MARCH 2003 TAG TABLE CHANGES FOR VOYAGER 2000.1.3

This document summarizes changes to the LC ILS Tag Tables (LCMARC21) made available in March of 2003. The new elements and changes to elements come primarily from Update No. 2 (October 2001) to the MARC 21 Formats for Bibliographic and Authority data. Two major changes in Update No. 2, the definition of a new bibliographic level code "i" for Integrating resources, and revisions to field 260 have been deferred until the bibliographic utilities are in a position to accept the value (no earlier than mid-2003).

Although these data elements are now valid in the LC ILS, not all of them will be actively supplied in LC cataloging (they may occur as "pass through" data elements in records done as copy cataloging).   In general, this document summarizes the subset of newly available data elements from two aspects: 1) those to begin actively supplying; 2) those NOT to supply (those not actively supplied should be considered "pass through"data elements). This summary is relevant to general cataloging (all cataloging for the data elements NOT to supply). Application of newly available data elements relevant to cataloging done in the special format divisions will be determined by staff in those divisions, as will the guidelines for their application.

NOTE: Implementation decisions related to Update No. 3 (October 2002) to the MARC 21 formats are currently under negotiation; new elements/practices from Update No. 3 are **not** to be implemented by LC staff until further notice.

Staff should evaluate any customized templates and/or macros they may have developed to determine if these changes have an impact.

1. BIBLIOGRAPHIC ELEMENTS	Actively Supply?	
	YES	NO
CONTROL FIELDS		
Serial 006 : 006/01 (Frequency)--new value: k Continuously updated	X	
Serial 006 : 006/04 (Type of continuing resource)--new values: d Updating database l Updating loose-leaf w Updating Web site	X X X	
Serial 006 : 006/17 (Entry convention)--new value: 2 Integrated entry	X	
Videorecording 007 : 007/04 (Videorecording format)-- new value: d DVD	X	
VARIABLE FIELDS		
015 - National bibliography number (field now **repeatable**)		X
015 - National bibliography number--new subfield: $2 Source		X

1. BIBLIOGRAPHIC ELEMENTS	Actively Supply?	
	YES	NO
017 - Copyright or legal deposit number– new subfield: $2 Source		X
041 - Language code (field now **repeatable**)		X
041 - Language code--define 2nd indicator position with values: [blank] MARC language code 7 Source specified in $2	X	X
041 - Language code--new subfield: 2 Source of code		X
041 - Language code--change in subfield repeatability; the following are now **repeatable**: $a Language code of text/sound track or separate title $b Language code of summary or abstract, ... $d Language code of sung or spoken text $e Language code of librettos $f Language code of table of contents $g Language code of accompanying materials other than librettos **LC Catalogers**: See also the revised DCM B5.10 (B5 App. 5)	X X X X X X	
043 - Geographic area code--new subfield $c ISO code		X
508 - Creation/production credits note--field now **repeatable**	X	
754 - Added entry--taxonomic identification--new subfields: $c Taxonomic category $d Common or alternative name $x Non-public note $z Public note		X X X X
887 - Non-MARC information field--new field		X
MARC Language Codes--new codes ast Bable ido Ido sma Southern Sami smj Lule Sami smn Inari Sami sms Skolt Sami tup Tupi languages wln Walloon	X X X X X X X X	
MARC Country Codes--new code em East Timor	X	

1. BIBLIOGRAPHIC ELEMENTS	Actively Supply?	
	YES	NO
