Tim and Mike's Wonderful World of eNotifications

Once upon a time...

In Grantland…

Type 5 Kits were printed..
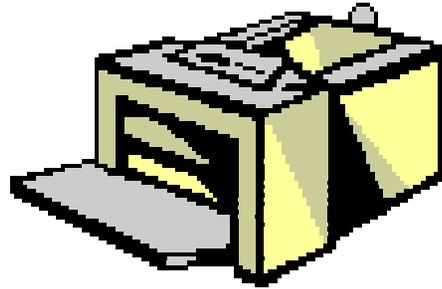

Stuffed in envelopes and boxes..

Then mailed to our grantees..
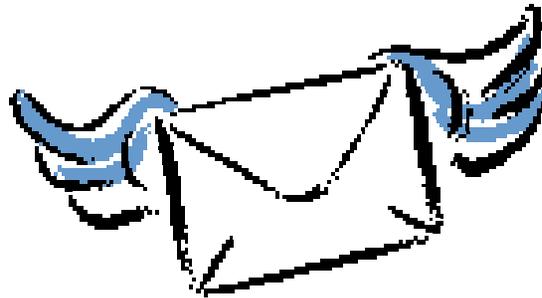

But then came the internet.. And eRA..
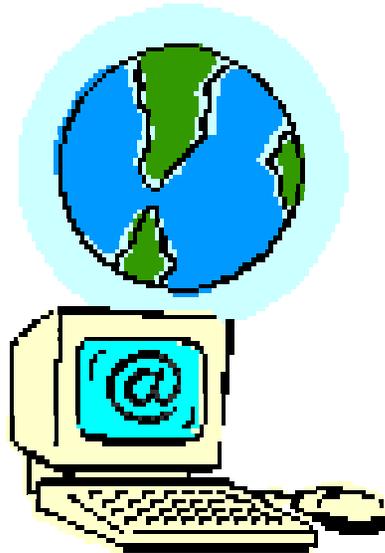

And the retirement of IMPAC I..

7

And no reminders went out..

And PIs "forgot" to submit progress report…

And awards did not go out…

And everyone was upset at me…

So the ICs pitched in and helped out...

