# Vegetables and Melons Situation and Outlook Yearbook

Gary Lucier and Alberto Jerardo

## Abstract

Total production of vegetables, potatoes, melons, and pulse crops declined 5 percent in 2005. Part of this decline was offset through increased imports and the drawdown of processed vegetable inventories. However, exports also increased in 2005, leaving total domestic vegetable supplies down in 2005. With lower supplies and higher energy costs, retail prices for all fresh and processed fruits and vegetables averaged 4 percent above a year earlier. As a result, per capita disappearance (use) of all vegetables, potatoes, melons, and pulse crops declined 1 percent to 444 pounds (fresh-weight basis). Fresh-market vegetable consumption (including melons, potatoes, sweet potatoes, and mushrooms) totaled about 224 pounds—down 2 percent from a year earlier. Fresh-market per capita use increased for commodities such as tomatoes, spinach, cucumbers, pumpkins, and romaine and leaf lettuce, and declined for broccoli, garlic, sweet corn, iceberg lettuce, and onions. Per capita disappearance of vegetables for processing (including potatoes and mushrooms) declined slightly to about 212 pounds in 2005. The vegetable and melon trade deficit widened in 2005 as the value of imports increased more than the value of vegetable and melon exports. In 2005, about 15 percent of all the vegetables and melons consumed domestically was imported, with 17 percent of fresh-market crops being sourced from other nations, compared with 14 percent a decade earlier.

**Keywords:** Potatoes, tomatoes, onions, lettuce, dry beans, dry peas, lentils, pulses, mushrooms, area, production, consumption, per capita use, prices, exports, imports, trade.

Approved by the World Agricultural Outlook Board. Summary released July 27, 2006. The *Vegetables and Melons Situation and Outlook Yearbook* may be accessed electronically via the ERS website at [www.ers.usda.gov/publications/vgs](http://www.ers.usda.gov/publications/vgs). The bi-monthly *Vegetables and Melons Outlook* newsletter can also be accessed from the above link.

---

## Summary

### *Industry*

- U.S. output of vegetables, melons, potatoes, and pulses declined 5 percent in 2005 as smaller potato and other vegetable crops more than offset increased pulse crop (dry beans, dry peas, lentils) production. Harvested area increased 9 percent to more than 7 million acres due to a 34-percent surge in area devoted to pulse crops.
- According to the Bureau of Labor Statistics, producer prices for vegetables averaged above a year earlier across most major product categories in 2005. Fresh-market vegetables (up 8 percent), canned vegetables (up 3 percent), dehydrated vegetables (up 2 percent), potatoes (up 23 percent), and pulse crops (up 6 percent) were higher, while prices for melons (down 3 percent) were lower.
- In 2005, retail prices for all fruits and vegetables (fresh and processed) averaged 4 percent above the previous year, with most of the increase occurring during the spring and summer. In 2005, consumers paid 4 percent more for both fresh and canned vegetables and 1 percent more for frozen vegetables.
- According to preliminary data, cash receipts for all vegetables, potatoes, melons, pulses, and mushrooms rose 2 percent to \$18.4 billion in 2005, driven in part by larger revenues from the marketing of melons, onions, cucumbers, and tomatoes.
- Imports of all vegetables, melons, and pulse crops rose 7 percent to \$6.7 billion, led by increases for fresh vegetables, melons, pulses, and processed vegetables. Mexico remained the top foreign source with 47 percent of import value, followed by Canada (25 percent) and China (5 percent). Imports accounted for 15 percent of all vegetable, melon, and pulse crop disappearance in 2005, up from 9 percent a decade earlier.
- Exports of all vegetables, melons, and pulse crops rose 11 percent to \$3.9 billion, led by increases for melons, pulse crops, and fresh vegetables. Canada remained the top foreign market with 47 percent of export value, followed by Mexico (14 percent) and Japan (13 percent). About 8 percent of total U.S. vegetable and melon supplies were exported in 2005—little changed from a decade earlier.
- In 2005, per capita disappearance of all vegetable, melon, and pulse crops fell 1 percent to 444 pounds (farm-weight basis). Potatoes remained the most popular vegetable crop in the United States (29 percent of total use), followed by tomatoes (21 percent) and all lettuce (7 percent).

### *Fresh-market Vegetables*

- Production of the 21 major fresh vegetables declined 3 percent in 2005. Much of the reduction resulted from lower dry bulb onion acreage—a response to lower prices stemming from the record-large crop of 2004. Output was also trimmed by weather-reduced yields for bell peppers, garlic, snap beans, and head lettuce.
- The farm value of production for fresh vegetables edged up 1 percent to \$9.8 billion in 2005 as higher average prices outweighed reduced marketings. Tomatoes were the top fresh-market crop in terms of farm value (\$1.6 billion), followed by head lettuce (\$991 million) and dry bulb onions (\$905 million).
- Fresh-market vegetable farm value dropped 12 percent in California to \$4.6 billion as farm prices and value declined for crops such as broccoli, tomatoes, asparagus, and artichokes. California accounted for 47 percent of the national

value of fresh-market vegetables, compared with 55 percent a year earlier.

Production of fresh vegetables generated \$1.5 billion in crop values in Florida—up 34 percent from 2004 as higher average prices outweighed reduced output.

- The producer price index for fresh-market vegetables increased 8 percent in 2005 as higher prices for crops such as peppers, squash, cucumbers, and cabbage outweighed lower average prices for tomatoes, broccoli, cauliflower, and eggplant.
- Retail prices for fresh vegetables increased 4 percent in 2005 led by 7 percent higher prices for both potatoes and lettuce. Given little change in grower prices for all lettuce (19.3 cents per pound in 2005 versus 19.4 cents in 2004), higher retail prices likely reflected sharply higher costs of transporting lettuce from California and Arizona, where 99 percent of the crop is grown.
- Imports of fresh-market vegetables (excluding potatoes and melons) increased 6 percent to \$3.4 billion in 2005. Mexico accounted for 67 percent of import value, down from 78 percent a decade earlier. With strong U.S. demand for high-value greenhouse vegetables (largely tomatoes, peppers, and cucumbers), Canada has increased its share of the U.S. fresh vegetable import market and now accounts for 19 percent of fresh vegetable imports, compared with 7 percent a decade earlier.
- The value of fresh-market vegetable exports (excluding potatoes and melons) increased 8 percent to \$1.4 billion in 2005. Export concentration has increased over the past decade, with Canada now accounting for 79 percent of U.S. fresh vegetable export value--up from 67 percent a decade earlier. Japan accounted for 7 percent of the value of U.S. fresh vegetable exports in 2005, down from 17 percent 10 years earlier.
- On a per-person basis, consumption of fresh-market vegetables (excluding melons, potatoes, sweet potatoes, pulses, and mushrooms) fell about 1 percent to 148 pounds. Per capita use increased for such crops as spinach, asparagus, squash, pumpkins, and romaine and leaf lettuce and dropped for garlic, bell peppers, snap beans, and onions.

