

USDA's Domestic Sugar Program and Reporting Glossary Terms

Beet sugar means sugar that is processed directly or indirectly from sugar beets or sugar beet molasses.

Block stocks – means the amount of sugar a processor can not sell. Total production minus the overall allotment quantity equals block stocks.

Cane juice means water containing the sucrose extracted from crushed sugarcane.

Cane sugar means sugar derived directly or indirectly from sugarcane produced in the United States, including sugar produced from sugarcane molasses.

Cane sugar refiner means a person who processes raw cane sugar into refined crystalline sugar or liquid sugars.

Cane syrup means concentrated cane juice from which no sucrose has been extracted. Weight is based on sugar solids contained.

CCC means Commodity Credit Corporation.

Deliveries means the movement of refined sugar from a cane sugar refiner, a sugar beet processor, a sugarcane processor, or a trader, to end-users or brokers for consumption, either as sugar or for use in products containing sugar, including sugar delivered to manufacturers for use in products to be exported.

Direct-consumption sugar means any sugar which is not to be further refined or improved in quality, whether such sugar is principally of crystalline structure or is liquid sugar, edible molasses, sugar syrup, or cane syrup.

Edible molasses means molasses that is not to be further refined or improved in quality and that is to be distributed for human consumption, either directly or in molasses-containing products. The weight is based on sugar solids contained.

Exports: sugar, as a commodity, exported from the United States. Exports do not include sugar contained in manufactured products that are exported. For the purposes of reporting on forms CCC-831, CCC-832, and/or CCC-835, sugar is considered exported when either 1) the title has transferred to the foreign entity or 2) sugar is delivered to a trader who is contractually obligated to export the sugar.

Extraction Rate: Extraction rate refers to the percent of sucrose obtained from processing sugar beets or sugarcane, compared to the sucrose content in the sugar beet or sugarcane before processing -- pounds sucrose obtained/pound sucrose before slicing/crushing.

Fiscal year means that year beginning October 1 and ending the following September 30, ie., FY 2007 is the period from October 1, 2007 - September 30, 2008.

FSA means Farm Service Agency.

Imports means sugar originating in foreign countries or areas and entered, or to be entered, into the United States customs territory. For the purposes of reporting on forms CCC-831, CCC-832, and/or CCC-835, sugar is considered imported when a domestic entity holds the title to the sugar.

In-process sugar means the intermediate sugar containing products, as CCC determines, produced in the processing of domestic sugar beets and sugarcane. It does not include raw sugar, liquid sugar, invert sugar, invert syrup, or other finished products that are otherwise eligible for a loan.

Inventory held for others means inventory that has been sold but has not been delivered.

Invert sugar means a mixture of glucose (dextrose) and fructose (levulose) formed by the hydrolysis of sucrose.

Liquid sugar means a direct-consumption sugar which is not principally of crystalline structure and which contains, or which is to be used for the production of, any sugars principally not of crystalline structure which contain soluble nonsugar solids (excluding any foreign substances that may have been added or developed in the product) equal to 6 percent or less of the total soluble solids. Liquid sugar is exclusive of cane syrup and edible molasses.

Market or marketing means the transfer of title associated with the sale or other disposition of sugar in the United States commerce, including the forfeiture of sugar loan collateral, and for any integrated processor and refiner, the movement of raw cane sugar into the refining process. Marketings do not include sales for nondomestic or nonhuman consumption, or sales of sugar to enable another processor to fulfill an allocation established for such processor.

Molasses means a thick syrup which is a byproduct of processing sugar beets or sugarcane, or of refining raw cane sugar. Weight is based on sugar solids contained.

Other sugar means any sugar not to be further processed or refined or improved in quality. May include refined crystalline, liquid sugar, edible molasses, sugar syrups, cane syrups, and thick juice.

Over-allocation sales means all sales of sugar that have been sold over the processors' over-allocation quantity.

Person means an individual, corporation, association, marketing or processing cooperative, joint stock company, estate or trust, or other legal entity.

Plant capacity means the maximum capability, on a short tons per day basis, of a processing or refining facility to process sugar beets (cleaned and tared), sugarcane, and/or raw sugar.

Processing facility means a distinct physical facility, at a single location, which processes sugarcane, sugar beets, or molasses into sugar.

Processing inputs means the quantity of raw materials (e.g., sugarcane, sugar beets, raw sugar, and molasses) used in processing or refining operations.

Processor stocks means all stocks that have not been previously sold.

Production means the output of beet sugar from the processing by sugar beet processors of domestically produced sugar beets or sugar beet molasses; the output of cane sugar (including edible molasses and cane syrup) by sugarcane processors of domestically produced sugarcane or sugarcane molasses; or the output of sugar (including edible molasses and sugar syrup) from the processing by cane sugar refiners of raw cane sugar or imported molasses.

Raw sugar means any sugar which is to be further refined or improved in quality other than in-process sugar. For the purposes of reporting on forms CCC-832 and CCC-835, raw sugar shall refer to any sugar that will be further refined, regardless of polarity.

