

APR 14 2004

Jane Houlihan
Vice President for Research
Environmental Working Group
1436 U Street, N.W., Suite 100
Washington, D.C. 20009

Dear Ms. Houlihan:

I am writing to you regarding your request for correction of information regarding FDA's "Advice For Women Who Are Pregnant, Or Who Might Become Pregnant, And Nursing Mothers, About Avoiding Harm to Your Baby Or Young Child From Mercury in Fish And Shellfish." This information was released in December 2003 as a draft Advisory. As you may know, the Draft Advisory was revised and re-released on March 19, 2004. The 2004 Consumer Advisory entitled "What You Need to Know About Mercury in Fish and Shellfish" is available on the internet at www.cfsan.fda.gov/~dms/admehg3.html.

Your December 22, 2003 request is still under our review. We will not be able to meet the date of April 20, 2004, for responding as had been indicated in our prior correspondence. However, we now anticipate responding by June 18, 2004.

Sincerely,

A handwritten signature in black ink, appearing to read "David Acheson", written over a horizontal line.

David Acheson, M.D., Chief Medical Officer
Director, Food Safety and Security Staff
Center for Food Safety
and Applied Nutrition