### ***Processing Vegetables***

- Production of the major vegetables used for processing declined 11 percent to 15.8 million short tons in 2005 led by a 17-percent drop in tomato output. All major processing crops registered reduced output with the exception of sweet corn and broccoli/cauliflower. Production of sweet corn used for canned products increased 17 percent due to record-high yields and larger acreage (up 9 percent). Sweet corn yields were strong in several States last year, including record highs in Minnesota and Oregon and near records in Washington and Wisconsin. Unlike sweet corn, weather conditions were not as favorable for tomatoes, snap beans, and green peas, as each experienced reduced yields in 2005.
- Largely because of the smaller tomato crop in 2005, the value of production for processing vegetables declined 10 percent to \$1.3 billion. The value of the processing-tomato crop fell 14 percent to \$622 million as a 17-percent smaller crop outweighed a 4-percent gain in the average f.o.b. plant door price.
- Producer prices for processed vegetables rose 3 percent in 2005 driven largely by a 4-percent increase in wholesale canned vegetable prices. With inventories declining, prices for canned and dehydrated vegetables increased, while the presence of adequate stocks in cold storage warehouses held the gain in frozen vegetable prices to 1 percent in 2005.

- Consumer prices for processed fruits and vegetables rose 3 percent in 2005—the largest year-over-year increase since 2002. Retail prices for canned vegetables increased 4 percent due to higher prices for such canned items as sweet corn, snap beans, and beets.
- The value of processed vegetable (including potatoes) imports rose 3 percent in 2005 to \$2.3 billion. The top foreign sources remained Canada (34 percent of the total), Mexico (21 percent), and China (9 percent). Imports of canned vegetables (excluding potatoes and mushrooms) increased 9 percent to \$766 million, led by tomato products, which increased 7 percent to \$138 million.
- Exports of processed vegetables (including potatoes) rose 4 percent to \$1.9 billion. The top destinations remained Canada (26 percent of the total), Mexico (21 percent), and Japan (20 percent). Frozen exports, which are dominated by potatoes, rose 12 percent in 2005 to \$604 million. Shipments of frozen vegetables to Japan, the top market, accounted for 39 percent of the total—down from 51 percent a decade earlier. While U.S. frozen vegetable exports to Japan have eroded, volume has increased sharply to Canada (16 percent of 2005 total) and Mexico (13 percent of the 2005 total compared with 4 percent in 1996).
- Per capita use of processing vegetables (excluding potatoes, sweet potatoes, and mushrooms) increased 2 percent to 125 pounds in 2005, as a 3-percent increase in use of canning vegetables outweighed a small decline in use of vegetables for freezing and dehydrating.

### *Melons*

- Production of the top three melon crops (watermelon, cantaloup, and honeydew) rose 1 percent in 2005 due to larger watermelon and cantaloup crops. Harvested area for melon crops was down 2 percent to 246,760 acres, with the entire decline due to lower honeydew melon area.
- The value of melon production rose 7 percent in 2005 to \$780 million on the strength of higher watermelon prices. The value of the watermelon crop rose 31 percent to a record-high \$410 million. Meanwhile, the value of the cantaloupe (down 7 percent) and honeydew melon (down 25 percent) crops each declined.
- According to BLS, producer prices for melons dropped 3 percent in 2005 with most all of the downward price pressure coming from the honeydew and cantaloup markets. Despite a 3-percent larger crop, watermelon grower prices jumped 27 percent to a record-high 10.8 cents per pound, as demand was strong in 2005.
- The value of melon imports rose 10 percent to a record \$310 million in 2005. Mexico accounted for 47 percent of U.S. melon imports in 2005, with watermelon accounting for the majority of shipments. Guatemala (22 percent) and Costa Rica (17 percent) remained the next largest foreign melon suppliers to the United States, with cantaloup accounting for the majority of melon shipments from these two nations.
- Exports of melons jumped 20 percent to a record \$120 million in 2005, with watermelon accounting for half of the total. Canada (88 percent of export value) and Mexico (4 percent) remained the two top foreign markets for U.S. melons. Despite a reduction in export volume, the value of watermelon exports rose 25 percent due to a 51-percent increase in average export unit value—reflecting higher domestic prices for watermelon. The 17.3-cents-per-pound average export value was the highest for watermelon since 1991.
- Estimated disappearance of all melons totaled 7.7 billion pounds in 2005—the first year-over-year increase since 2001. On a per capita basis, consumption of

melons increased 3 percent from a year earlier to 25.9 pounds, driven largely by a 7-percent gain in watermelon use.

### **Potatoes**

- U.S. potato production declined 7 percent to 422 million hundredweight (cwt) in 2005. Area harvested was also down 7 percent, while average yields were down 1 percent. Idaho (27 percent of output), Washington (23 percent), and Wisconsin (7 percent) were the top producing States in 2005. Following several years of poor returns, the industry collectively agreed to reduce acreage in 2005 to allow supply to more closely match demand and provide support to prices.
- The value of U.S. potato production rose 13 percent to \$2.9 billion in 2005—the highest since 2002. Gross revenue increased across most potato States, reversing 2 years of disappointing returns. Production value increased in each of the top three producing States, Idaho (up 11 percent), Washington (up 16 percent), and Wisconsin (up 20 percent).
- The season-average farm price for potatoes for all uses rose 22 percent to \$6.90 per hundredweight (equal to 69 cents per pound). With supplies lower, fresh-market (tablestock) potato prices averaged about a fourth higher than a year earlier, while prices for processing potatoes edged slightly higher.
- Retail prices for fresh white potatoes rose 4 percent to 47.1 cents per pound, the highest since 2002. Most of the impact on retail prices from the smaller 2005 crop occurred after the fall harvest and into mid-2006. Retail prices for potato chips fell 1 percent to \$3.37 per pound in 2005—the second consecutive annual decline.
- Imports of potatoes and potato products declined 1 percent to \$787 million in 2005. Canada remained the top foreign source, supplying 82 percent of U.S. potato and potato product imports, followed distantly by Mexico (9 percent) and the Netherlands (3 percent). Frozen french fried potatoes accounted for 60 percent of all U.S. potato imports in 2005, with the vast majority entering from Canada.
- In 2005, U.S. fresh and processed potato and potato product exports rose 13 percent to a record \$835 million. Major markets were Japan (27 percent of the total), Canada (21 percent), and Mexico (18 percent). The value of fresh potato exports (excluding seed) recovered from the previous year's low to rise 54 percent to \$102 million. Exports of frozen french fried potatoes, the top potato export, reached record highs in terms of both volume and value, with export value rising 12 percent to \$407 million.
- According to preliminary data, per capita disappearance of potatoes declined 4 percent in calendar 2005 to 129 pounds, with both fresh-market and processing potatoes registering declines. Despite the reduction in potato disappearance last year caused by a smaller crop and higher prices, the crop easily remains the most popular vegetable in the United States.

