November

Lessons From the Field of Emergency Preparedness - AHRQ

Date: Nov. 6, 2008

Time: 12:00 - 1:30 PM ET

Location: Web Conference

To support community emergency preparedness planning, the Agency for Healthcare Research and Quality (AHRQ) has developed a range of free interactive computer models and other tools. To help communities use these tools, AHRQ will host a Web conference, Lessons from the Field of Emergency Preparedness. Participants will hear stories from three communities representing different regions with distinct populations, geographies, and threats. Presenters will offer diverse perspectives on emergency planning and how AHRQ tools have enhanced surge capacity, medical supply allocation planning, and resource inventories reporting systems.

Biosafety and Biosecurity: Minimizing the Risks in the Laboratory - APHL On-site Workshop

Date: Nov. 19, 2008

Location: Paramus, NJ

The biosafety sessions of this program will identify key concerns of laboratory biosafety, focusing on biosafety level 2 (BSL2) laboratories and practices, an explanation of biosafety level 3 (BSL3) practices and how they can be used in a BSL2 laboratory, proper

use of personal protection equipment (PPE), biological safety cabinets (BSCs), and conducting risk assessments. The biosecurity session will present laboratory security principles described in the 5th edition of the Biosafety in Microbiological and Biomedical Laboratories (BMBL) manual. You will also learn how to conduct vulnerability assessments and develop a good biosecurity plan.

NAEMSE Instructor Course

Date: Nov. 21-23, 2008

Location: Ft. Worth, TX

The NAEMSE (National Association of EMS Educators) Educator Course represents the didactic component and practical application of the beginning education process to become an EMS instructor.

December

Chemical, Biological, Radiological, Nuclear, and Explosive Threats - APHL

Date: December 2, 2008

Time: 1:00 - 2:00 PM ET

Location: Teleconference

Public health and healthcare providers must be prepared to respond to all types of disasters and emergencies. This presentation will review the most common chemical, biological, and viral warfare agents. Then describe the serious threat of radiation dispersal devices, commonly called "dirty bombs" and nuclear weapons. Finally, explosives will be included as the most common Weapons of Mass Destruction (WMD) used by terrorists.

Public Workshop: Adjuvants and Adjuvanted Preventative and Therapeutic Vaccines for Infectious Disease Indications - FDA/NIH

Dates: December 2-3, 2008

Location: Rockville, MD

The Food and Drug Administration (FDA), in cooperation with the National Institutes of Health (NIH), is announcing a workshop on Adjuvants and Adjuvanted vaccines. This is a 2-day workshop for academics, government researchers, government regulators, vaccine clinical trial experts and industry representatives. The purpose of this workshop is to assess the scientific knowledge base regarding vaccine adjuvants and to facilitate the development of a research agenda to improve the safety and efficacy assessments of adjuvanted vaccines for the treatment and prevention of disease.

Mass Antibiotic Dispensing: Partnering with Tribal Governments and Communities - CDC

Date: December 4, 2008

Time: 1:00 - 2:30 PM ET

Location: Satellite Broadcast

This broadcast will assist state and local Strategic National Stockpile (SNS) planners in determining how to effectively engage their neighboring tribal governments and communities. Participants from several states, counties, and tribal entities will discuss how to ensure that tribal leaders and stakeholders are appropriately involved in mass antibiotic dispensing and all-hazards planning. The broadcast will include a live question and answer session in which viewers are encouraged to participate.

Biosafety and Biosecurity: Minimizing the Risks in the Laboratory - APHL

Date: December 5, 2008

Time: 8:00 AM - 4:00 PM ET

Location: Raleigh, NC

The biosafety sessions of this program will identify key concerns of laboratory biosafety, focusing on biosafety level 2 (BSL2) laboratories and practices, an explanation of biosafety level 3 (BSL3) practices and how they can be used in a BSL2 laboratory, proper use of personal protection equipment (PPE), biological safety cabinets (BSCs), and conducting risk assessments. The biosecurity session will present laboratory security principles described in the 5th edition of the Biosafety in Microbiological and Biomedical Laboratories (BMBL) manual. You will also learn how to conduct vulnerability assessments and develop a good biosecurity plan.

Disability and Special Needs Technical Assistance Conference: Understanding the Four Phases of Emergency Management

Dates: December 9-10, 2008

Location: San Diego, CA

This conference will bring together some of the most influential Federal, State, and local experts in emergency management to discuss the processes involved in the emergency management spectrum and describe how special needs issues should be integrated into the four phases of emergency management. This conference will provide in-depth information on the four phases of emergency management: preparedness, mitigation, response, and recovery.

