Take a first-hand look at innovative programs, new initiatives and case studies that highlight the incorporation of ecological reuse practices in site restoration in EPA Region 6.

WHC's 2005 program will aim to:

- Identify ecological approaches to clean up and the cost benefits of ecological reuse through case studies;
- Identify performance metrics for success in ecological restoration;
- Assess regulatory obstacles to using ecological enhancements on contaminated properties;
- Evaluate approaches for obtaining constructive & meaningful stakeholder involvement; and
- Establish an EPA Region 6 multi-stakeholder working group to develop an action plan for ecological reuse of contaminated properties.
