NIH Public Access Policy and eSNAPs

- **NIH Public Access (PA) Policy Overview**
- **PA Commons Login**
- **PA submissions integrated into eSNAP**

The NIH Public Access Policy

Effective May 2, 2005: With input from stakeholders and the public, *NIH's Policy on Enhancing Public Access to Archived Publications Resulting From NIH-Funded Research* has several key elements:

- **The Policy strongly encourages, but does not require, all NIH-funded investigators to make the peer-reviewed, author's final manuscript available to other researchers and the public at the NIH National Library of Medicine's (NLM) PubMed Central (PMC) immediately after the final date of publication in a journal.**
- **At the time of submission, the author will specify the timing of the posting of his or her final manuscript for public accessibility as soon as possible and within twelve months of the publisher's official date of final publication.**

Note: The author's final manuscript is the final version accepted for journal publication and includes all modifications from the publishing peer review process.

The NIH Public Access Policy

What to Submit

- The Policy applies to peer-reviewed, original research publications that have been supported in whole or in part with direct costs from NIH. It does not apply to book chapters, editorials, reviews, or conference proceedings.
- The Policy applies to all research grant and career development award mechanisms, cooperative agreements, contracts, Institutional and Individual Ruth L. Kirschstein National Research Service Awards, as well as NIH intramural research studies.
- NIH is requesting that authors submit manuscripts resulting from:
 - 1) currently funded NIH research projects or
 - 2) previously-supported NIH research projects if they are accepted for publication on or after May 2, 2005.
- Publications resulting from non-NIH-supported research projects should not be submitted.

Why Public Access

- **ARCHIVE.** Keep a central archive of NIH-funded research publications—for now and in the future, preserving vital medical research results and information for years to come.
- **ADVANCE SCIENCE.** Create an information resource that will make it easier for scientists to mine medical research publications, and for NIH to manage better its entire research investment.
- **ACCESS.** Provide electronic access to NIH-funded research publications for patients, families, health professionals, scientists, teachers, and students.

NIH Public Access Policy

The policy is not a requirement, but a request, and it offers several benefits to researchers.

- Beginning August 1, 2005, fulfills a grant progress reporting requirement by substituting deposit for submission of paper copies of articles.
- Ensures that the article is available in PMC to be cross-indexed to other federally supported databases, such as GenBank & Clinical Trials.
- Heightens the visibility of the research and enhances the likelihood of early and increased citation.

NIH Public Access Policy

Opening Page

The screenshot shows a web browser window with the address bar displaying "http://nihms.nih.gov/". The main content area features the NIH logo and the text "NIH Public Access". Below this, it states that NIHMS (NIH Manuscript Submission) is currently accepting submissions through the eRA Commons and NIH Login. It also mentions that third-party submissions will be accepted starting July 6, 2005. A navigation bar includes links for NIH, NLM, NCBI, and PubMed Central. The page is divided into several sections: a "Log in" section, a section for the NIH Public Access Policy, a section for signing up for the NIHMS News list, a section for questions about the submission process, a section for the NIHMS help desk, and a section for email questions and comments. At the bottom, there is a footer with contact information and logos for the National Institutes of Health, the National Center for Biotechnology Information, the U.S. National Library of Medicine, and FIRSTGOV.gov.

eRA Commons Login Page

The screenshot shows a browser window with the URL `https://commons.era.nih.gov/commons/publicaccess/login.jsp?http://www.nihms.nih.gov/db/sub.cgi?login=eRA`. The page header includes the NIH logo, the text "NATIONAL INSTITUTES OF HEALTH eRA Commons", and a version number "Version 2.7.2.4". A navigation menu contains "Home", "Links", and "Help". The main heading is "eRA Login". On the right side, it says "Welcome Guest", "Institution: Not Affiliated", and "Authority:".

Please login with your NIH Commons user ID and password. Once logged in you will be able to upload your manuscript to the NIH Manuscript Submission System. If you don't have a NIH Commons user ID, click on the "Create Account" link below and you will be able to create one.

If you need to create a new account, contact your central grants administration office and have them affiliate your account with your institution. This will enable you to take advantage of all of the other benefits that the NIH Commons offers such as access to your review scores and downloading your summary statements when they are available as well as processing your annual progress reports online. Be sure to give them your user ID.

Welcome to the NIH Manuscript Submission System

Overview of the manuscript submission process:

- Set Up Manuscript** Provide bibliographic information, NIH grant information or NIH Intramural project information, and all manuscript files.
- Approve PDF Receipt** Review a PDF version of your manuscript to ensure that we received all of the content. During the initial implementation of the NIH Public Access policy, this PDF may be seen in PubMed Central until the final web version is prepared and approved.
- Approve Web Version** Review and approve the web version of your manuscript for use in PubMed Central.

Before You Get Started

You need to have all of these on hand to send a manuscript to NIH:

- Journal name
 - [What if my journal is not a PubMed journal?](#)
- Manuscript title
- PI name(s) and e-mail
- NIH grant number(s)
- Manuscript file(s)
 - [Which files should I include?](#)
 - [What file types can I use?](#)

Cancel Submission Continue
