good evening senator, hope you are well. the house is taking shape, roofs are on, deck is on, windows are in, electrical is done, plumbing is waiting for fixtures. we have to put the window in the master bedroom and we expect to form the insulation in next week, then we can sheetrock the walls, install the doors and start on the kitchen. there is so much that it will take us until the end of november to finish according to rocky. bills are coming in, another \$2200 from redmond, \$15,000 from christianson construction co. (Augie) bill and i went over augies' bill tonight and it looks like an excellent deal. he did not overcharge for anything. bill is a champ for keeping rocky and dave on the job and securing augie's construction company to do the concrete and most of the carpentry. these guys went beyond my level some time back and i just stay out of the way and call chugach and the telephone co and the gas co when needed. hate to spend your money but i think only person who has made a lot of money on us is hannah. that @#\$% and i j him so. take care, bob
