

GeneSpring Microarray Analysis Software Training Seminar

GeneSpring DNA Microarray Informatics Training Seminar *and FREE 30-day trial*

Agilent Technologies will present a training seminar on GeneSpring GX gene expression software for DNA Microarray analysis. GeneSpring is the leading Microarray analysis tool currently in use, and it has been cited in well over 600 current publications. GeneSpring contains an integrated host of tools for the analysis and visualization of Microarray data. It is compatible with Affymetrix, Agilent, and GE arrays as well as custom Microarrays. GeneSpring runs on Apple computers as well as the Windows platform. All seminar attendees will be eligible for an extended 30-day FREE trial of the GeneSpring software with full technical support for all questions.
