

SENTRY

The National Drug Intelligence Center (NDIC) SENTRY is an Internet-based system designed to collect and disseminate synthetic drug-related data in order to identify new trends at an early stage, evaluate their likely importance, and track their development.

SENTRY focuses on synthetic drugs that are primarily produced via a chemical process, such as LSD (lysergic acid diethylamide), MDMA (3,4-methylenedioxymethamphetamine, also known as ecstasy), and methamphetamine. To be truly effective as an early warning system, however, the system also monitors prescription drugs, over-the-counter medications, botanical substances and extracts, and chemicals and products involved in the manufacturing of synthetic drugs.

SENTRY is accessible at www.sentry.usdoj.gov or via the NDIC Internet site. From the SENTRY web site, authorized users can submit information on a new or unusual synthetic drug-related activity via an electronic submission form, link to partner agencies and our listserv, search and receive NDIC products,

and view previously reported submissions using the geographic information system capabilities.

SENTRY welcomes partnerships at multiple levels—federal, state, and local. Current partners include the Office of National Drug Control Policy (ONDCP), Substance Abuse and Mental Health Services Administration, and National Institute on Drug Abuse. In addition, a network of correctional officers, drug diversion investigators, emergency medical personnel, forensic chemists, juvenile detention officers, law enforcement officers, medical toxicologists, school nurses, school resource officers, and treatment providers have joined the SENTRY partnership.

NDIC uses the information obtained through SENTRY, combines it with additional information, and produces and disseminates DrugAlert Watch and DrugAlert Warning reports. A DrugAlert Watch report is issued when a pattern of synthetic drug-related activity is first identified. The DrugAlert Watch report relies heavily on qualitative information

obtained from our wide network of partners. Once a pattern is established, NDIC continues collecting and evaluating additional information.

When a trend is detected, a DrugAlert Warning report is issued. A DrugAlert Warning report combines the qualitative/anecdotal data collected in the DrugAlert Watch phase with quantitative/statistical data collected by NDIC analysts and our partners.

SENTRY is operated by NDIC in coordination with ONDCP and supports the National Synthetic Drugs Action Plan.

To participate in SENTRY and report emerging synthetic drug-related issues in your area, please provide the following information, typed on your agency letterhead, and fax it to (814) 532-5858:

1. Contact information including:
 - First name, middle initial, last name and title of requester
 - Requester's role within your agency (please choose only one):
 - Chemist
 - Education provider (teacher, administrator, school resource officer, or school nurse)
 - Law enforcement officer
 - Treatment provider to include physicians specializing in drug abuse issues
 - Medical service personnel (physician, nurse, emergency medical technician, or medical examiner)
 - Other, please explain
2. Complete mailing address (do not use post office box numbers)
3. E-mail address
4. Phone number
5. Fax number
6. Signature of requester

An NDIC Analyst will phone you within 2 business days with your login information.

If you have questions or comments about SENTRY or NDIC intelligence products, please e-mail us at NDIC.Sentry@usdoj.gov.
