

RESTORING GREENSPACE 2005 NEW ORLEANS

3RD REGIONAL CONFERENCE
~REGION 6~
MAY 17TH-18TH, 2005

Through the collaboration and support from U.S. EPA, federal & state agencies, and WHC members, we work to demonstrate the methodology that state and local governments, industry, and community groups can use ecological enhancements to increase the rate at which contaminated lands, both private and public (state, tribal, local), can be restored for a variety of reuses, including wildlife habitat enhancement as part of restoration designs.

OBJECTIVES FOR RESTORING GREENSPACE 2005~

- ~Promote the value of ecological re-use on contaminated properties
- ~Identify & promote integrated (ecological) approaches to remediation
- ~Promote community involvement/participation in ecological re-use design & site stewardship
- ~Evaluate the economics from natural approaches to remediation with or for the purpose of ecological re-use.
- ~Assess regulatory obstacles to ecological enhancements
- ~Develop approaches for obtaining constructive & meaningful stakeholder involvement
- ~Ensure sound scientific & technical support for ecological re-use practices
