMENT PROPERTY** — A sale may be refused to high bidder who has been notified that he has failed to make satisfactory arrangements for payment of damages resulting from unauthorized use of, or injury to, property of the United States.
