2. All permits listed expire by limitation within the 2007 calendar year. The requests for extension of time were received prior to expiration.

3. No significant changes in the location of the work areas or conditions of the permits, except the time limit for completion, have been requested. Copies of the original permits and plans are on file and may be inspected at the Rock Island District Corps of Engineers office, Clock Tower Building, Rock Island, Illinois, between the hours of 7:30 a.m. and 4:00 p.m., Monday through Friday.

4. Based on available information and inspections of the work sites, it is our determination that the authorized work has not significantly affected the quality of the environment. Therefore, environmental impact statements will not be prepared for these projects unless warranted by later developments.

5. The Corps of Engineers is soliciting comments from the public; Federal, state, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny an extension. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Statements should be submitted on or before the expiration date specified at the top of page 1. Statements should bear upon the adequacy of plans and suitability of locations and should, if appropriate, suggest and changes considered desirable.

6. The decision whether to issue each extension of time will be based on an evaluation of the probable impact of the proposed activity on the public interest. The decision will reflect the national concern for both protection and utilization of important resources. The benefit which reasonably may be expected to accrue from the proposal will be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered; among these are conservation, economics, aesthetics, general environmental concerns, historic values, fish and wildlife values, flood damage prevention, land use, navigation, recreation, water supply, water quality, energy needs, safety, food production, and, in general, the needs and welfare of the people. An EXTENSION OF TIME will be granted only if it is found that the action would not be contrary to public interest.

7. All replies to this public notice should be addressed to the District Engineer, US Army Corps of Engineers, Rock Island District, Clock Tower Building, P.O. Box 2004, Rock Island, Illinois 61204-2004, Attention: Regulatory Branch. For additional information, please contact Ms. Sue Apple, 309/794-5376.

Wayne Hannel
Acting Chief, Permit Evaluation Section
Regulatory Branch
