# Cyborg Meeting
## August 9, 2006

Attendance: Pete Bostian, Ken Dinsmore, Wayne Duncan, Pam Mendelsohn

1.      Cyborg Updates:  Wayne reported that there were three updates but none affected us.  One notice about a recent Maryland law (to be effective 1/1/2007) forbidding the display of social security numbers on pay advice statements will require us to remove them.

2.      Payroll processing:  Wayne noted that Vanguard will be changing how they want to receive SAIC's former pension-plan data.  He has not yet received any details about the change.

        Wayne also noted that only the Veteran's day holiday will impact the payroll processing schedule.  For that pay period, payroll will be processed on Thursday, November 9th.

3.      Pete reported that he has changed the labor journal creation process to prepare for project accounting and for SAIC's request to change from charging the employees' default centers for leave charges to pro-rate the charges based on the employees' direct labor center charges.  Neither of these changes impact the current journals because project data will not be recorded in labor until TimeWizard is being used by more SAIC directorates and SAIC is still reviewing issues with pro-rated fringe distribution.

4.      Time & Attendance:  Ken discussed SAIC's TimeWizard implementation status and future schedule.

        The next meeting will be held Wednesday, November 8, 2006, at 9 AM in the Building 362 Conference Room.
