

Implementation of eRA One-View

(Electronic Requests affecting Commons)

Commons Working Group

May 22, 2005

One-View

- ❖ **One View** is an integrated approach to initiate and process all eRA transactions electronically. It consists of three primary parts:
 - **Single login for all eRA applications – including Commons**
 - **Single method for notification of actions/events (i.e., eNotification)**
 - **Single interface to initiate and process a request, regardless of context (within HHS and grantee community)**

Why One-View

- ❖ PI/SO/Program Official/Grants Specialist/SRA require same view
- ❖ HHS OPDIVs into Commons difficult until workflow deployed
- ❖ Workflow does not end at SO submission to HHS (it begins there)
- ❖ Estimated 10% error rate on externally initiated transactions such as eSNAP, JIT, and soon Closeout (fixes require paper process)
- ❖ GM/Program/CGAP/TA/e901/Commons require:
 - **One login to eRA**
 - **Approval chains spanning multiple existing modules**

One-View 2005 Objectives

- ❖ Single login includes eNotification events
 - Email
 - UI display of event (Acknowledge/Process)
- ❖ Historical record of notification events
- ❖ Standard method for requests and transactions (internal/external)

Demo of One View

Request Types for 2005 (Goal)

New

- ❖ Administrative supplement
- ❖ Carryover (of un-obligated balances)
- ❖ Change in scope
- ❖ Change in status of designated personnel
- ❖ Change in grantee organization status
- ❖ Deviations from terms of award
- ❖ Adding a foreign component
- ❖ Pre-Award costs
- ❖ Retention of funds (when K Award is funded)
- ❖ Change of institution
- ❖ Other requests

Enhanced

- ❖ eSNAP
- ❖ JIT
- ❖ Project extension
- ❖ Closeout final invention statement
- ❖ Closeout final progress report

Features

- ❖ Decline capability
- ❖ Recall capability
- ❖ Content specific to Request and Status
- ❖ Post-Process transactions (i.e., Type 7 "Shell") – expect faster turnaround
- ❖ Checklist/relinquishing/face page UIs are to be developed for data capture
- ❖ Requests available for searching Reporting, Tracking, Analysis

Key Milestones

- ❖ Task order awarded – March 2005
- ❖ Prototype – June 2005
- ❖ Candidate for production – October 2005
- ❖ Production release – January 2006

Discussion of Requests

See attached process flows and requirements chart

Future Direction

- ❖ Pre-Award requests
- ❖ X-Train
- ❖ eCGAP corrections/changes
- ❖ Incorporate organizational hierarchies into approvals
- ❖ Expand to do approvals

Request for Comments

- ❖ Organizational hierarchies for Commons
- ❖ Following this discussion
