Subject: November 19, 2002, OMB Circular A-76 Draft

Sir/Madam:

As an A-76 coordinator/practitioner, I would like to submit the following comments on the draft:

Use of standard OPM series, instead of OMB function codes, to categorize FTE in agency FAIR Act and inherently governmental inventories is recommended. This would greatly facilitate A-76 studies, simplify accounting of FTE being competitively sourced, and would give human resources practitioners a recognized standard unit of analysis for their involvement in the A-76 process.
