

## On TARGET:

The TARGET Center was established in December 1992 to support USDA's efforts in enforcing federal disability legislation and supporting integration of assistive technology and ergonomic solutions.

- TARGET has eight workstations equipped with hardware and software to accommodate people with mobility, speech, visual, hearing, and cognitive impairments.
- TARGET works with employees, managers, IT professionals, and procurement officials to find appropriate, cost-effective solutions for employees with disabilities and ergonomic related needs.
- TARGET has an expert staff available to provide demonstrations, assessments, information and referral, equipment loans, alternative formatting, Web accessibility training, and disability legislation education. Contact the TARGET Center for further information or to request these services.
