

Reporting Form
Initial Report

On mm/dd/yyyy representatives collected Self Contained Self Rescuers SCSR from the ??? mine. These SCSR's were collected for evaluation in the NIOSH Long Term Field Evaluation (LTFE) program.

NIOSH collects units for the LTFE that meet the manufacturer's inspection criteria for those units. Only units meeting a strict application of the inspection criteria are accepted. The attached SCSR collection report shows the model and serial number of all units inspected by NIOSH from this mine, which units were accepted and which units were not accepted. For units not accepted the criteria for not accepting are noted.

SCSR Collection Report

Mine:

Date collected mm/dd/yyyy

Make	Serial number	Accepted	Not Accepted	Reason for non-acceptance	Source

Reasons are:

- out of date, Date
- heat indicator, Heat
- Moisture indicator, Moist
- Bulged Case, Bulge
- Damaged case other than buldge, Phys
- Broken/damaged seals, Seal
- Excess noise, Rattle
- Other

Source will indicate whether cached or belt worn. For belt worn devices, NPPTL will notify the wearer. I do not think we should include the wearer's name in the notice to mine operator and regulatory authorities.
