██

You are such a great friend. I haven't told anyone but I am
canceling a trip on October 8 so I can come home and start to get the
Chalet back into shape for later in the year.

good morning senator, your house is in the air and hopefully we will have the
framing package down this week. my hold-up at the moment is the footing,
blockwork and the framing package. dick miller came by last night and we went
over to inspect the house and discuss the concrete work, hopefully he can
get started today. please tell catherine that his offer of rock siding is not
much of a deal[$20 per square foot]. i intend to pin him down on the cost of
the garage pad also, we need a four inch thick pad and i want to be sure he
and i are on the same wavelength when he says cheap. i'm kinda like the
jewish shoe store owner who chased the shoe thief for a couple of blocks,
gave up the chase and yelled " run, you bastard, you got 'em for cost
anyway". thanks for calling monday night, sorry i missed your call. i hope
the sound was bad and you don't have a cold, quite a few people here in
girdwood have something very much like the flu. i intend to get a shot as
soon as it is available. well, i'll keep you posted. my best, bob

██
██. i'm off to town
early this morning and will be back early so i can get on the concrete and
rocky line. i kind of torment rocky to keep him concentrating on the chalet
rather than all the projects bill keeps him working on. the skies are clear
in girdwood and we are still running behind on the chalet, i don't want to
waste this good construction weather. ████████████████████████████████
