	FACILITIES MAINTENANCE AND ENGINEERING PROCEDURE					
Subject:	AS-BUILT DRAWINGS	FMEP-P-0300B	Rev. No. 2			
		Page 1 of 4				

1.0 <u>PURPOSE</u>

- (a) To define the requirements for the preparation, review, approval and control of as-built drawings prepared by the Facilities Maintenance and Engineering (FME) organization.
- (b) To define the requirements for the review of as-built drawings prepared by a contracted Architect Engineer (A&E).

2.0 GENERAL

2.1 Control of As-built Drawings Using Document Logs

As-built drawings received by FME for review and as-built drawings created by FME are to be controlled in accordance with Section 3.4 of the FME procedure, FMEP-A-0010, Processing of Design and Miscellaneous Documents.

2.2 Definition

An as-built drawing is a drawing that depicts the final installed configuration (physical or functional). The as-built drawing incorporates:

- (a) all of the field mark ups on the issued for construction drawings.
- (b) all design change notices (see procedure number FMEP-P-0320) issued against the construction drawings.
- (c) all approved design change requests (see procedure number FMEP-P-0320) which identify a design document requiring a revision.
- (d) all deficiency reports (see procedure number FMEP-P-0380) which identify a design document requiring a revision.
- (e) the information identified on the modification drawing (see procedure number FMEP-P-0300A).
- 2.3 Signature and Date Requirements
- (a) All signature and dates are to be made using black ink or a grade of lead pencil that allows the signature and date to be reproducible.
- (b) "Initials" may be used in lieu of "signature" requirements in this procedure.

2.4 SAIC Review Signature

The SAIC review signature on as-built drawings created by a contracted Architect Engineer DOES NOT CONSTITUTE ACCEPTANCE OR APPROVAL OF DESIGN DETAILS OR MATERIAL SELECTION

IDENTIFIED ON THE DOCUMENT AND DOES NOT RELIEVE THE CREATOR OF THE DOCUMENT FROM FULL COMPLIANCE WITH CONTRACTUAL OBLIGATIONS.

2.5 A&E As-Built Drawing Review

The FME organization will review the as-built drawing provided by the A&E to verify incorporation of:

- (a) all field mark ups to the issued for construction drawing.
- (b) all design change notices issued against the issued for construction drawings.
- (c) all approved design change requests which identify a design document requiring a revision.
- (d) all deficiency reports (see procedure number FMEP-P-0380) which identify a design document requiring a revision.
- (e) the information identified on the modification drawing (see procedure number FMEP-P-0300A).

3.0 PROCEDURE

3.1 Checking

All FME created as-built drawings shall receive an independent check by an individual who has adequate qualifications to have originated the as-built drawing. The Manager of Engineering is responsible for the assignment of checkers.

As-built drawings shall be checked for:

Correctness and completeness Incorporation of all outstanding approved changes Incorporation of all field mark ups

The checker, when satisfied that the as-built drawings are correct, shall sign in the appropriate title block location.

3.2 Signature Requirements

(a) The signature requirements of the SAIC personnel signing for an A&E produced as-built drawing are identified below.

Drawn By Completed by the Architect Engineer

Design Originator Completed by the Architect Engineer

Checker Completed by the Architect Engineer

SAIC-Frederick, Inc. A Division of Science Applications International Corporation

Subject: AS-BUILT DRAWINGS FMEP-P-0300B Rev. No. 2 Page 3 of 4

Approver Completed by the Architect Engineer

Project Manager Completed by SAIC by signature in the title block.

COTR Completed by SAIC by signature in the title block.

Manager of Engineering Completed by SAIC by signature in the title block.

(b) The signature requirements for an FME produced as-built drawing are identified below.

Drawn By Completed by SAIC

Design Originator Completed by SAIC

Checker Completed by SAIC

Approver Completed by SAIC

Drafting Completed by SAIC

Project Manager Completed by SAIC

COTR Completed by SAIC

Manager of Engineering Completed by SAIC

3.3 Signature Responsibilities

(a) The responsibilities of those signing for the FME created as-built drawings are identified below:

<u>Title</u> <u>Responsibility</u>

Drawn By Signoff indicates as-built drawing is complete, satisfying drafting requirements,

and complies with requirements provided by the responsible engineer.

Design Originator Signoff indicates the as-built drawing reflects the incorporation of field mark

ups, design change notices, and design change requests.

Checker Signoff indicates the as-built drawing is complete.

Approver See Manager of Engineering below.

Drafting Signoff indicates the as-built drawing satisfies the drafting requirements.

Project Manager Signoff indicates compliance with contract requirements.

		Page 4 of 4		

COTR Correctness of the as-built drawing in reflecting field configuration.

Manager of Engineering Signoff indicates:

(a) All signoffs have been completed.(a) Release of as-built drawing.

(b) The responsibilities of the SAIC personnel signing for the A&E created as-built drawings are identified below:

<u>Title</u> <u>Responsibility</u>

Project Manager Signoff indicates compliance with contract requirements.

COTR Correctness of the as-built drawing in reflecting field configuration.

Manager of Engineering Signoff indicates:

(a) All signoffs have been completed.

(b) Release of as-built drawing (place date on drawing).

4.0 <u>CONTROL</u>

As-built drawings are to be issued as identified below.

- (a) Revised areas on as-built drawings shall be clearly identified. Circle the changes made to the as-built drawing in the revision being issued. Revision indicators from previous drawing revisions should be removed.
- (b) The "Revision Description" portion of the as-built drawing shall include a brief statement of the purpose of the revision; e.g., Issued As-built for WO XXXX-Incorporates_______.
