

MIC POLICY FOR USE OF CRYOSTAT

Users of the cryostat must strictly adhere to the following conditions when the cryostat is located in building 49, Room 3D-34A in the animal facility:

- * All rodents, fixed or unfixed AND come from animals WITHIN the Bldg. 49 breeding colony, will be accepted.
- * Only fixed and frozen rodent samples frozen AFTER fixation will be accepted. This holds true for ANY user from facilities across campus.
- * The user must NOT be coming directly from ANOTHER RODENT FACILITY.
- * All NON-RODENT specimens (frogs, zebrafish and insects etc.) will be permitted.

NOTE: Access to the cryostat room will be strictly enforced by Chip Dye. Each user will be interviewed by Mr. Dye to ensure that the above conditions are met prior to providing access.
