restoration activities and has worked to interpret and communicate the multiple stories of this important island to millions of visitors. The Commission has participated in a number of initiatives, including archeological excavation, lighthouse restoration, and exhibit installation, to protect and manage the historic resources of the park.

The U.S. Congress recognized the significance of Mackinac when it established the Mackinac Island National Park in 1875, making it the Nation's second National Park after Yellowstone. In 1895, park ownership was transferred to the State of Michigan, creating Michigan's first State park. In 1958, the Mackinac Island State Park Commission established the Historical Preservation and Museum Program. This program has served as the primary caretaker and purveyor of the Island's considerable tale. I am pleased to extend my warmest congratulations to those individuals involved with this program who have painstakingly restored and preserved Mackinac Island for future generations.

TRIBUTE TO JOHN ENGBER

Mrs. MURRAY. Mr. President, I rise today to recognize John Engber for his 11 years of service to the U.S. Senate and the people of Washington State. John served as my State Director during this time, and he was a critical part of my staff. On June 1, he ended his tenure in my office. We were sad to see him go, but we wish him all the best in his next endeavor.

John was a thoughtful and dedicated public servant. As my State Director, he helped ensure that even though Washington State residents are 2,500 miles from DC, their needs are up-front and center. Overseeing my State operations, he was responsible for listening to the people in our communities and for connecting them to the Senate and the Federal Government. And thanks to his hard work, residents of towns from Forks to Clarkston have access to me and my office.

One of John's greatest accomplishments during his time with my office was his help in drafting the recently enacted Wild Sky Wilderness law. John worked closely with local leaders, the environmental community, outdoor enthusiasts, and others to create a wilderness proposal built on community consensus. We faced some tremendous obstacles over the 9 years that we worked on the bill, but John helped us all remain dedicated to the goal of preserving Wild Sky for future generations.

Finally, I would like to thank John for his years of service to me and the people of Washington State. His leadership and his dedication are truly appreciated, and I know that he will always have Washington State's interests at heart. I wish him happiness and success as he moves on to the next phase of his

11TH ANNUAL CONGRESSIONAL HEALTH SCREENINGS

Mr. CRAPO. Mr. President, I would like to bring to the Chamber's attention the 11th Annual Congressional Health Screenings and I would like to commend my colleague, Senator SHEL-BY, for his leadership at this event. The Congressional Health Screenings occur each year during National Men's Health Week the week prior to Father's Day. I encourage all of my colleagues and their staffs to participate in these screenings. As U.S. Senators, we must set an example and not only encourage healthy habits but practice them as well. This year's program offers a number of convenient screenings. including prostate specific antigen, PSA, cholesterol, glucose, blood pressure, and body fat tests, as well as health education materials. The purpose of this event is to increase our awareness of health issues and to help develop comprehensive strategies to improve our health and that of our families

The state of men's health has become a national crisis. Because of poor health habits, lack of health insurance, failure to seek timely medical attention, and dangerous occupations, men are afflicted with more maladies and die younger than women. Today, men are living approximately 5 fewer years than that of their female counterparts and are dying at higher rates for 9 out of the Nation's top 10 causes of death. This includes death from cancer, diabetes, suicide, accidents, and diseases of the heart, kidney, and liver. When speaking about cancer, it is important to note that one in two men in his lifetime will be diagnosed with cancer and one in six will be diagnosed with prostate cancer.

The Men's Health Network, along with Women Against Prostate Cancer, use National Men's Health Week to emphasize the fact that prostate health issues and prostate cancer is not merely a "man's disease." Each year thousands of wives, daughters, sisters, and friends are impacted—often in devastating ways—by the loss and/or suffering of a man from prostate health issues. Early and regular screenings significantly increase the chance of early detection and successful treatment.

I am pleased to report that we are steadily making progress. Last year during September's Prostate Awareness Month, Men's Health Network and the Washington Redskins held a prostate screening at FedEx Field in Landover, MD. Over 300 people gathered to help their fathers, grandfathers, sons, uncles, and friends move one step closer toward a happier, healthier future. Five of the gentlemen screened had potentially dangerous PSA readings.

There is no better time than now to become more proactive with regard to men's health. Women are 100-percent more likely than men to regularly visit their doctors for annual examinations and to seek out preventative services.

Half of the Nation's elderly widows living in poverty did not face economic hardships before the deaths of their husbands. Men between the ages of 45 and 54 are three times more likely to die of heart attacks, 1.5 times more likely to die from heart disease, and 1.5 times more likely to die from cancer than women.

Half of the estimated 54,000 men diagnosed this year with colon cancer will die from it. Over 185,000 men are expected to develop prostate cancer in 2008—almost 15 percent of these cases are expected to be terminal. Preventive measures, such as prostate specific antigen exams, blood pressure and cholesterol screens, and routine self-testing exams for these and other types of cancers that target men can lead to invaluable early detection that will increase the survival rates for such cancers by almost 100 percent.

In addition, I must reiterate the need for an Office of Men's Health in the U.S. Department of Health and Human Services to tackle many of these aforementioned issues. Last year, I introduced S. 640, the Men's Health Act, which would establish such an office. The Office on Women's Health in the department does a fantastic job of saving the lives of thousands of women and improving the lives of many more. Similarly, an Office of Men's Health would provide a support network that would reach out to all men on issues related to men's health.

In closing, I thank the Men's Health Network for hosting the 11th Annual Congressional Health Screenings. I hope that my colleagues and their staffs will take this unique opportunity to not only better their own health, but to encourage the people around them to do the same.

ADDITIONAL STATEMENTS

TRIBUTE TO MONROE ROTARY

• Mr. VITTER. Mr. President, I wish to honor the Monroe Rotary Club, which is celebrating its 90th anniversary this month, and I would like to take a few moments to publicly recognize their great history.

The Rotary Club of Monroe was founded on April 29, 1918, with a membership of 31; however, they did not receive their charter until June of 1918. The stated purpose of the organization is to bring together business and professional leaders to provide humanitarian service, encourage high ethical standards in all vocations, and help build goodwill and peace in the world. In order to carry out its service programs, Rotary is structured in club, district, and international levels.

In furtherance of the goals of Rotary, the Rotary Club of Monroe has sponsored many local projects including, scholarships at the University of Louisiana at Monroe, Goodfellows, Boy Scouts, Girl Scouts, Monroe Youth
