Dear Sir,

I cannot believe that in USA still be possible to cruelly blind with corrosive products one living being in order to achieve the futile attempt of other species to be more beautiful.

I do not know what "developed" country means anymore.

I you are physician, you should understand suffering, any suffering.

I wonder how much cruelty is necessary for you to realize that we cannot base our comfort on the suffering of other species.

Thank you very much for your attention,
Magdalena Adeva.
