senator: i spoke to bill and rocky this morning, rocky will begin the drawings friday and hopefully will have them for me on monday. i will incorporate the date of august 5th into my gentle harassment speil and hopefully we can have it up with a stairwell by then but it may be impossible, nothing has gone as fast as i would like. we should have a materials list next week and i will get dick started on the foundation as soon as i get the permit. i'm in the process of searching out used drill pipe for the supports for the deck and rocky tells me that we will have to put in a foundation for the carport since we are putting a door on it [catherine does want a door, does'nt she?] we may need it anyhow since we are putting the solarium above it. i'll stay after everyone and get it done as soon as possible, hopefully for you on august 5th. bill said you are going to london, have a great trip. my best, bob
