

# PDS

IT'S TIME FOR THE

## Proactive Disclosure Service

PDS builds on the current NPDB-HIPDB's Integrated Querying and Reporting Service (IQRS) by providing the Data Banks' users with continuous monitoring of their practitioners.

# Stay Ahead of the Curve: Upgrade to PDS!

## Upgrade to PDS – Improving the quality of health care and patient safety.

Querying the Data Banks has never been simpler and more affordable. By upgrading to PDS, you can get more timely information for approximately the same amount of money you spend on the conventional querying method. And that's not all. PDS provides a host of new and improved features that allows for enhanced Data Banks interface.

Currently, querying the Data Banks costs \$4.75 per name per Data Bank. With PDS, enrollment costs \$3.25 per name per year per Data Bank. The \$3.25 PDS enrollment charge is the median cost for the average querier. So, upgrade now to PDS and stay ahead of the curve.

---

*The PDS notifies subscribing entities when new or updated NPDB and/or HIPDB reports name any of their enrolled practitioners as subjects. It was developed in response to the growing need for continuous monitoring of health care practitioners.*

---
