Some city streets were reported flooded in Sinton.

A closed upper level low across West Texas and Eastern New Mexico moved slowly east into West-Central Texas on the 13th. A short-wave trough in the base of the low tracked north-eastward across the Rio Grande Plains into the Coastal Plains of South Texas during the evening hours. Large scale lift ahead of this feature spread across portions of Souh Texas during the afternoon, atop airmass that was moist and unstable. Sufficient deep layer shear resulted in isolated severe storms during the afternoon across South Texas. Evetually an organized MCS developed and swept across South Texas during the evening hours. Southwesterly mid level winds

VICTORIA COUNTY

Page 3 of 4 8/6/2007

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
VICTORIA	03/31/07 07:45 CST		0	Flash Flood (due to Heavy Rain)
	03/31/07 08:45 CST		0	28.8N, 96.98W

Flooding was reported on many roads in the city of Victoria, including Navarro at Rio Grande, Ben Wilson St. near the University of Houston-Victoria and the Laurent Street underpass.

Thunderstorms with very heavy rainfall trained southwest to northeast across the central sections of Goliad and Victoria counties. A band of 3 to 6 inches of rain fell over a 3 hour period from southwest Goliad to northeast Victoria county, resulting in flash flooding. 3.22" of rain fell at the Victoria Regional Airport establishing a new daily rainfall record for this date.
