

LIST OF REQUIREMENTS AND PROSPECTIVE CHANGES

Release Cycle	July 2003
Module:	Internet Assisted Review
File Location of this Document	CVS \commons\docs\artifacts\2.requirements\Bugs and Release Requirements\072003\iar_features.doc
Analyst:	Tracy Soto
Development Lead:	Daniel Fox
Test Lead:	Marie Georges
Acceptance Test Lead:	Glenn Cooley

FEATURES FOR THIS DEPLOYMENT CYCLE:

	<i>Brief Description</i>	<i>Comments</i>
1.	Fix sorting on score matrix for lower half and AVG.	
2.	When user is in IAR it should be highlighted on the blue menu bar the same way other Commons apps are highlighted.	
3.	Clean up old meetings that appear, if there are no phase dates for a meeting then set the closure date equal to the meeting release date.	
4.	Eliminate duplicate meetings.	
5.	Modify creation of PDF critique to account for style headers in documents submitted by users. Currently, the critique header font may be inconsistent.	
6.	Fix sorting problem in critique merge files where subproject critiques are incorrectly appearing before the parent critiques.	
7.	Wherever they appear, make "Back to List of Applications", "Back to List of Meetings" links larger and in bold font style.	
8.	Modify invitation emails to clarify that the email is system-generated, that critiques are preliminary, added the meeting dates, changed 24 hours to 2-3 days for account activation and added IAR acronym to the activation email.	
9.	Allow any SRA or GTA on the roster to see the meeting in IAR.	

10.	Modify time validation when user enters phase dates to allow single digit for hour, month and day. Example - Allow 6/5/2003 1:00 AM instead of forcing user to enter 06/05/2003 01:00 AM.	
11.	Add Calendar to Edit Dates screen for each date field to let user click calendar and choose date. User should still be able to manually type date in field.	
12.	Add Meeting-Wide Option for including Reviewer names in the Preliminary Summary Statement body. The default for this should be No. If the SRA/GTA changes the setting in Control Center all pre-ss will be deleted and rebuilt, user should be alerted to this action. Wording changes should be made to edit screen, validation and confirmation.	
13.	Add link to Control Center on the List of Applications for SRA/GTA users.	
14.	It is optional for Discussants to submit. Reviewers assigned as Discussants on an application should not be blocked during Read if they didn't submit a critique. Change logic during Read phase to check Reviewer role, if Reviewer is Discussant then ignore blocking and let them read.	
15.	Make Application Number a hyperlink for viewing the grant image. This will offer a big advantage to Macintosh users who have had difficulty with CDs. The Reviewer should not see the Application Number hyperlink if they are in CD Conflict.	
16.	Add tags to the list of applications so when user submits or deletes a critique for an application and then clicks back to list of applications they are taken back to the same application instead of at the top of the list.	
17.	Remove logic to check for Phone Reviewers ability to see critiques. Phone Reviewers should have access to all meeting critiques so previously used allow/disallow codes are not necessary. These can be removed from database and logic to check for them in code should be removed, this will require modification of most IAR screens	
18.	SRA and GTAs should not be able to select and enable themselves in the Control Center.	

19.	Provide ability to zip all pre-ss into one zip file. This option should appear after the Submit Phase End Date. Individual Pre-ss filenames should be named like <PI lastname>_<full grant num>.doc.	
20.	On the Submit Critique and Preliminary Score screen, clarify instruction numbers 1, 2 and 5.	
21.	Add the ability to view the critique on Submit Successful screen.	
22.	To resolve user confusion, clarify the instructions on the validation screen that appears when you click Submit from the Submit Critique and Preliminary Score page. Also, remove link "back to list of applications" from this screen.	
23.	Add an option to view all meeting critiques (in Adobe PDF format) sorted by PI. Modify label of existing View All Meeting Critiques to clarify that there are now 2 options (By Appl or By PI).
