Background and Purpose

Section 7033 of the America Competes Act states the following:

(a) In General.—The Director is authorized to establish a new program to award grants on a competitive, merit-reviewed basis to Hispanic-serving institutions (as defined in section 502 of the Higher Education Act of 1965 (20 U.S.C. 1101a)) to enhance the quality of undergraduate science, technology, engineering, and mathematics education at such institutions and to increase the

retention and graduation rates of students pursuing associate's or baccalaureate degrees in science, technology, engineering, and mathematics.

(b) Program Components.—Grants awarded under this section shall support—

(1) Activities to improve courses and curriculum in science, technology, engineering, and mathematics;

(2) Faculty development;

(3) Stipends for undergraduate students participating in research; and

(4) Other activities consistent with subsection (a), as determined by the Director.

(c) Instrumentation.—Funding for instrumentation is an allowed use of grants awarded under this section.

NSF is requesting stakeholder input on promising evidence-based practices that have enhanced the quality of undergraduate science, technology, engineering, and mathematics (STEM) education at Hispanic-serving institutions and increased the retention and graduation rates of Hispanic students pursuing associate or baccalaureate degrees in STEM. NSF is interested in learning more about successful partnership activities that have contributed to the increased participation and success of Hispanics in undergraduate STEM education. These might involve partnerships that include two-year and four-year institutions, state and local government organizations, K–12 institutions, private-sector firms, community groups, and other organizations involved in the science and technology enterprise. Research findings and experiential information are especially welcome; NSF would like to learn about strategies that have worked to increase Hispanic retention and graduation rates in STEM, as well as those strategies that have not proven effective.

Implementation Plans

NSF plans to consider the stakeholder input received at the meeting and in the written comments to develop the agency's programmatic response to Section 7033 of the America Competes Act.