### **Sweet potatoes**

- U.S. sweet potato production declined 2 percent to 15.7 million cwt in 2005. Average yields increased 2 percent to a record 178 cwt per acre. Area harvested fell 5 percent to 88,400 acres, with most of the reduction in North Carolina (down 19 percent), the top producing State, where growers were reacting to low prices for the previous year's crop.
- The estimated value of the U.S. sweet potato crop was relatively unchanged in 2005 at \$283 million, as higher average prices about offset the smaller crop.

Crop value in California, the second-leading producing State and the leader in sweet potato crop value, rose 10 percent to about \$89 million.

- The estimated season-average price for sweet potatoes rose 3 percent to 18 cents per pound. This was also 6 percent below the 2003 record high of 19.2 cents. Reflecting such factors as relative production costs, New Jersey growers again received the strongest prices (26.8 cents per pound), while Texas growers received the lowest prices (11.3 cents per pound).
- The value of U.S. fresh and frozen sweet potato imports rose 24 percent to \$4.4 million. The Dominican Republic remained the largest foreign source of fresh and frozen sweet potatoes, with 86 percent of the 2005 U.S. import market.
- Exports of U.S. sweet potatoes declined for the first time since 2000, with the value of exports dropping 22 percent to \$24 million. Most of the decline was the result of volume shipped to Canada returning to trend following a surge in 2004. Canada and the United Kingdom remained the two top foreign markets for U.S. sweet potatoes, with 69 and 23 percent of export value, respectively.
- Because of the smaller crop, higher prices, and stronger export demand, domestic disappearance of sweet potatoes for all uses declined 2 percent in 2005 to 4.5 pounds per person. Total disappearance fell 1 percent to about 1.3 billion pounds.

### ***Dry Edible Beans***

- U.S. dry edible bean production jumped 53 percent to 27.2 million cwt in 2005 as both area and yield rose. Area harvested increased 28 percent to 1.56 million acres, while average yield per acre, recovering from freeze-reduced 2004 yields, surged 19 percent higher to 17.4 cwt. North Dakota remained the top producer with 32 percent of the 2005 dry bean crop.
- Pinto beans remained the leading dry bean class in 2005, accounting for 48 percent of the U.S. dry bean crop. North Dakota produced half of the pinto crop, followed by Nebraska (15 percent) and Colorado (13 percent).
- Larger production outweighed a 28-percent reduction in the season-average price (estimated to be \$18.40/cwt) to raise the value of the U.S. dry bean crop 16 percent to \$526 million in 2005. The value of the North Dakota dry bean crop was estimated to be \$136 million—26 percent of the U.S. crop value and 15 percent greater than a year earlier.
- Grower prices for dry beans declined in 2005, led by falling average prices for pinto beans (down about 51 percent) and navy beans (down about 23 percent). Reflecting the types of beans produced and relative production costs, grower prices averaged the lowest in North Dakota at \$15.80 per cwt and highest in California at \$40.40 per cwt.
- Because of the short 2004 dry bean crop, the U.S. import value for dry edible beans increased 28 percent to \$83 million in 2005. Mexico accounted for 29 percent of U.S. dry bean imports followed by Canada (25 percent) and China (16 percent). In 2005, imports accounted for 12 percent of dry bean consumption, up from 4 percent a decade earlier.
- In 2005, about 16 percent of U.S. dry bean supplies were exported compared with 18 percent a decade earlier. The value of dry bean exports rose 8 percent to \$157 million in 2005. Mexico (25 percent), the United Kingdom (11 percent), and the Dominican Republic (8 percent) were the top foreign destinations. Pinto beans (\$44 million), navy beans (\$25 million), and black beans (\$17 million) were the top three bean classes exported in 2005.
- Per capita disappearance of dry beans increased 5 percent in 2005 to 6.3 pounds—reversing a string of five consecutive annual declines in dry bean

consumption. White beans (e.g., navy, Great Northern, baby lima) accounted for just 18 percent of all dry beans used domestically, down from 31 percent a decade earlier. Meanwhile, nonwhite beans (e.g., pinto, dark red kidney, black) continue to wrest market share from the white bean classes, led by pinto and black beans. Per capita use of pinto beans totaled 2.8 pounds, up slightly from a year ago but 1 pound below the peak consumption reached in 1992.

### ***Dry Peas and Lentils***

- Production of dry peas (including wrinkled seed peas) and lentils increased 20 percent to a record 20.2 million cwt in 2005. Output of all dry peas increased 19 percent while lentil production increased 23 percent—both reaching record highs. With the exception of Austrian winter peas, per-acre yields were down from the relatively strong levels of the previous year, especially in the Pacific Northwest where growing conditions were less favorable than a year earlier. Largely reflecting increased seeded area, harvested area was up 48 percent for dry peas (including Austrian winter peas) and 33 percent for lentils.
- Based on preliminary estimates of season average prices, the value of all U.S. dry pea and lentil production (including small chickpeas) totaled \$139 million in 2005/06—down 3 percent from the record high of 2004/05. Within this total, lentils were valued at \$59 million (down 3 percent), with reduced crop value in Washington and Idaho and record-high production value in North Dakota and Montana, where crop output was much greater than a year earlier.
- With a record-large crop, the preliminary estimate of the 2005/06 season-average grower price for all dry peas declined 23 percent from a year earlier to \$4.60 per cwt. Season-average lentil prices declined 19 percent to \$11.70/cwt in 2005/06—compared with an average of \$15.80/cwt over the previous 2 years.
- The value of dry pea and lentil imports rose 7 percent to \$30 million. Canada (28 percent of the total), India (20 percent), and New Zealand (16 percent) were the top suppliers in 2005. Chickpeas (22 percent of the total), green peas (21 percent), and split peas (15 percent) were the top import classes in 2005.
- In 2005, the value of dry pea and lentil exports surged 54 percent above a year earlier to \$145 million due in part to a 23-percent reduction in average unit import values. Spain (15 percent of the total), Ethiopia (15 percent), and Canada (10 percent) were the top foreign destinations for U.S. dry peas and lentils in 2005. Lentils (42 percent of the total), whole green peas (21 percent), and yellow peas (15 percent) were the top product export classes.
- Per capita use of dry peas (excluding chickpeas) and lentils for domestic human food is estimated at 0.7 pound, about the same as the previous year. Export demand and other uses (e.g., livestock feed) each exceed estimated domestic food use.

