1075	
1071	FACTIVE®
1075	(gemifloxacin mesylate) Tablets
1077	(gennioxueni mesynue) rustets
1078	This leaflet summarizes the most important information about FACTIVE. Read the
1079	Patient Information that comes with FACTIVE each time you get a new prescription.
1080	There may be new information. This leaflet does not list all benefits and risks of
1081	treatment and does not take the place of talking with your healthcare provider about your
1082	condition or your treatment.
1082	condition of your doublent.
1084	What is FACTIVE?
1085	FACTIVE is an antibiotic. It is used to treat adults 18 years or older with bronchitis or
1085	pneumonia (lung infections) caused by certain bacteria (germs).
1087	pheumonia (lung micetions) eausea by contain bacteria (germs).
1088	Sometimes, other germs called viruses infect the lungs. The common cold is a virus.
1089	FACTIVE, like other antibiotics, does not treat viruses.
1090	
1091	Who should not take FACTIVE?
1092	 Do not take FACTIVE if you are allergic to any of the ingredients in FACTIVE
1092	or to any antibiotic called a "quinolone". If you develop hives, difficulty
1095	breathing, or other symptoms of a severe allergic reaction, seek emergency treatment
1091	right away. If you develop a skin rash, stop taking FACTIVE and call your
1095	healthcare professional. The ingredients in FACTIVE are listed at the end of this
1090	leaflet. Ask your healthcare provider or pharmacist if you need a list of quinolone
1097	antibiotics.
1099	
1100	FACTIVE may not be right for you. Tell your healthcare provider if you:
1100	 are pregnant, planning to become pregnant, or are breast feeding. The effects of
1101	FACTIVE on unborn children and nursing infants are unknown;
1102	
1103	• or any family members have a rare heart condition known as congenital prolongation of the QTc interval;
1105	 have low potassium or magnesium levels;
1106	 have a slow heart beat called bradycardia;

1105	
1107	• have had a recent heart attack;
1108	 have a history of seizures or epilepsy;
1109	have kidney problems.
1110	
1111	FACTIVE has not been studied in children under the age of 18. Quinolones, such as
1112	FACTIVE may cause joint problems (arthropathy) in children.
1113	
1114	What about other medicines I am taking?
1115	Tell your healthcare provider about all the medicines you take including prescription and
1116	nonprescription medicines, vitamins, and dietary supplements. FACTIVE and other
1117	medicines may affect each other, causing serious side effects. Be sure to tell your
1118	healthcare provider if you take:
1119	
1120	• medicines for your heart rhythm called "antiarrhythmics"
1121	• erythromycin
1122	• medicines for your mental health called "antipsychotics" or "tricyclic
1122	antidepressants"
1124	 medicines called "corticosteroids", taken by mouth or by injection
1125	 medicines called "water pills" (diuretics) such as furosemide and
1125	hydrochlorothiazide;
1120	 medicines to thin your blood (called oral anticoagulants) such as Coumadin[®] or
1127	warfarin.
1120	
1129	
1130	How should I take FACTIVE?
1130	How should I take FACTIVE? • Take 1 FACTIVE tablet a day for 5 or 7 days, exactly as prescribed
1131	• Take 1 FACTIVE tablet a day for 5 or 7 days, exactly as prescribed.
1131 1132	Take 1 FACTIVE tablet a day for 5 or 7 days, exactly as prescribed.Take FACTIVE at the same time each day.
1131 1132 1133	 Take 1 FACTIVE tablet a day for 5 or 7 days, exactly as prescribed. Take FACTIVE at the same time each day. FACTIVE can be taken with or without food.
1131 1132	Take 1 FACTIVE tablet a day for 5 or 7 days, exactly as prescribed.Take FACTIVE at the same time each day.
1131 1132 1133 1134	 Take 1 FACTIVE tablet a day for 5 or 7 days, exactly as prescribed. Take FACTIVE at the same time each day. FACTIVE can be taken with or without food. Swallow the FACTIVE tablet whole, and drink plenty of fluids with it. Do not chew
1131 1132 1133 1134 1135	 Take 1 FACTIVE tablet a day for 5 or 7 days, exactly as prescribed. Take FACTIVE at the same time each day. FACTIVE can be taken with or without food. Swallow the FACTIVE tablet whole, and drink plenty of fluids with it. Do not chew the FACTIVE tablet.
