

**Office of the Director  
National Cancer Institute (NCI)**

**Early Detection Research Network (EDRN) – Lessons Learned Teleconference**

**August 6, 2004  
12:00 p.m. – 1:00 p.m. EDT**

***AGENDA***

**Agenda:**

- ***Introduction – Julie Schneider and Steve O’Krepky***
  - Purpose:
    - (1) To present an overview of the Inter-Prostate SPORE Biomarker Study (IPBS) informatics development approach;
    - (2) to learn from the Early Detection Research Network (EDRN) informatics development experience; and
    - (3) to discuss a potential NBN informatics implementation strategy.
  
- ***IPBS Informatics Working Group Activities – Paul Fearn***
  - Summary of current IPBS informatics activities
  - Path forward in developing the IPBS informatics system
  - Objectives and timeline of Prostate SPORE site visits
  - Prostate SPORE Partnerships – partnering stronger institutions with weaker ones
  
- ***EDRN Overview and Recommended Implementation Plan – Dan Crichton***
  - Overview of the EDRN experience: Lessons learned and site visit strategies
  - Implementation of partnerships among participating sites
  - Organization and cataloguing of common data elements
  - Recommendations for NBN implementation
  
- ***Discussion – All Participants***
  
- ***Action Items – Steve O’Krepky***
  
- ***Adjournment – Julie Schneider and Steve O’Krepky***