### ***Mushrooms***

- In 2004/05, total U.S. mushroom sales volume was virtually unchanged (down less than 1 percent) at 853 million pounds as a 2-percent drop in growing area was nearly offset by a 2-percent gain in yield per square foot. Fresh sales volume fell 1 percent to 696 million pounds but accounted for 83 percent of all agaricus sales. On the processing side, agaricus volume rose 3 percent—just the second increase in the past 10 years.
- The sales volume of specialty mushrooms (excluding brown agaricus), most of which are sold in the fresh market, rose 13 percent to 15 million pounds. Shiitake and oyster mushroom sales each increased. The volume of brown

agaricus mushroom sales (including Portabello and Crimini varieties) increased 4 percent to 100.5 million pounds in 2004/05.

- The value of the 2004/05 mushroom crop was estimated to be down 1 percent to \$908 million, largely reflecting lower processing mushroom prices. Growers in Pennsylvania account for nearly half of mushroom crop value.
- The season average price for fresh-market mushrooms remained steady at \$1.14 per pound, while the unit value for processing mushrooms dropped 13 percent to 46.3 cents per pound—the lowest nominal dollar price since 1974.
- During the 2004/05 crop year, the value of U.S. mushroom and mushroom product imports declined 5 percent to \$213 million. Canada (32 percent of the total), China (29 percent), and Indonesia (11 percent) were the leading foreign suppliers. The value of canned mushroom imports declined 14 percent to \$106 million, with China (39 percent of the total), Indonesia (23 percent), and India (15 percent) the top sources.
- About 32 percent of all mushrooms used in the United States were imported in 2004/05, with substantially different situations in the fresh and processing markets. In the fresh market, 8 percent of mushroom consumption was satisfied through imports, while 71 percent of mushrooms consumed in processed form were imported.
- The value of U.S. mushroom and mushroom products exports fell 24 percent to \$24 million. Exports the previous year were unusually high due to strong dried mushroom shipments to South Korea and Hong Kong—rarely substantial markets for U.S. mushroom products. Exports to Canada, the destination for 44 percent of U.S. mushroom exports, increased 12 percent in 2004/05.
- In 2004/05, per capita use of all mushrooms remained steady at 4.14 pounds. Fresh-market use per person fell 1 percent to 2.59 pounds, while use of mushrooms for processing rose 3 percent to 1.55 pounds per person.

## Glossary of Specialized Terms

**Arrivals:** Quantity of produce received by wholesalers and chain stores in selected cities, as shipped from major production areas.

**Carryover stocks:** The quantity of product remaining in storage at the end of the crop year.

**Cash receipts:** The value of commodity marketings during the calendar year, irrespective of the year of production. For program crops, also includes net CCC loans (there are none for vegetables or potatoes).

**C.I.F. value:** (Cost, insurance, and freight). Terms of sale whereby the seller's (exporter) price includes the cost of the goods being sold and all transportation charges, including insurance expenses, to the destination point (importer).

**Cold storage:** The quantity of product in refrigerated warehouses at a given point in time.

**Constant 2000 dollars:** Expression of value in terms of purchasing power in the year 2000. Frequently referred to as deflated or real dollars.

**Contract acreage:** Area planted by agreement between processors and growers, generally at an agreed price and conditions, including quality.

**Customs Import Value:** Represents a value in the foreign country and therefore excludes U.S. import duties, freight, insurance, and other charges incurred in bringing the merchandise to the United States. This valuation is primarily used for collection of import duties and frequently does not reflect the actual transaction values (see C.I.F. value).

**Cwt:** Abbreviation for hundredweight, a unit of measure equal to 100 pounds.

**Dual-purpose vegetables:** Commodities that may be sold in fresh or processing markets. Dual commodities include asparagus, broccoli, cauliflower, celery, chile peppers, and bell peppers.

**Dumping:** The sale of a commodity in a foreign market at less than fair market value.

**Fall season:** Production period which mainly spans October to December.

**Farm weight:** The raw or unprocessed weight of a product in fresh form prior to any processing; also called fresh-weight, field-run, or orchard-run.

**F.A.S. (free alongside ship) value:** A price quotation that includes all costs of transportation and delivery of the goods to the dock alongside the ship (or other means of transport).

**F.o.b. (free on board) shipping-point price:** A price quotation that includes a loading charge at the shipping point but no further transport cost. In this publication, f.o.b. is the average, unweighted unit price received by the shipper or grower-shipper primarily for sales in carload or truckload quantities, but also including mixed loads.

**Fresh-cut vegetables (fresh-processed):** Fresh-market vegetables that have been trimmed, peeled, or cut (but not heated) into a completely usable fresh product, which is marketed in a prepackaged form. Examples include bagged salads, baby peeled carrots, and broccoli florets. In terms of the data in this report, these products are still considered fresh-market commodities.

**Fresh-market vegetables:** Sold primarily as fresh; includes artichokes, asparagus, green lima beans, snap beans, broccoli, brussels sprouts, cabbage, cantaloupes, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole and endive, garlic, radishes, honeydews, lettuce, onions, bell peppers, spinach, tomatoes, and watermelons. Includes fresh-cut products such as baby carrots, baby spinach, and bagged salads.

**Grower-packer return:** Price received by the grower-packer.

**Marketing spread:** The difference between the retail price and the grower-packer return.

**Pack:** The quantity of fresh or processed product placed in containers (e.g., cans). Generally refers to the output of a processing industry (e.g., frozen pack of broccoli).

**Pay weight:** The weight of useable product delivered to the processing plant and paid for at the rates specified by contract.

**Per capita use:** A measure of commodity disappearance on a per-person basis. Equal to total supply (production plus imports plus beginning stocks) less uses (exports, shrink and loss, seed use, ending stocks) divided by total U.S. population (including military).

**Processing vegetables:** Commodities sold primarily to processors; include (but not limited to) green lima beans, snap beans, beets, cabbage, sweet corn, cucumbers, chile peppers, green peas, spinach, and tomatoes.

**Product weight:** The weight of a product in its final packaged form. For example, the weight of the contents of a can of tomato paste.

