

OCG Projects and Impact

Legend

caBIG™: cancer Biomedical Informatics Grid
CGAP: Cancer Genome Anatomy Project
CGEMS: Cancer Genetic Markers of Susceptibility
CPTI: Clinical Proteomic Technologies Initiative
EST Generation: Sequencing of cDNA clones to create an expressed sequence tag
GWAS: Genome-Wide Association Studies

HapMap: The International Project is to identify and catalog genetic differences in 280 individuals.
ICG: Initiative for Chemical Genetics
MGC: NIH Mammalian Gene Collection
NBN: National Biospecimen Network
OCG: Office of Cancer Genomics
SAGE: Serial Analysis of Gene Expression

SNP500Cancer: Database of verified single nucleotide polymorphisms (SNPs)
TARGET: Therapeutically Applicable Research to Generate Effective Treatments
TCGA: The Cancer Genome Atlas
XGC: NIH Xenopus Gene Collection
ZGC: NIH Zebrafish Gene Collection