So the ICs pitched in and helped out…

# So the Grantees let us know…

# And it was eRA to the Rescue…
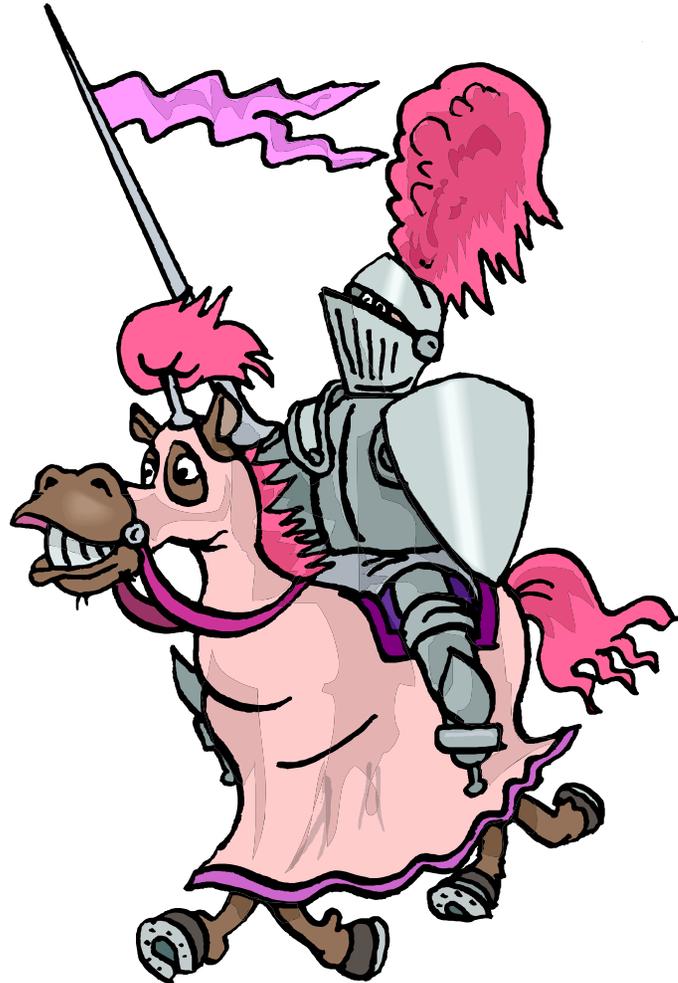

We will partner with NINDS…

To build one system...
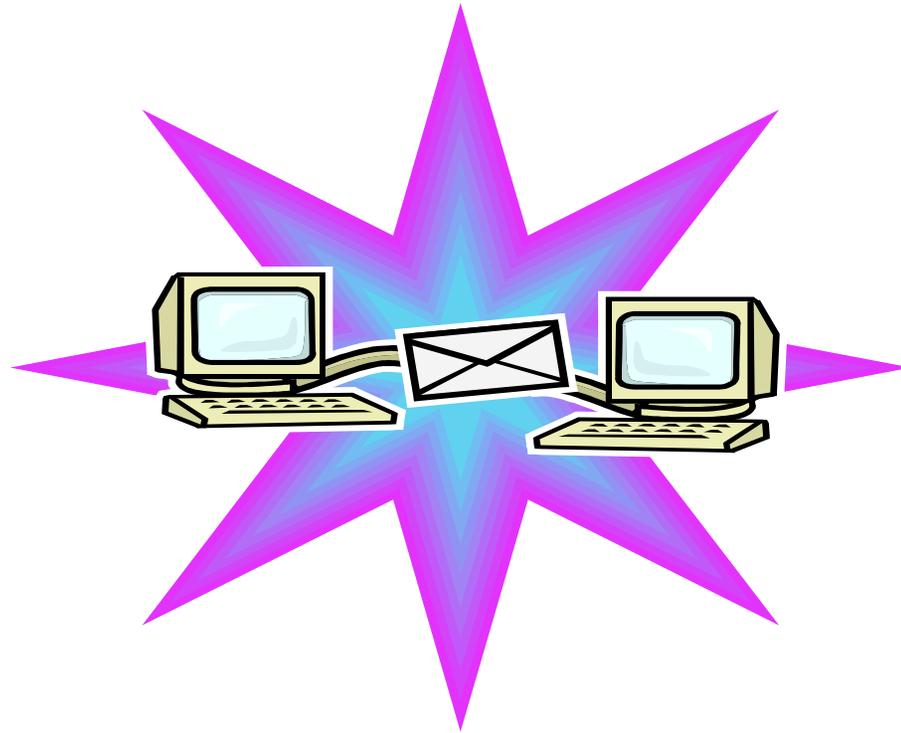

To build one system…
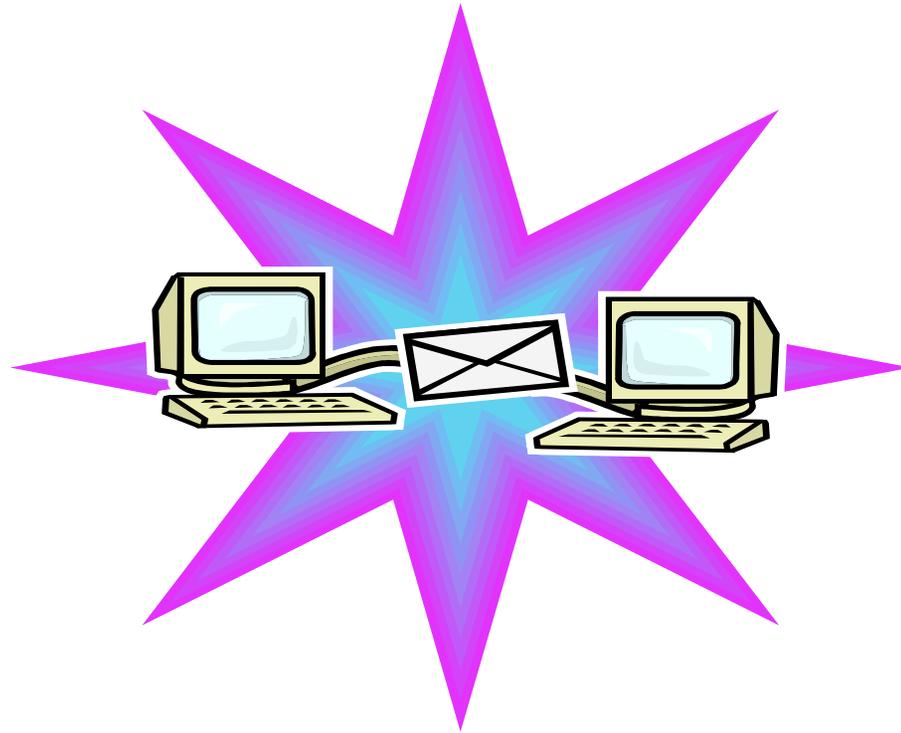

And all will be right with the world…

Not the end.   Next steps

- Standardize Form Letter
- Convert current program for use by all
- USB/eRA takes ownership of program
- System rolled into current Commons Notification System as soon as possible
- That system rolled in to the super eNotification system in future.

Almost the end.

Mike will now explain why this is so important!

(no more cute slides)