**Pulses:** A term used collectively for dry edible beans, dry edible peas, Austrian winter peas, and lentils.

**Season-average price:** Average price received by the grower-packer (grower-shipper), weighted by quantity marketed.

**Shipments:** Quantity of produce marketed from major production areas.

**Short ton:** A unit of measure equal to 2,000 pounds. A metric ton is equal to 1,000 kilograms or 2,204.62 pounds.

**Specialties:** A term for commodities (limited here to vegetables) not generally considered to be mainstream. Examples include jicama, dasheen, and cassava. May also include "minor vegetables," such as okra, chile peppers, pumpkins, and tropical vegetables.

**Spring season:** Production period which mainly spans April to June.

**Summer season:** Production period which mainly spans July to September.

**Value of production:** The value of commodities produced during the crop year. Calculated as production times marketing year average price. May be equal to cash receipts when the crop year for a vegetable runs from January through December.

**Winter season:** Production period which mainly spans January to March.

## Selected Conversion Factors

### General factors:

1 hundredweight (cwt) = 100 pounds  
1 cwt = 0.04536 metric tons  
1 ton = 2,000 pounds  
1 short ton = 1 ton (2,000 pounds)  
1 kilogram = 2.204622 pounds  
1 metric ton = 1,000 kilograms  
1 metric ton = 1.102311 short tons  
1 metric ton = 2,204.622 pounds  
1 hectoliter = 26.41721 gallons  
1 short ton per acre = 0.4467 times 1 metric ton per hectare  
1 cwt per acre = 1 hectogram per hectare divided by 1,120.953  
1 hectare = 2.471 acres  
1 acre = 43,560 square feet  
1 square mile = 640 acres

Cents per pound = Dollars per cwt divided by 100.

### Selected farm-retail weight equivalents:

1 pound iceberg lettuce on farm = 0.97 pound whole unwrapped  
1 pound iceberg lettuce on farm = 0.95 pound whole wrapped  
1 pound iceberg lettuce on farm = 0.76 pound chopped lettuce  
1 pound iceberg lettuce on farm = 0.68 pound shredded lettuce

1 pound cabbage on farm = 0.95 pounds whole unwrapped  
1 pound cabbage on farm = 0.75 pounds shredded cabbage

1 pound broccoli on farm = 0.95 pound whole  
1 pound broccoli on farm = 0.77 pound broccoli crowns  
1 pound broccoli on farm = 0.55 pound broccoli florets

1 pound spinach on farm = 0.86 pound triple-washed bagged (over 3.5 inches)  
1 pound spinach on farm = 0.70 pound frozen spinach

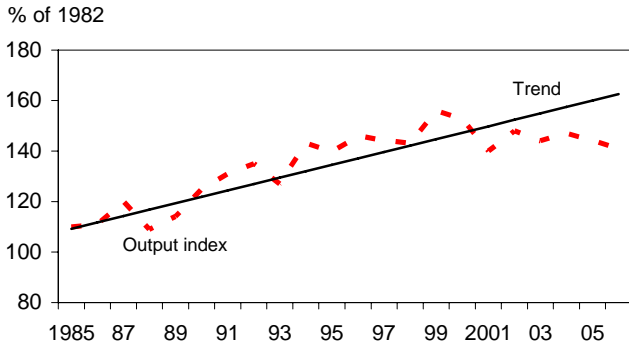

1 pound tomatoes on farm = 0.875 pound fresh whole tomatoes at retail  
1 pound tomatoes on farm = 0.16 pound tomato paste  
1 pound tomatoes on farm = 0.57 pound canned whole tomatoes  
1 pound tomatoes on farm = 0.06 pound whole dried tomatoes

1 pound garlic on farm = 0.37 pound dry bulb garlic  
1 pound fresh (wet) chile peppers on farm = 0.125 pound dry-weight

1 pound potatoes on farm = 0.8 pound fresh whole potatoes at retail  
1 pound potatoes on farm = 0.70 pound fresh-cut refrigerated potatoes  
1 pound potatoes on farm = 0.75 pound frozen mashed potatoes  
1 pound potatoes on farm = 0.53 pound frozen french fries  
1 pound potatoes on farm = 0.23 pound potato chips  
1 pound potatoes on farm = 0.20 pound dehydrated potatoes

# Vegetables at a Glance

## List of Tables

### *Industry*

1. U.S. per capita use of selected, commercially produced, fresh, and processing vegetables and melons, 1973-2006.....	12
2. Vegetables: U.S. cash receipts, 1979-2005 .....	15
3. U.S. vegetable and melon industry: Total area harvested and production 1992-2005.....	16

### *Fresh Vegetables*

4. Vegetables, fresh market: Selected shipments, 1992-2005.....	17
5. Vegetables, fresh market: Harvested acreage of major vegetables, 1979-2005.....	18
6. Vegetables, fresh market: Production of major vegetables, 1979-2005.....	19
7. Vegetables, fresh market: Value of production of major vegetables, 1979-2005.....	20
8. Fresh-market production of selected vegetables for selected States, 1990-2005.....	21
9. Vegetables, fresh market: U.S. monthly and annual producer price index, 1979-2006.....	22
10. Vegetables, fresh market, including potatoes: U.S. monthly and annual Consumer Price Index, 1979-2006.....	23
11. Vegetables, fresh-market: U.S. imports of major vegetables, 1979-2005.....	24
12. Selected fresh vegetables: U.S. import value from selected countries and the world, 2000-2005.....	25
13. Vegetables, commercial: U.S. monthly and annual average shipping-point price index, 1979-2006.....	27
14. Vegetables, fresh market: Selected U.S. monthly and annual imports, 1979-2006.....	28
15. Vegetables, fresh market: Share of consumption derived from imports, 1980-2006.....	29
16. Vegetables, fresh market: U.S. per capita utilization, 1979-2006.....	30
17. Vegetables, fresh market: Selected U.S. exports, 1979-2005.....	31
18. Selected fresh vegetables: U.S. export value to selected countries and the world, 1999-2005.....	32
19. Vegetables, fresh market: Share of supply exported, 1980-2006.....	34
20. Vegetables, fresh market: Selected U.S. monthly and annual exports, 1979-2006.....	35
21. Asparagus, fresh market: U.S. monthly and annual imports, 1979-2006 .....	36
22. Asparagus, fresh market: U.S. monthly and season-average f.o.b. shipping-point price, 1979-2006.....	37
23. Broccoli, fresh market: U.S. monthly and season-average f.o.b. shipping-point price, 1979-2006.....	38
24. Broccoli, fresh market: U.S. monthly and annual imports, 1989-2006..	39
25. Cantaloup, fresh market: U.S. monthly and season-average f.o.b. shipping-point price, 1995-2006.....	40
26. Cantaloup: U.S. monthly and annual imports, 1989-2006.....	41