Raw value means of any quantity of sugar means its equivalent in terms of raw sugar testing 96 sugar degrees, as determined by a polarimetric test performed under procedures recognized by the International Commission for Uniform Methods of Sugar Analysis (ICUMSA). Direct-consumption sugar derived from sugar beets and testing 92 or more sugar degrees by the polariscope shall be translated into terms of raw value by multiplying the actual number of pounds of such sugar by 1.07. Sugar derived from sugarcane and testing 92 sugar degrees or more by the polariscope shall be translated into terms of raw value in the following manner: raw value = $\{[(\text{actual degree of polarization} - 92) \times 0.0175] + 0.93\} \times \text{actual weight}$. For sugar testing less than 92 sugar degrees by the polariscope, derive raw value by dividing the number of pounds of the "total sugar content" (i.e., the sum of the sucrose and invert sugars) thereof by 0.972.

Receipts refers to the quantity of raw materials (e.g., sugarcane, sugar beets, raw sugar, refined sugar, liquid sugar, syrups, and molasses) received by the processing or refining facility.

Refined crystalline sugar means centrifugal, crystalline sugar (including "high-polarity" sugar from raw cane mills, and "soft" or "brown" sugars) which is not to be further refined or improved in quality.

Refining facility means a distinct physical facility, at a single location, which processes raw sugar or imported molasses into refined sugar.

Re-export credit means a licensee under the Refined Sugar Re-Export Program who exports sugar, or transfers sugar to a licensee of the Sugar-Containing Products Re-Export Program or the Polyhydric Alcohol Program, receives a credit on their license. They can subsequently

import raw cane sugar, outside of any quota or high-tier duty. Imports are recorded on their license as a debit. Over time, debits and credits will balance; at any time, the license cannot exceed 50,000 metric tons raw value on either the debit or the credit side.

Re-export Program means the Refined Sugar Re-Export Program is designed to facilitate the use of domestic refining capacity to export refined sugar into the world market. The program establishes a license against which a refiner can export domestically produced refined sugar and later import world raw sugar, import world raw sugar for refining and distribution into the domestic market and later export refined sugar, or import raw sugar, refine it and export it into the world market. The program was implemented to mitigate the imposition of restrictive quotas, which reduced the quantity of raw sugar allowed to enter the U.S. domestic market. Imports of sugar under HTS 1701.11.20 are permitted only for those importers who hold a license issued by the U.S. Department of Agriculture. The regulations are found at 7 CFR 1530, which implements authority given to the Secretary of Agriculture in Additional U.S. note 6 to chapter 17 of the HTS.

Region (FSA designated areas for reporting sugar deliveries)

- **New England** - Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut.
- **Middle Atlantic** - New York, New Jersey, and Pennsylvania.
- **North Central** - Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, and Kansas.
- **South** - Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, and Texas.
- **West** - Alaska, Hawaii, Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California.
- **Puerto Rico** - entered separately and included with U.S. total.

Stocks means inventory of sugar on hand at the beginning and at the end of the calendar month for which data are being reported.

Sucrose means a disaccharide carbohydrate having the chemical formula $C_{12}H_{22}O_{11}$.

Sugar means any grade or type of saccharine product derived, directly or indirectly, from sugarcane or sugar beets (including sugar produced from sugar beet or sugarcane molasses) and consisting of, or containing, sucrose or invert sugar, including raw sugar, refined crystalline sugar, liquid sugar, edible molasses, sugar syrup, and cane syrup.

Sugar for allotments means any grade or type of saccharine product processed, directly or indirectly, from sugarcane or sugar beets (including sugar produced from sugar beet or sugarcane molasses), produced for human consumption, and consisting of, or containing, sucrose or invert sugar, including raw sugar, refined crystalline sugar, edible molasses, edible cane syrup, and liquid sugar.

Sugar beet processor means a person who commercially produces sugar, directly or indirectly, from sugar beets (including sugar produced from sugar beet molasses), has a viable processing facility, and a supply of sugar beets for the applicable allotment year.

Sugarcane processor means a person who commercially produces sugar, directly or indirectly, from sugarcane (including sugar produced from sugarcane molasses), has a viable processing facility, and a supply of sugarcane for the applicable allotment year.

Sugar syrup means a direct-consumption liquid sugar with a sucrose content of less than 94 percent of the total soluble solids. Weight is based on sugar solids contained.

Swap means when a sugar company delivers sugar for the account of another sugar company due to freight savings. In turn the company who delivers the sugar to another sugar company's customer will report such transaction to USDA as a shipment/return of swap sugar. The receiving sugar company will report the transaction as a receipt of swap sugar.

Syrup means a viscous, concentrated sugar solution resulting from the evaporation of water, or the remaining liquor after crystallization of sugar from a solution.

Tolling means when company A has a product (ex: molasses and thick juice) that is owned by company B. Company A converts the product to refined sugar and sends it back to company B. Company B maintains ownership of it.

Ton means a short ton or 2,000 pounds.

USDA means the United States Department of Agriculture.

Weight Shrink/Gain: means the change in sugar beet weight from the time of purchase and piling, till the time of slicing. Shrink should be entered as a (-) negative.
