Notes: Major coal-exporting States are those with total coal exports of over 500,000 short tons in 2000. Totals may not equal sum of components due to independent rounding.

Sources: Values shown for destinations other than Canada and Mexico are estimates based upon information reported on Energy Information Administration Form EIA-6A, "Coal Distribution Report," and coal export data presented in King's COALBASE (King Publishing Corporation, Knoxville, Tennessee). See the Explanatory Notes for a complete description of the methodology used to develop these estimates. Values shown for Canada and Mexico are based upon Form EIA- 6A.

¹ Includes distribution to Unknown consumers.

² Includes distribution to the transportation sector.

 $[\]ensuremath{\mathtt{3}}$ Includes distribution to both the transportation sector and unknown consumers.

^{*} Quantity is less than 500 short tons or percent is less than .05.

Note: Total may not equal sum of components because of independent rounding.