27. Carrots, fresh market: U.S. monthly and season-average f.o.b. shipping-point price, 1979-2006.....	42
28. Carrots: U.S. monthly and annual imports, 1989-2006.....	43
29. Cauliflower, fresh market: U.S. monthly and season-average f.o.b. shipping-point price, 1979-2006.....	44
30. Cauliflower: U.S. monthly and annual imports, 1989-2006.....	45
31. Celery, fresh market: U.S. monthly and season-average f.o.b. shipping-point price, 1979-2006.....	46
32. Celery: U.S. monthly and annual imports, 1989-2006.....	47
33. Cucumbers, fresh market: U.S. monthly and season-average f.o.b. shipping-point price, 1996-2006.....	48
34. Cucumbers: U.S. monthly and annual imports, 1989-2006.....	49
35. Honeydew melons: U.S. monthly and season-average f.o.b. shipping-point price, 1979-2005.....	50
36. Head lettuce, fresh market: U.S. monthly and season-average f.o.b. shipping-point price, 1979-2006.....	51
37. Lettuce, iceberg, fresh market: U.S. monthly and annual retail price, 1979-2006.....	52
38. Lettuce, fresh market: U.S. monthly and annual retail price index, 1979-2006.....	53
39. Lettuce, fresh market: U.S. monthly and annual imports, 1979-2006.....	54
40. Lettuce: U.S. monthly and annual exports, 1990-2006.....	55
41. Onions, fresh market: U.S. monthly and season-average f.o.b. shipping-point price, 1979-2006.....	56
42. Onions, fresh market: U.S. monthly and annual imports, 1979-2006.....	57
43. Onions, fresh dry bulb: U.S. monthly and annual exports, 1990-2006..	58
44. Snap beans, fresh market: U.S. monthly and season-average f.o.b. shipping-point price, 1996-2006. ....	59
45. Snap beans: U.S. monthly and annual imports, 1989-2006.....	60
46. Sweet corn, fresh market: U.S. monthly and season-average f.o.b. shipping-point price, 1979-2006.....	61
47. Tomatoes, fresh market: U.S. monthly and season-average f.o.b. shipping-point price, 1979-2006.....	62
48. Tomatoes, field-grown, fresh market: U.S. monthly and annual, retail price, 1979-2006.....	63
49. Tomatoes, fresh market: U.S. monthly and annual retail price index, 1979-2006.....	64
50. Tomatoes, fresh market: U.S. monthly and annual imports, 1979-2006.....	65
51. Tomatoes, all, fresh-market: U.S. monthly and annual exports, 1990-2006.....	66
52. Melons, fresh market: U.S. monthly and annual imports, 1979-2006...	67

***Fresh and Processing Supply and Use***

53. U.S. fresh tomatoes (field and hothouse): Supply, utilization, and price, farm weight, 1979-2006.....	68
54. U.S. fresh bell peppers: Supply, utilization, and price, farm weight, 1979-2006 .....	69

55. U.S. fresh head lettuce: Supply, utilization, and price, farm weight, 1979-2006.....	70
56. U.S. leaf and romaine lettuce: Supply, utilization, and price, farm weight, 1990-2006.....	71
57. U.S. fresh onions: Supply, utilization, and price, farm weight, 1979-2006.....	72
58. U.S. fresh sweet corn: Supply, utilization, and price, farm weight, 1979-2006.....	73
59. U.S. fresh carrots: Supply, utilization, and price, farm weight, 1979-2006.....	74
60. U.S. fresh broccoli: Supply, utilization, and price, farm weight, 1979-2006.....	75
61. U.S. fresh cauliflower: Supply, utilization, and price, farm weight, 1979-2006.....	76
62. U.S. fresh asparagus: Supply, utilization, and price, farm weight, 1979-2006.....	77
63. U.S. fresh celery: Supply, utilization, and price, farm weight, 1979-2006.....	78
64. U.S. fresh cucumbers: Supply, utilization, and price, farm weight, 1979-2006.....	79
65. U.S. cabbage: Supply, utilization, and price, farm weight, 1979-2006.....	80
66. U.S. artichokes, all uses: Supply, utilization, and price, farm weight, 1979-2006.....	81
67. U.S. eggplant, all uses: Supply, utilization, and price, farm weight, 1979-2006.....	82
68. U.S. garlic, all uses: Supply, utilization, and price, farm weight, 1979-2006.....	83
69. U.S. fresh-market snap beans: Supply, utilization, and price, farm weight, 1979-2006.....	84
70. U.S. fresh-market spinach: Supply, utilization, and price, farm weight, 1979-2006.....	85
71. U.S. fresh-market potatoes: Supply, utilization, and price, farm weight, 1979-2006.....	86
72. U.S. honeydew melons: Supply, utilization, and price, farm weight, 1979-2006.....	87
73. U.S. cantaloupes: Supply, utilization, and price, farm weight, 1979-2006.....	88
74. U.S. watermelons: Supply, utilization, and price, farm weight, 1979-2006.....	89
75. U.S. asparagus for freezing: Supply, utilization, and price, farm weight, 1979-2006.....	90
76. U.S. broccoli for processing: Supply, utilization, and price, farm weight, 1979-2006.....	91
77. U.S. cauliflower for processing: Supply, utilization, and price, farm weight, 1979-2006.....	92
78. U.S. green peas for freezing: Supply, utilization, and price, farm weight, 1979-2006.....	93
79. U.S. snap beans for freezing: Supply, utilization, and price, farm weight, 1979-2006.....	94
80. U.S. sweet corn for freezing: Supply, utilization, and price, farm weight, 1979-2006.....	95

81. U.S. potatoes for freezing: Supply and utilization, farm weight, 1979-2006.....	96
82. U.S. spinach for freezing: Supply and utilization, farm weight, 1979-2006.....	97
83. U.S. carrots for freezing: Supply and utilization, farm weight, 1979-2006.....	98
84. U.S. tomatoes for processing: Supply, utilization, and price, farm weight, 1979-2006.....	99
85. U.S. cucumbers for pickles: Supply, utilization, and price, farm weight, 1979-2006.....	100
86. U.S. sweet potatoes, all uses: Supply, utilization, and price, farm weight, 1979-2006.....	101
87. U.S. squash, all uses: Supply, utilization, and price, farm weight, 1979-2006.....	102
88. U.S. onions for dehydrating: Supply, utilization, and price, farm weight, 1979-2006.....	103

