

Division of Resource Development and Analysis

OPASI, NIH, DHHS

Timothy Hays, Ph.D.

Chief, Portfolio Analysis and Scientific Opportunities Branch

OPASI

RCDC Working Groups

- Five hours of teleconference and online training and use of the system over a two-month period
 - Two hours of RCDC overview, training on tool use, and information describing the development of the system
 - One hour required NIH IT security training
 - Two hours of RCDC system use from “home”
- One hour teleconference discussion about the system followed by approximately one hour to review and edit the report

RCDC Working Groups

- Public Review Working Group
 - Various public members from NIH advisory councils including scientists, advocacy group representatives and the engaged public
 - Evaluate the categorization process, provide feedback on RCDC plans for outreach to external audiences, and summarize findings and recommendations in a final report.

RCDC Working Groups

- Technical Review Working Group
 - Experts who have an understanding of information science, informatics, computational science, and/or information technology.
 - Review the RCDC tool, provide advice, and prepare a technical report of findings for NIH on the merits of the RCDC system.
