

Keynote
Presented to the Spring Ethics Event IV
West Chester State College
West Chester, Pennsylvania
March 15, 1983

This is a lecture prepared by me to give at this event, but due to a conflict with essential business in Washington the speech was delivered by my Deputy, Dr. Faye G. Abdellah.

This was an annual affair and I addressed this group over several years usually on an update, such as this. Having just given the dinner speech at the "Dining-In" of the Industrial War College at Fort Belvoir, Virginia three days earlier, I included much of the material of that speech in this Public Health Service update and added some remarks for Dr. Abdellah to give in the 3rd person.

What appears here are only those pages of a speech, which were not presented in the Fort Belvoir "Dining-In" speech.

AIDS
Hemophilia
"Baby Doe"
Ethics of government as provider of health science
Ethics of Government as sponsor of Biomedical & behavioral research
Handicapped citizens
Helsinki Declaration (1964)
Hippocratic oath