***Fresh Marketing Spreads***

89. Broccoli: U.S. monthly average retail price, marketing spread, and shipping-point price, 1995-2006.....	104
90. Lettuce, iceberg: U.S. monthly average retail price, marketing spread, and shipping-point price, 1979-2006.....	105
91. Tomatoes, fresh field-grown: U.S. monthly average retail price, marketing spread, and shipping-point price, 1979-2006.....	106
92. Potatoes, fresh: U.S. retail price, marketing spread, and grower-packer return, 1979-2006.....	107

***Processing Vegetables***

93. Vegetables, selected: Fresh and processing per capita utilization, 1979-2006.....	108
94. Vegetables, processing: Harvested acreage for canning and freezing, 1979-2005.....	109
95. Vegetables, processing: Production for canning and freezing, 1979-2005.....	110
96. Vegetables, processing: Value of production for canning and freezing, 1979-2005.....	111
97. Vegetables, processing: Raw product prices for canning and freezing, 1979-2005.....	112
98. Vegetables, processed: U.S. monthly and annual retail price index, 1986-2006.....	113
99. Vegetables, processing: Selected U.S. per capita utilization, 1979-2006.....	114
100. Vegetables and fruits, dehydrated: U.S. monthly and annual producer price index, 1982-2006.....	115
101. Vegetables, canned: U.S. monthly and annual producer price index, 1979-2006.....	116
102. Vegetables, canned: Selected U.S. imports, by type, 1979-2005.....	117
103. Vegetables, canned: Selected U.S. exports, by type, 1979-2005.....	118

104. Selected canned vegetables: U.S. export value to selected countries and the world, 2000-2005.....	119
105. Selected canned vegetables: U.S. import value from selected countries and the world, 2001-2005.....	120
106. Vegetables, frozen: Pack and carryover, 1979-2005.....	121
107. Vegetables, frozen: Annual pack of major vegetables, 1979-2005.....	122
108. Vegetables, frozen: January 1 stocks of major vegetables, 1979-2006.....	123
109. Vegetables, frozen: U.S. monthly and annual producer price index, 1979-2006.....	124
110. Vegetables, frozen: U.S. imports, by type, 1979-2005.....	125
111. Vegetables, frozen: U.S. exports, by type, 1979-2005.....	126
112. Selected frozen vegetables: U.S. import value from selected countries and the world, 2001-2005.....	127
113. Selected frozen vegetables: U.S. export value to selected countries and the world, 1998-2005.....	128

### ***Potatoes and Sweet Potatoes***

114. Potatoes: Harvested acreage, by season, 1979-2006.....	129
115. Potatoes: Production, by season, 1979-2006.....	130
116. Potatoes, all seasons: Production, by major State, 1979-2005.....	131
117. Potatoes, all seasons: Crop-year utilization, 1979-2004.....	132
118. Potatoes: Season-average price and value of farm sales by season, 1979-2004.....	133
119. Potatoes, all: U.S. monthly and season-average grower price, 1986-2006.....	134
120. Potatoes, fresh market: U.S. monthly and annual retail price index, 1979-2006.....	135
121. Potatoes, frozen french fries: U.S. monthly and annual producer price index, 1979-2006.....	136
122. Potatoes: U.S. monthly retail price, by product, 1986-2006.....	137
123. Potatoes: Selected U.S. imports, by type, 1979-2005.....	138
124. Potatoes: Selected U.S. exports, by type, 1979-2005.....	139
125. Potatoes: U.S. per capita utilization, by category, 1978-2006.....	140
126. Sweet potatoes: Production, by State, 1979-2005.....	141
127. Sweet potatoes: U.S. acreage, yield, production, and value, 1979-2006.....	142

### ***Pulses***

128. Dry edible beans: Harvested acreage, by State, 1979-2006.....	143
129. Dry edible beans: Production, by class, 1979-2005.....	144
130. Dry edible beans: Production, by State, 1979-2005.....	145
131. Dry edible beans: Value of production, by State, 1979-2005.....	146
132. Dry edible beans: Season-average wholesale price, by class, 1979-2005.....	147
133. Dry edible beans: U.S. monthly and season-average grower price, 1979/80-2005/06.....	148
134. Dry edible beans: U.S. imports, by class, 1979-2006.....	149

135. Selected dry beans: U.S. export value to selected countries and the world, 2002-2005.....	150
136. Dry edible beans: U.S. exports, by class, 1979-2006.....	151
137. Dry edible beans: U.S. per capita use for selected classes, 1979-2006...	152
138. Dry edible peas: U.S. acreage, yield, production, and value, 1979-2006.....	153
139. Lentils, dry: U.S. acreage, yield, production, and value, 1979-2006.....	154
140. Austrian winter peas, dry: U.S. acreage, yield, production, and value, 1979-2006.....	155
141. Dry edible peas and lentils: U.S. producer price index, 1991/92-2005/06.....	156
142. Dry peas and lentils: U.S. exports, by class, 1979-2005.....	157
143. Dry peas and lentils: U.S. imports, by class, 1979-2005.....	158

### ***Mushrooms***

144. Agaricus mushrooms: Production, by type of sale, 1979/80-2004/05....	159
145. Agaricus mushrooms: Price and value, by type of sale, 1979/80-2004/05.....	160
146. Mushrooms: U.S. monthly and annual imports, 1992-2006 .....	161
147. Mushrooms, fresh-market and canned: U.S. monthly and annual exports, 1989-2006.....	162
148. Mushrooms, all: U.S. per capita utilization, 1979-2006.....	163
149. Specialty mushrooms: Production, price and value, by type of sale, 1986/87-2004/05.....	164

### ***Specialties and World Production***

150. Specialty vegetables: Fresh and processed imports, 1980-2005.....	165
151. Specialty and minor vegetables, fresh and processed: Harvested acreage, California, 1990-2004.....	166
152. Specialty and minor vegetables, fresh and processed: Production, California, 1990-2004.....	167
153. Specialty and minor vegetables, fresh and processed: Value of production, California, 1990-2004.....	168
154. Specialty vegetables, fresh market: U.S. domestic and imported shipments, 1990-2005.....	169
155. Selected vegetable production in leading countries and the world, 1997-2005.....	170
156. Selected vegetable harvested acreage in leading countries and the world, 1997-2005.....	173

Table 1--U.S. per capita use of selected, commercially produced, fresh, and processing vegetables and melons, 1970-2006

f = Forecast. r = Revised. -- = Not available. 1/ All production for processing broccoli and cauliflower is for freezing. 2/ On-cob basis. 3/ In-shell basis. 4/ Includes domestically-produced hothouse tomatoes after 1996 (all years include imported hothouse tomatoes). 5/ Includes artichokes, brussels sprouts, eggplant, endive/escarole, garlic, radishes, green limas, squash, & spinach. In 2000, okra, pumpkins, kale, collards, turnip greens, and mustard greens added. 6/ Includes beets, green limas (1992-2004), spinach, and miscellaneous imports (1990-2004). 7/ Includes green limas, spinach, and miscellaneous freezing vegetables. 8/ Fresh, canning, and freezing data do not sum to the total because onions for dehydrating are included in the total. 9/ Production from new areas in the upper Midwest added in 1998. A portion of this is used for animal feed.

