DEPARTMENT OF DEFENSE

Office of the Secretary

Submission for OMB Review Comment Request

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, Associated form, and OMB number: Defense Federal Acquisition Regulation Supplement (DFARS) Part 230, Cost Accounting Standards, and DD Form 1861, Contract Facilities Capital Cost of Money; DD Form 1861; OMB Number 0704-0267.

Type of Request: Revision.

Number of Respondents: 25,609.

Responses Per Respondent: 1.6 (approximately).

Annual Responses: 42,058.

Average Burden Per Response: 10 hours.

Annual Burden Hours: 420,580.

Needs and Uses: It is Department of Defense policy to encourage contractor investment in facilities, which may lead, under DoD contracts, to increased productivity and reduced costs through the use of modern manufacturing technology. To motivate aggressive capital investment, DoD rewards contractors by recognizing contract facilities capital cost of money (CFCCM) and facilities capital employed in establishing the price of certain negotiated defense contracts, when such contracts are priced on the basis of cost analysis. DD Form 1861, Contract Facilities Capital Cost of Money, is used to compute these two elements of price. The contracting officer may require information from the contractor to complete this form. The CFCCM amount is used to help establish a price objective in negotiated contracts. The facilities capital employed amount is carried forward to DD Form 1547, Record of Weighted Guidelines Method Application, for the purpose of developing profit objectives on defense contracts when the Weighted Guidelines method is used. DFARS 230.7004-2, DD Form 1861, indicates that: (1) Completion of the DD Form 1861 requires information not included on

the Form CASB-CMF; and (2) the contracting officer could request information through a solicitation provision.

Affected Public: Business or Other For-Profit; Not-For-Profit Institutions.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Mr. Peter N. Weiss. Written comments and recommendations on the proposed information collection should be sent to Mr. Weiss at the Office of Management and Budget, Desk Officer for DoD, Room 10236, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. Robert Cushing.

Written requests for copies of the information collection proposal should be sent to Mr. Cushing, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302.

Dated: January 15, 1998.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF ENERGY

Notice of Intent To Prepare an Environmental Impact Statement for the Production of Tritium in a Commercial Light Water Reactor

AGENCY: Department of Energy.

ACTION: Notice of intent.

SUMMARY: The Department of Energy (DOE) announces its intent to prepare an Environmental Impact Statement (EIS) for the production of tritium using one or more commercial light water reactors (CLWR), pursuant to the National Environmental Policy Act (NEPA) of 1969, as amended (42 USC 4321 *et seq.*) and the DOE Regulations Implementing NEPA (10 CFR Part 1021). Under the CLWR Program, tritium production could occur in one of two manners: (1) purchase of CLWR irradiation services; or (2) purchase of a CLWR. Prior to preparation of the CLWR EIS, DOE initiated a procurement process to evaluate the feasibility of various CLWR alternatives, and the alternatives described in this notice have been derived from that procurement process. The CLWR EIS will evaluate the environmental impacts associated with tritium production for all reasonable alternatives identified through the procurement process.

DATES: Comments on the proposed scope of the CLWR EIS are invited from the public. To ensure consideration in the preparation of the EIS, comments must be postmarked by March 20, 1998. Late comments will be considered to the extent practicable. Public scoping meetings to discuss issues and receive oral comments on the scope of the EIS will be held in the vicinity of sites that may be affected by the proposed action.

The public scoping meetings will provide the public with an opportunity to present comments, ask questions, and discuss concerns with DOE officials regarding CLWR activities. An interactive format will be used. The location, date, and time for these public scoping meetings is as follows:

Northeast Alabama Community College,
135 Alabama Highway 35 West,
February 24, 1998, 7:00 p.m.-10:00 p.m., Rainsville, AL
Rhea County High School, February 26, 1998, 7:00 p.m.-10:00 p.m.,
Evansville, TN.

The Tennessee Valley Authority has been designated as a cooperating agency for this EIS. Any other agency that desires to be designated as a cooperating agency should contact the CLWR Program Office at the address listed below by March 20, 1998.

ADDRESSES: General questions concerning the CLWR Project can be asked by calling the toll-free telephone number at 1-800-332-0801, or by writing to: Stephen M. Sohinki, Director, CLWR Project Office, U.S. Department of Energy, P.O. Box 44539, Washington, DC 20026-4539.

As an alternative, comments can also be submitted by fax to: 1-800-631-0612; or electronically to the CLWR Web Site: <http://www.dp.doe.gov/dp-62>. Please mark envelopes, faxes, and E-mail: "CLWR EIS Comments."

FOR FURTHER INFORMATION CONTACT: For general information on the DOE NEPA process, please contact: Ms. Carol M. Borgstrom, Director, Office of NEPA Policy and Assistance (EH-42), U.S. Department of Energy, 1000 Independence Avenue, S.W., Washington, D.C. 20585, 202-586-4600; or telephone 800-472-2756 to leave a message.

SUPPLEMENTARY INFORMATION: All of the nuclear weapons currently in the United States' stockpile must contain tritium, a radioactive isotope of hydrogen, to function as designed. Tritium decays at a rate of 5.5 percent per year, giving it a half-life of 12.3 years. Because of this decay, the tritium contained in the nuclear weapons must be periodically replenished. Tritium is not a fissile material and cannot be used alone to construct a nuclear weapon. Tritium also has commercial uses such as watch dials, exit signs, and medical research.

Tritium is so rare in nature that useful quantities must be man-made. The United States stopped producing new tritium in 1988 when the last government-owned nuclear materials production reactor at the Savannah River Site (SRS) was shut down. Currently, there is no capability to
