

# Flyway Cities Coalition

*Create wildlife corridors in your city!*

*Many species of wildlife struggle to survive in rapidly developing urban areas. Through the actions of the Flyway Cities Coalition (FCC), wildlife will find pathways of vital habitat through metropolitan areas, helping resident and migratory wildlife to survive and mature.*

## **Invest your time in volunteer projects that make a difference in local flyway communities!**

### **Community Wildlife Habitat Team Leader or Member**

Lead your community to certify as a National Wildlife Federation® Certified Community Wildlife Habitat. Help local residents create habitats that can serve as migratory pathways for wildlife throughout your neighborhood, town, or county. To learn more about how your community can become a Community Wildlife Habitat, go to [www.nwf.org/community](http://www.nwf.org/community).

### **Habitat Steward™ Host or Habitat Steward™**

Train fellow volunteers or serve as community advisors. Help coach them on how to build habitats for wildlife using native plants and sustainable gardening practices.

### **Habitat Ambassador**

Educate others by representing the National Wildlife Federation and your community at festivals, workshops, and other outreach events. Teach individuals about habitat and how they can get involved in helping wildlife survive and thrive locally.

### **Global Warming Ambassador**

Learn how global warming affects both wildlife and people. Teach others about how small changes can make large impacts for wildlife.