On-Demand Trainings

New Addition

Agency for Healthcare Quality and Research (AHRQ) Public Health Preparedness - Conference and Meeting Archive

This is a link to archived audio from past AHRQ conferences and meetings, including topics such as Providing Mass Medical Care with Scarce Resources; Hospital Surge Capacity; and Bioterrorism and Health System Preparedness. This webpage also contains a wealth of other resources from AHRQ regarding public health preparedness.

<http://www.ahrq.gov/prep/#audio>

Supercourse: Epidemiology, the Internet and Global Health

University of Pittsburgh

Supercourse is a global repository of lectures on public health and prevention targeting educators across the world. Supercourse has a network of over 55,000 scientists in 174 countries who are sharing for free a library of 3,455 lectures in 26 languages.

<http://www.pitt.edu/~super1/>

National Center for Biomedical Research and Training eLearning Courses

Topics include: Preparing Communities for Agroterrorism; Prevention and Deterrence of Terrorist Acts; Foundational Awareness of Weapons of Mass Destruction/Terrorism; Effects of Weapons of Mass Destruction/Terrorism Incidents; Disaster Mental Health; eCDLS (eCore Disaster Life Support).

<http://www.ncbrt.lsu.edu/elearn/Default.aspx>

NIMS: The Role of EMS

This 24-7 EMS segment describes the role of the National Incident Management System in standardizing response to multiple casualty events. The five key command positions are identified, as well as the general responsibilities of EMS during an MCI.

Disaster Preparedness - American Academy of Pediatrics

All families need a disaster plan. Chronically ill children and their families are especially at risk in the aftermath of a disaster. Through this Hot Topic, the American Academy of Pediatrics provides guidance to pediatricians on how they can prepare themselves, their patients, and their practices to deal with terrorism and disaster events.

[Hot Topics: Disaster Preparedness](#)

Pediatric Prescribing Update: Bioterrorism Counteragents - American Academy of Pediatrics

The purpose of this course is to help physicians effectively prescribe the drugs that have received approval for use in children; understand how the new labeling affects their practice; and obtain current information related to labeling changes.

[Pediatric Prescribing Update: Bioterrorism Counteragents](#)

CDC Epidemiologic Case Studies

These case studies are interactive exercises developed to teach epidemiologic principles and practices. They are based on real-life outbreaks and public health problems and were developed in collaboration with the original investigators and experts from the Centers for Disease Control and Prevention. The case studies require students to apply their epidemiologic knowledge and skills to problems confronted by public health practitioners at the local, state, and national level every day. Topics include *Botulism*, *E. coli*, and *Salmonella*.

Disaster and Terrorism Response: Emergency Preparedness Tools for Pharmacists and Health-System Pharmacy Departments

Health-system pharmacists and pharmacy departments play a critical role in emergency preparedness. In order for pharmacists and health-system pharmacy departments to be involved in the safe and effective use of medications following a disaster or terrorist event, there must be an overall understanding of the principles of emergency preparedness and integration of the pharmacy department into the organizational and community plans. This program will provide the basic information that pharmacists need to become involved in emergency preparedness efforts.

CDC - Public Health Emergency Law & Forensic Epidemiology Training

The Public Health Law Program of the U.S. Centers for Disease Control and Prevention has just released version three of the Public Health Emergency Law and Forensic Epidemiology training materials on CD-ROM. These self-contained training packages were developed by for use by instructors in any jurisdiction in the United States who provide public health preparedness training to front-line practitioners.

<http://www2.cdc.gov/phlp/phe1.asp>

North Carolina Center for Public Health Preparedness Training Web Site

The site offers free short Internet-based trainings on public health preparedness topics such as disease surveillance, basic epidemiology, bioterrorism, and new/emerging disease agents. Trainings address emergency readiness competencies plus core public health and epidemiology competencies and offer free continuing education credits.

<http://nccphp.sph.unc.edu/training/>

Emergency Preparedness and Response Fundamentals: Training for Environmental Health Professionals

This training material was developed for Environmental Health Professionals (EHP) in Minnesota and across the country as part of the National Association of Community Health Centers' (NACCHO) Advanced Practice Centers program. The initial training program consists of two modules. It has been designed for working professionals to use

online. The material in both modules addresses basic environmental health concepts - concepts that are important to front line staff with years of experience and to those who are new in the field. For some EHP, this will be a good refresher session and for others it will be new information. For all, these courses are designed to increase awareness of the EHP role in preparedness and disaster response.