1131 1132 1133 1134 1135 1136 1137 1138	 Take 1 FACTIVE tablet a day for 5 or 7 days, exactly as prescribed. Take FACTIVE at the same time each day. FACTIVE can be taken with or without food. Swallow the FACTIVE tablet whole, and drink plenty of fluids with it. Do not chew the FACTIVE tablet. If you miss a dose of FACTIVE, take it as soon as you remember. Do not take more than 1 dose of FACTIVE in a day. To make sure all bacteria are killed, take all the medicine that was prescribed for you
1131 1132 1133 1134 1135 1136 1137 1138 1139	 Take 1 FACTIVE tablet a day for 5 or 7 days, exactly as prescribed. Take FACTIVE at the same time each day. FACTIVE can be taken with or without food. Swallow the FACTIVE tablet whole, and drink plenty of fluids with it. Do not chew the FACTIVE tablet. If you miss a dose of FACTIVE, take it as soon as you remember. Do not take more than 1 dose of FACTIVE in a day. To make sure all bacteria are killed, take all the medicine that was prescribed for you even if you begin to feel better.
1131 1132 1133 1134 1135 1136 1137 1138 1139 1140	 Take 1 FACTIVE tablet a day for 5 or 7 days, exactly as prescribed. Take FACTIVE at the same time each day. FACTIVE can be taken with or without food. Swallow the FACTIVE tablet whole, and drink plenty of fluids with it. Do not chew the FACTIVE tablet. If you miss a dose of FACTIVE, take it as soon as you remember. Do not take more than 1 dose of FACTIVE in a day. To make sure all bacteria are killed, take all the medicine that was prescribed for you even if you begin to feel better. Call your healthcare provider if your condition does not improve while taking
1131 1132 1133 1134 1135 1136 1137 1138 1139 1140 1141	 Take 1 FACTIVE tablet a day for 5 or 7 days, exactly as prescribed. Take FACTIVE at the same time each day. FACTIVE can be taken with or without food. Swallow the FACTIVE tablet whole, and drink plenty of fluids with it. Do not chew the FACTIVE tablet. If you miss a dose of FACTIVE, take it as soon as you remember. Do not take more than 1 dose of FACTIVE in a day. To make sure all bacteria are killed, take all the medicine that was prescribed for you even if you begin to feel better.
1131 1132 1133 1134 1135 1136 1137 1138 1139 1140 1141 1142	 Take 1 FACTIVE tablet a day for 5 or 7 days, exactly as prescribed. Take FACTIVE at the same time each day. FACTIVE can be taken with or without food. Swallow the FACTIVE tablet whole, and drink plenty of fluids with it. Do not chew the FACTIVE tablet. If you miss a dose of FACTIVE, take it as soon as you remember. Do not take more than 1 dose of FACTIVE in a day. To make sure all bacteria are killed, take all the medicine that was prescribed for you even if you begin to feel better. They may interfere with the absorption of FACTIVE and may prevent it from working properly: antacids that contain magnesium or aluminum ferrous sulfate (iron)

1152	FACTIVE should be taken at least 2 hours before sucralfate.
1153 1154 1155	What are possible side effects of FACTIVE? FACTIVE is generally well tolerated. The most common side effects with FACTIVE
1156 1157 1158	include diarrhea, rash, nausea, headache, vomiting, stomach pain, dizziness, and a change in the way things taste in your mouth.
1159 1160 1161 1162 1163 1164	Rash occurs more commonly in women, especially those on hormone replacement therapy and anyone under 40. The likelihood of getting a rash increases if FACTIVE is taken for longer than 7 days. The rash is usually mild to moderate, but may occasionally be severe. If you get a rash while taking FACTIVE, stop FACTIVE, and call your healthcare provider right away.
