Comments: Ever since I was small I have always loved animals and beleived that just like humans, animals should have rights to live and to be left alone. In my opinion I do not beleive that they should be tested on. Because they have emotions and can feel pain just as we do.I agree that alternitive methods should be used and that animals should no longer be tested on. It is downright cruel and It brakes my heat to know that companies still take part in conducting animal experiments. I hope every body out there, who has a heart will agree to ICCVAM. And I thank you for caring about the animals.
