From: Danielle Stanley

Please do what you can to stop the needless and cruel animal testing that continues to go on today. I cannot believe that such tests still exist today with all the advances in technology. Non-animal tests are more accurate and no living being is tortured and killed in the process.

I am asking ICCVAM officials to accept internationally validated non-animal methods, including non-animal test methods for skin and eye irritation, phototoxicity, and pyrogenicity, and to follow the additional December 2006 recommendations of the animal protection community.

Please do what you can to stop the animal testing process, and stop the needless killing and torture of animals.

Thank you for your time.