1/ Due to changes in the estimates program, data for 2000 and 2001 may not be comparable with other years. Includes fresh-cut/processing.

2/ Excludes melons, potatoes, sweet potatoes, pulse crops, and mushrooms.

3/ Excludes potatoes, sweet potatoes, mushrooms, pulse crops, and fresh-cut produce.

4/ Includes chickpeas and blackeye peas.

5/ Excludes chickpeas and blackeye peas. Production includes wrinkled seed peas.

2006 p	973,888	919,365	906,697	705,071	586,191								

p = Preliminary. 1/ Excludes melons, potatoes, and mushrooms. 2/ Monthly distribution as reported by the Census is partly in error for 1976, 1980, 1981, and 1986. For July and August of 1981 and May of 1986, some quantities are included that actually arrived in earlier months. 3/ Import data beginning January 1989 are reported under the Harmonized Tariff Schedule (HS) of the U.S. Department of Commerce

Source: Prepared by Economic Research Service, USDA using data provided by the Bureau of the Census, U.S. Department of Commerce.

-- = Not available. f = ERS forecast.

1/ Excludes potatoes, sweet potatoes, and mushrooms. 2/ Includes fresh and processing. 3/ After 1996, includes an ERS estimate of domestically-produced hothouse tomatoes. Hothouse tomato imports continue to be included in all years. 4/ Includes radishes, Brussels sprouts, squash, and green lima beans. Green lima beans included since 1992. Beginning with 2000, also includes collards, kale, mustard greens, turnip greens, okra, and pumpkins.

1/ Monthly distribution as reported by the Census Bureau is partly in error for 1981 and 1986. For July and August of 1981 and May of 1986, some quantities are included that actually arrived in earlier months. 2/ Import data beginning January 1989 are reported under the Harmonized Tariff Schedule (HS) of the U.S. Department of Commerce.

1/ Source: National Agricultural Statistics Service, USDA. Production was adjusted by ERS for 1970-81 to account for States not included in NASS estimates. Includes ERS estimates of domestically-grown hothouse tomatoes after 1996. 2/ Source: Bureau of the Census, USDC. From 1978-89, U.S. exports were adjusted using Canadian import data. Imports include hothouse tomatoes. 3/ Includes shipments to U.S. territories from 1978-88. These were previously included in U.S. exports. 4/ Constant dollar prices were calculated using the GDP implicit price deflator, 2000=100

Source: Prepared and calculated by the Economic Research Service, USDA.

1/ Excludes onions for fresh, canning, and freezing. 2/ From 1979-92, estimated by ERS as 76 percent of California summer crop.

After 1992, production for processing estimated by USDA/NASS. Price data also estimated by USDA/NASS starting in 1993 crop. 3/ Product-weight data was converted to fresh basis using factor of 9.0. 4/ Data from *FATUS*, USDA-ERS.

5/ Stocks are for raw product to be processed and do not include finished inventory. Estimated by ERS as 80 percent of California summer onion stocks from 1970-80. Since 1980, estimated by ERS as 2.5 percent of U.S. Jan 1 onion inventory.

6/ Estimated by ERS as 50 percent of California's summer crop shrinkage and loss (assumes lower shrink in processing)

7/ Unit value of California onions destined for processing. 8/ Deflated by the GDP implicit price deflator, 2000=100

-- = Not available. f = forecast.

1/ Prices are simple 12-month averages. 2/ Adjusted to allow 7 percent for waste and spoilage incurred during marketing

3/ Average of monthly f.o.b. shipping-point prices as reported by USDA-NASS. 4/ Retail prices not reported in 1979.

Sources: Computed by ERS using data from the Bureau of Labor Statistics, U.S. Department of Labor (<http://www.bls.gov/data/home.htm>) and *Vegetables Summary*, National Agricultural Statistics Service, USDA.

-- = Not available.

1/ Exports are in product weight as reported by Census. Due to under-reporting, U.S. exports to Canada prior to 1990 may be understated.

2/ Excludes shelled beans. 3/ Data were converted from gallons using a factor of 8.485 pounds per gallon. 4/ Tomato products not elsewhere classified. For 1989-2005, largely represents whole tomatoes.

Source: Prepared by ERS using data provided by the Bureau of the Census, U.S. Department of Commerce.

-- = Not available. f = ERS forecast.

1/ Crop year begins July 1 and ends June 30. 2/ From 1970 to 1988, includes all dried, desiccated, and dehydrated peas, other than split peas. After 1988, under the Harmonized Tariff Schedule, green, yellow, and split peas were shown separately. 3/ From 1979 to 1988, includes green and yellow peas.

After 1988, includes split peas only. 4/ Includes Austrian winter peas and misc. dry peas. 5/ Planting seed. Excludes chickpeas. 6/ Pea data series broken following the 1987/88 season due to the January 1989 change to the harmonized system. Data in this table prior to 1989 are on a Sept-Aug year.

Source: Prepared by ERS using data provided by the Bureau of the Census, U.S. Department of Commerce.

p = Preliminary. -- = Not available. Units are million hundredweight (cwt). One million cwt is equal to 100 million pounds or 50,000 US tons.

1/ Includes fresh and processing production. U.S. data may not match data elsewhere in this report due to reporting delays. Some U.S. data was updated by ERS. 2/ The United States was eleventh largest in 2005. 3/ The U.S. is the eighth largest producer. 4/ The U.S. is the nineteenth largest producer.

5/ Largely string beans. 6/ Includes green peppers and chile peppers. 7/ The U.S. is fifteenth largest. 8/ U.S. data revised by ERS to match data reported by USDA, NASS. World total also adjusted. 9/ Excludes potatoes, sweet potatoes, and dry pulse crops but includes green (fresh) pulses, and mushrooms

Source: Derived from data supplied by FAOStat (05/23/06), Food and Agriculture Organization, United Nations (<http://faostat.fao.org/default.htm>).
