eRA Project Team
"One-View"
January 25, 2005

One-View

❖ One View is an integrated approach to initiate and process all eRA transactions electronically. It consists of three primary parts:

- Single Login for all eRA applications – Including Commons
- Single method for notification of actions/events (i.e. eNotification)
- Single interface to initiate and process a request, regardless of context (within HHS and Grantee Community)

Why One-View

❖ PI/SO/Program Official/Grants Specialist/SRA Require Same View

❖ HHS OpDivs into Commons Difficult until Full Work-Flow deployed

❖ Workflow does not end at SO Submission to NIH (it begins there)

❖ Estimated 10% Error Rate on externally initiated transactions such as eSnap, JIT, and soon Closeout (Fixes require Paper Process)

❖ GM/Program/CGAP/TA/e901/Commons require:
  - **One Login to eRA**
  - **Approval Chains spanning multiple modules**

Demo of One View

Select OneView

One-View 2005 Objectives

- ❖ Single login for eRA (External and Internal)
- ❖ Single login includes eNotification events
  - Email
  - UI Display of Event (Acknowledge/Process)
  - Web Service Through Exchange (Really 2006)
- ❖ Historical record of notification events (probably available in Grant Folder)
- ❖ Standard method for requests and transactions (Internal/External)

Transactions Supported in 2005

- ❖ Administrative Supplement
- ❖ Carryover (of Un-obligated Balances)
- ❖ Change of Dual IC(s)
- ❖ Change of Institution
- ❖ Change of PI
- ❖ Change of Primary IC (901)
- ❖ Change in Scope
- ❖ Change in Status of Key Personnel
- ❖ Closeout Final Invention Statement

- ❖ Closeout Final Progress Report
- ❖ Closeout FSR
- ❖ eCorrection, Full Replacement
- ❖ eCorrection, Addendum
- ❖ eSNAP
- ❖ eSubmission Approval
- ❖ Fellowship Activation
- ❖ JIT
- ❖ Project Extension
- ❖ Retention of Research Grant Funds
- ❖ Other Prior Approvals will have Policy and Instructions

One-View 2006 Goals
(Affecting External Community)

- ❖ Declaration that all requests be done online/electronically
- ❖ HHS OPDIVs fully integrated into Commons
- ❖ Redo Delegation!!!
- ❖ Expand Org Hierarchies/Flexible Permissions in GM/901 and then eRA.
- ❖ Include One View for xTrain through to HHS (i.e. TA)
- ❖ Increase the number of electronic requests supporting all of eRA and fully automate existing ones.

Request for Comments

❖Organizational Hierarchies for Commons
