Nuclear Materials Committee

This committee was established to study issues that involve nuclear materials (generally uranium and plutonium) that have an impact on present or future SRS activities. Issues include spent nuclear fuel program activities (foreign and domestic), nuclear materials management and nuclear materials integration. The committee addresses the consolidation, storage and disposition issues related to the legacy materials that were once part of the nuclear weapons production cycle that are no longer needed for their original purpose, but are not considered waste.

Topics under consideration for this Committee in 2007 include:

- EM Vision on Plutonium
- Plutonium Storage & Surveillance
- Disposition of Plutonium Not Suitable for MOX
- Spent Fuel Storage and Disposition
- Canyon Utilization
- K-Area Storage & Operation
