

USDA-CSREES 2005 National Water Quality Conference

[Nooksack River Watershed Bacteria TMDL](#)

Abstract:

Northwest Indian College is a 1994 Land Grant Institution located in EPA Region 10. We are one of the five Water Quality Coordinators in the CSREES Pacific Northwest Regional Water Quality Program. This poster is designed to convey information about Northwest Indian College and our role in water quality monitoring of the Lower Nooksack River Watershed that has resulted in the first successful Washington State Department of Ecology Bacteria Total Maximum Daily Load (TMDL) in the Pacific Northwest region.
