Free Access to International STI Proposed for DOE

ETDEWEB

INIS Database

ETDEWEB

Welcome to ETDE World Energy Base, ETDEWEB

ETDEWEB includes information on the environmental impact of energy production and use, including climate change; energy R&D; energy policy; nuclear, coal, hydrocarbon and renewable energy technologies and much, much more...

Explore the growing collection of over 600,000 bibliographic records with more than 3.5 million downloadable full text pages now available at your fingertips.

To use ETDEWEB, [LOGIN](#). If you are not yet a user, please see [REGISTRATION](#).

For more about ETDEWEB, system requirements, and any restrictions, see [OVERVIEW](#) and its links.

We welcome your [FEEDBACK](#).

ETDEWEB is a product of the Energy Technology Data Exchange (ETDE), a programme of the International Energy Agency.

INIS Database

The International Nuclear Information System (INIS) is the world's leading information system on the peaceful uses of nuclear science and technology.

The full INIS Database containing over two million records is now available to users on a modem Web-based national gateway, with very user friendly interfaces.

If you have not yet subscribed to our Database, please go to our INIS Demo Database and see how INIS can help you.

Annual subscription fee for unlimited usage for 12 months.

Users need only to have a Web browser that supports the "JavaScript 1.1" standard, such as "Microsoft Internet Explorer 4.0+", or "Netscape Navigator 3.0+" or "Netscape Communicator 4.0+."

To learn more about INIS, [click here](#).

Value of International STI: Summary of STIP Feedback

Eight DOE sites responded favorably on value/need

Thousands of accesses to data made annually

**Access to international literature required for
increasing multinational collaborations and global
research**

Foreign STI is vital to DOE labs

Office of Scientific and Technical Information (OSTI) International Program Activities

Impacts of Budget Reductions on OSTI's International Program

- For 50+ years, OSTI has borne sole responsibility for the cost of its international partnerships
- In recent years, this cost to OSTI has been \$250-400k annually to fulfill obligations, not including costs involved in covering the full scope of U.S. information. To cover full scope, an additional \$1 million annually would be needed.
- With the declining OSTI appropriation, OSTI has been unable to fulfill information collection obligations, and will soon be unable to meet financial obligations without help
- OSTI needs support, both written and financial, to continue these programs
