Report Drill Down capabilities include MACOM, SUBCOM and Functional Dimensions as selection criteria and are relevant to DOD data only.

The Federal Procurement Data System - Next Generation (FPDS-NG) is a dynamic, real-time database. Updates to data, including new actions, modifications, and corrections are made on a regular basis. Such updates could result in changes to the FPDS-NG data used to compile reports on actions for current and/or prior fiscal years. Accordingly, all reports need to be viewed with this in mind. It should also be noted that availability of DoD data entered into FPDS-NG is subject to a 90-day delay for non DoD users
