Definitions of Terms Used in This Handbook

Abuse

<u>Abuse</u> is the improper or excessive use of authority. Abuse refers to administrative violations of Departmental, agency, or program regulations that impair the effective and efficient execution of programs. These violations may result in Federal losses or they may result in denial or reduction in lawfully authorized Federal benefits to participants.

*--Approved Insurance Provider (AIP)

An <u>approved insurance provider (AIP)</u> is a legal entity which has entered into a Standard Reinsurance Agreement with FCIC for the applicable reinsurance year. For the purpose of this handbook this includes company employees and persons contracted to perform loss adjustment and compliance obligations that includes loss adjusters, field supervisors, quality control reviews, etc. This does **not** include insurance sales agents or employees thereof.--*

Determined Acreage

Determined acreage is acreage determined by an authorized FSA representative.

Fraud

<u>Fraud</u> is the intentional, wrongful obtaining or attempt of obtaining either money or some other advantage or benefit from governmental programs. Fraud includes but is not limited to, theft, embezzlement, false statements, illegal commissions, kickbacks, conspiracies, and obtaining contracts through collusive arrangements.

* * *

Policyholder Alert

A <u>policyholder alert</u> is defined as a problem, or potential problem, with a policyholder's insurance data that my result in payment being made to the policyholders outside the authority of the Federal Crop Insurance Act.

Program Deficiency

A <u>program deficiency</u> is defined as a defect in a policy or county actuarial document that result in excessive indemnities being paid to producers outside the authority of the Federal Crop Insurance Act as determined by RMA's Administrator.

Definitions of Terms Used in This Handbook (Continued)

Tolerance

<u>Tolerance</u> is the number of acres that the reported acreage or allotment may differ from the determined acreage without either of the following:

- the total loss of benefits
- the overall accuracy of the acreage report being questioned.

Waste

<u>Waste</u> is incurring unnecessary costs as a result of inefficient or ineffective practices, systems, or controls.

Example Letter to Notify Producer of Spot Check

*__ Name: Address: Date: Dear Producer. In June 2000, Congress passed the Agricultural Risk Protection Act. It requires the Risk Management Agency (RMA) with the assistance of the Farm Service Agency (FSA) to improve program compliance and integrity of the Federal crop insurance program. RMA has also been given the authority to request assistance from FSA in conducting reviews of insured crops during the growing season. One of your policy crops has been chosen for a spot check. RMA has requested FSA to perform a minimum of two-documented field inspections during the growing season. These inspections will be thoroughly documented and reported to the appropriate RMA Regional Compliance Office. This information will also be made available at the FSA County Office for your insurance company's use if loss adjustment activities occur. The _____ FSA County Office is requiring you to inform this office by (date), in writing, of where your fields of (crop) are located for the (year) growing season. Indicate whether a soil test has been completed for the crop locations above. Include in your written statement what method of chemical and fertilizer treatment is being implemented for the (year) growing season. This information is required by handbook 4-RM, subparagraph 71 B as part of the spot check process. Sincerely, **County Executive Director** Your County USA

RCO Spot Check Growing Season Inspection Guidelines

- **Important:** This process **requires** that the time on the digital camera and the time on the GPS unit match within 1 minute. If the clock on the digital camera is not set, then the data collected will not be valid. Check the time on the digital camera each time it is taken out in the field.
- One GPS point and 2 digital pictures are required for each spot check. The first picture shall be an overview of the field and the second digital picture shall be a "zoomed in" picture of the standing crop condition.

Note: The picture shall document the general crop condition of the standing crop. A measuring device is encouraged to document crop height where applicable.

- If AD-2027, items 4A through 4C are identified, then no additional data will need to be collected. The GPS point and 2 digital pictures are required. The County Office must fill out the electronic versions of AD-2027 and AD-2045 with the digital pictures and a description of the digital pictures inserted. Include in the description the direction that was faced while the picture was taken.
- If AD-2027, item 4D is the result of the inspection, then additional data shall be collected.
- In addition to the 1 GPS point and 2 digital pictures, the inspector shall take as many GPS points and digital pictures as needed to document the situation/condition. Take additional digital pictures of surrounding fields with similar crops to further document your findings.

ACompletingSTC, RO POC, State Office POC, COC, and County Offices shall completeAD-2006AD-2006 according to the instruction in the following table. Attach additional
sheets and supporting documentation, as necessary, to thoroughly explain the
issue, provide background, justify recommendations, or explain the action.

Item	Instruction
1	Tracking Number: Depending on the origin of the request the State Office POC or RO POC will assign a 9-digit alpha numeric tracking number (for example, 200106F0001). The first 4 digits will be the calendar year the request is made (for example, $2001 = 2001$), the third and fourth digit identifies the State location (for example, California = 06), the fifth digit identifies the origin of the request (for example, F for FSA or R for RMA), the next 4 digits are used for the request number in chronological order (for example, request number $1 = 0001$).
2	Date originated.
3	Issue: The originator (RO POC, State Office POC, STC, COC) of the request states the subject and the task to be completed.
4	Background: The originator describes the subject and/or process and any other pertinent information in assisting the recipient in making their determination. Other information may include but not limited to why the task needs to be completed or what specific information needs to be reviewed.
5	STC Recommendation: The appropriate action recommended.
6	Justification: Supporting documentation provided for the action recommended (Part 5, Section 3).
7A	STC Signature: An STC member or their appointed designee will sign the request.
7B	Date Sent: The date the State Office POC sent the request to RO POC.
8	RO Explanation/Action: Describe the appropriate action taken by RO and the reason for the action. If the request is accepted, explain when the action will occur.
9A	RO POC signature.
9B	Check whether action is concurred or non-concurred.
9C	Enter date signed.
10	RO name.
11	State Office name and address.

*--Program Deficiency Notification Memorandum

This is an example of a memorandum to be used by RO to notify STC of probable and determined program deficiencies and policyholder alerts.

XX XXXXX XXXXX State Executive Director Farm Service Agency City, State Zip

RE: 4-RM Report of Probable and Determined Program Deficiencies and Policyholder Alerts

Dear XX XXXXX:

In accordance with the procedures outlined in 4-RM, the Risk Management Agency, XXX Regional Compliance Office is providing you with the attached listing of probable or known crop insurance program deficiencies and policyholder alerts for your information. The attached report is divided into three sections:

Section 1 (Code 1), Final Determinations – This listing includes policyholders with final findings impacting their crop insurance policies that may not be reflected on the download received from RMA. Final determinations may still be appealed by the insurance provider and are subject to dispute by the policyholder with their respective insurance companies. These findings have been identified by this office, reviewed by the insurance provider, and determined to be correct taking the company and or policyholder's response into consideration.

Section 2 (Code 2), Probable and Determined Program Deficiencies – This is a listing of program issues identified by RMA that may have resulted in crop insurance overpayments for some policyholders. Because the deficiencies may have been imbedded in the insurance program itself, RMA may not recover all overpaid indemnities or correct other information relative to the policy data. FSA may want to review the downloaded information for producers who participated in these programs to ensure that the program deficiency does not improperly inflate the producer's CDP payment.

Section 3 (Code 3), Other Policyholder Alerts – This section contains the names and identification numbers of policyholders that RMA has identified for potential problems with their insurance data, but has not completed a review or received responses from the policyholder's insurance provider to verify any findings. This list is provided only as a "heads up" to your State regarding those policyholder's who have gained our attention, but have not had the benefit of full review process at this time.

If you have any questions or need additional information, please feel free to call me at XXX-XXX-XXXX.

Sincerely,

XXXX XXXXX Director
