	Home Hemophilia Program
TOTAL: 19 States	**38 Programs**

* The Medicaid statue allows manufacturers participating in the Medicaid Drug Rebate Program to exclude prices to State pharmaceutical assistance programs (SPAPs) from their Medicaid Best Price calculations. The Centers for Medicare & Medicaid Services has compiled a list of programs that meet the criteria to be considered SPAPs. Please note that this list only includes states that submitted a description of their programs to the Centers for Medicare & Medicaid Services for review based on the established criteria in the Centers for Medicare & Medicaid Services Manufacturer Release #68 (April 1, 2005). The qualification of State-only programs as SPAPs is based on the information provided by the State and may be subject to further review if changes occur within the program.
