

NIH Manual Chapter Review Record

Use prescribed by NIH Manual 1710.

Many manual chapters need to be reviewed by organizations outside the issuing office. Use this form to record such review.

NIH Manual Chapter Number and Title

Section A. Issuing Office

Instructions for Issuing Office:

1. Determine the organizations that need to review the manual chapter. See Section C, on page 2, for suggested organizations.
2. Prepare one form for each reviewing office by completing the identifying information on the right half of the form in Section A.
3. For the convenience of the reviewing offices, mark each page that needs to be reviewed or list page numbers in "Specific Instructions for Reviewer" below.
4. Keep this form and all comments provided by the reviewer until this version of the chapter is revised.

Section B. Reviewing Office

Instructions for Reviewing Office:

1. Please review the attached manual chapter. See "Specific Instructions for Reviewer" above, and complete all items in Section B.
2. Return this form, your comments, and the manual chapter to the contact shown in Section A.
3. We ask for a maximum 5-day turn-around time for your review. Please call the contact shown in Section A if this is not feasible.

Section C. Suggested Reviewing Offices

Use the guide on page 2 to help determine who should review manual chapters. (Call OMA, 301-496-2832, for further advice.)

- Any office mentioned in the text of the chapter.
- Any office that is responsible for a number series in the NIH Manual, but is **not** the issuing office for a particular chapter. For example, if the Office of Management Assessment (OMA) issues

a chapter which is part of the 2300 personnel series, OMA should send the chapter for review to the Office of Human Resources (OHR). At a minimum, OHR needs to be aware that the chapter is going to be issued in the 2300 series.

- The following organizations when the chapter relates to their subject areas (see page 2):

Required and Suggested Reviewing Offices

Organization Name	Subject Areas
Office of the General Counsel (OGC)	Required for all NIH Manual Chapters; OMA obtains this review.
<i>Ofc. Director</i>	
Ofc. Extramural Research	Extramural research policy concerning grants, cooperative agreements, contracts, peer review, advisory committee functions and operations, program management, animal welfare, protection of human subjects, training, and fellowships.