1164 1165 1166 1167	FACTIVE and other quinolone antibiotics may cause the following serious side e <mark>ffects:</mark>
1168	• a rare heart problem known as prolongation of the QTc interval. This condition
1169	can cause an abnormal heartbeat and result in sudden death. The chances of this
1170	event are increased in those with a family history of prolonged QT interval, low
1171 1172	potassium (hypokalemia), and who are taking drugs to control heart rhythm, called Class IA (quinidine, procainamide) or Class III (amiodarone, sotalol) antiarrhythmic
1173	agents.
1174	
1175	You should call your healthcare provider right away if you have any symptoms of
1176	 prolongation of the QTc interval including: heart palpitations (a change in the way your heart beats)
1177 1178	 a loss of consciousness (fainting spells)
1178	• a loss of consciousness (fainting spens)
1180	• allergic reactions. Get medical help right away if you develop hives, trouble
1181	breathing, wheezing, or other symptoms of a severe allergic reaction.
1182	
1183	• tendon problems including pain, swelling (tendonitis) or rupture ("tears") of
1184	Achilles, shoulder or hand tendons. The risk for tendon problems is higher if you
1185	are over 65 years old and/or are taking corticosteroids. If you experience pain,
1186	swelling, or rupture of a tendon, you should stop taking FACTIVE, avoid exercise
1187	and strenuous use of the affected area, and call your healthcare provider;
1188	
1189	• diarrhea that usually ends after treatment is a common problem caused by
1190	antibiotics. A more serious form of diarrhea with inflammation of the colon
1191	(pseudomembranous colitis) can occur during or up to 2 months after the use of antibiotics. This has been reported with all antibiotics including with EACTIVE. If
1192	antibiotics. This has been reported with all antibiotics including with FACTIVE. If
1193 1194	you develop a watery and bloody stool with or without stomach cramps and fever, contact your physician as soon as possible.
1194 1195	contact your physician as soon as possible.
1173	

1196	• central nervous system problems including body shakes (tremors), restless feeling,
1197	lightheaded feelings, confusion, and hallucinations (seeing or hearing things that are
1198	not there);
1199	
1200 1201	• dizziness. FACTIVE can make you dizzy. Do not drive or operate heavy machinery until you know how FACTIVE affects you.
1202	
1202 1203 1204 1205	• phototoxicity. FACTIVE may rarely make your skin sunburn more easily. Do not use a sunlamp or tanning bed while taking FACTIVE. Use a sunscreen and wear protective clothing if you must be out in the sun.
	protective clothing if you must be out in the sun.
1206	
1207 1208	These are not all the side effects you may experience with FACTIVE. If you get any side effects that concern you, call your healthcare provider.
1208	encers that concern you, can your nearthcare provider.
1209	How should I store Factive?
1211 1212	• Store FACTIVE at room temperature between 59° and 86° F (15° to 30° C). Protect from light.
1212	 Keep FACTIVE and all medicines out of the reach of children.
1213	• Reep FACIEVE and an medicines out of the reach of children.
	General information about the safe and effective use of FACTIVE:
1215	General miorination about the safe and effective use of FACTIVE:
1216	Madiainan are compatized properties of far conditions other than those described in national
1217	Medicines are sometimes prescribed for conditions other than those described in patient information leaflets. Do not use FACTIVE for a condition for which it was not
1218	
1219	prescribed. Do not give FACTIVE to other people, even if they have the same symptoms
1220	that you have. It may harm them.
1221	
1222	What are the ingredients in FACTIVE?
1223	Active ingredient: gemifloxacin
1224	Inactive ingredients: crospovidone, hydroxypropyl methycellulose, magnesium stearate,
1225	microcrystalline cellulose, polyethylene glycol, povidone, titanium dioxide.
1226	
1227	FACTIVE tablets are white to off-white and imprinted with GE 320 on both sides.
1228	
1229	This leaflet summarizes the most important information about FACTIVE. If you would
1230	like more information, talk with your healthcare provider. You can ask your healthcare
1231	provider or pharmacist for information about FACTIVE that is written for healthcare
1232	professionals. For more information, visit our website at www.factive.com.
