Part III

**Department of
Education**

Compliance Agreement; Notice

DEPARTMENT OF EDUCATION**Compliance Agreement**

AGENCY: Department of Education.

ACTION: Notice of written findings and compliance agreement with the Hawaii Department of Education.

SUMMARY: This notice is being published in the **Federal Register** consistent with section 457(b)(2) of the General Education Provisions Act (GEPA). Section 457 of GEPA authorizes the U.S. Department of Education (the Department) to enter into a compliance agreement with a recipient that is failing to comply substantially with Federal program requirements. In order to enter into a compliance agreement, the Department must determine, in written findings, that the recipient cannot comply with the applicable program requirements until a future date and that a compliance agreement is a viable means of bringing about such compliance.

On August 29, 2008, the Department entered into a compliance agreement with the Hawaii Department of Education (HIDOE). Section 457(b)(2) of GEPA requires the Department to publish written findings leading to a compliance agreement, with a copy of the compliance agreement, in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Dr. Valeria Ford, U.S. Department of Education, Office of Elementary and Secondary Education, 400 Maryland Avenue, SW., room 3W118, Washington, DC 20202-6132. Telephone: (202) 260-0826.

If you use a telecommunications device for the deaf (TDD), you may call the Federal Relay Service (FRS) at 1-800-877-8339.

Individuals with disabilities may obtain this document in an alternative format (*e.g.*, Braille, large print, audiotope, or computer diskette) on request to the contact person listed under **FOR FURTHER INFORMATION CONTACT**.

SUPPLEMENTARY INFORMATION: Title I of the Elementary and Secondary Education Act of 1965 (Title I), as amended by the No Child Left Behind Act of 2001, requires each State receiving Title I funds to satisfy certain requirements.

Under Title I, each State was required to adopt academic content and student academic achievement standards in at least mathematics, reading or language arts, and, beginning in the 2005-2006 school year, science. These standards must include the same knowledge and levels of achievement expected of all

public school students in the State. Content standards must specify what all students are expected to know and be able to do; contain coherent and rigorous content; and encourage the teaching of advanced skills. Achievement standards must be aligned with the State's academic content standards and must describe at least three levels of proficiency to determine how well students in each grade are mastering the content standards. A State must provide descriptions of the competencies associated with each student's academic achievement level and must determine the assessment scores ("cut scores") that differentiate among the achievement levels.

Title I also requires each State to implement a student assessment system used to evaluate whether students are mastering the subject material reflected in the State's academic content standards. By the 2005-2006 school year, States were required to administer mathematics and reading or language arts assessments yearly during grades 3-8 and once during grades 10-12. Further, beginning with the 2007-2008 school year, each State was required to administer a science assessment in at least one grade in each of the following grade spans: 3-5, 6-9, and 10-12.

In addition to a general assessment, Title I requires States to develop and administer at least one alternate assessment for students with disabilities who cannot participate in the general assessment, with or without accommodations. An alternate assessment may be based on grade-level achievement standards, alternate achievement standards, or modified achievement standards. Like the general assessment, any alternate assessment must satisfy the requirements for high technical quality, including validity, reliability, accessibility, objectivity, and consistency with nationally recognized professional and technical standards.

In August 2007, HIDOE submitted evidence of its standards and assessment system. The Assistant Secretary for Elementary and Secondary Education (Assistant Secretary) submitted that evidence to a panel of experts for peer review. Following that review, the Assistant Secretary concluded that HIDOE's standards and assessment system did not meet a number of the Title I requirements.

Section 454 of GEPA, 20 U.S.C. 1234c, sets out the remedies available to the Department when it determines that a recipient "is failing to comply substantially with any requirement of law" applicable to Federal program funds the Department administers.

Specifically, the Department is authorized to—

- (1) Withhold funds;
- (2) Compel compliance through a cease and desist order;
- (3) Enter into a compliance agreement with the recipient; or
- (4) Take any other action authorized by law. 20 U.S.C. 1234c(a).

In a letter dated October 30, 2007, to Patricia Hamamoto, Superintendent of Education for HIDOE, the Assistant Secretary notified HIDOE that, to remain eligible to receive Title I funds, it would have to enter into a compliance agreement with the Department. The purpose of a compliance agreement is "to bring the recipient into full compliance with the applicable requirements of law as soon as feasible and not to excuse or remedy past violations of such requirements." 20 U.S.C. 1234f(a). In order to enter into a compliance agreement with a recipient, the Department must determine, in written findings, that the recipient cannot comply until a future date with the applicable program requirements and that a compliance agreement is a viable means for bringing about such compliance.

In accordance with the requirements of section 457(b) of GEPA, 20 U.S.C. 1234f(b), on March 27, 2008, Department officials conducted a public hearing in Hawaii to assess whether a compliance agreement with HIDOE might be appropriate. Patricia Hamamoto, the Superintendent of Education for HIDOE, and Dr. Robert Campbell, the Director of Program Support and Development for HIDOE, testified at this hearing. The Department considered the testimony provided at the March 2008 public hearing and all other relevant information and materials and concluded that HIDOE would not be able to correct its non-compliance with Title I standards and assessment requirements immediately.

On August 29, 2008, the Assistant Secretary issued written findings, holding that compliance by HIDOE with the Title I standards and assessment requirements is genuinely not feasible until a future date. Under Title I, HIDOE was required to implement its final assessment system no later than the 2005-2006 school year. The evidence that HIDOE submitted in August 2007 indicated that, well after the statutory deadline had passed, its standards and assessment system still did not fully meet Title I requirements. In addition, due to the enormity and complexity of the work needed to bring HIDOE's standards and assessment system into full compliance, HIDOE cannot

immediately comply with all of the Title I requirements.

The Assistant Secretary also determined that a compliance agreement represents a viable means of bringing about compliance because of the steps HIDEO has already taken to comply and the plan it has developed for further action. The compliance agreement sets out the action plan that HIDEO must implement to come into compliance with Title I requirements. This plan, coupled with specific reporting requirements, will allow the Assistant Secretary to monitor closely HIDEO's progress in meeting the terms of the compliance agreement.

The Superintendent of Education for HIDEO, Patricia Hamamoto, signed the compliance agreement on July 30, 2008,

and the Assistant Secretary signed the compliance agreement on August 29, 2008.

As required by section 457(b)(2) of GEPA, 20 U.S.C. 1234f(b)(2), the text of the Assistant Secretary's written findings is set forth as Appendix A and the compliance agreement is set forth as Appendix B of this notice.

Written Findings of the Assistant Secretary

For Elementary and Secondary Education

Regarding the Compliance Agreement

Between

the United States Department of Education

and the Hawaii Department of Education

**WRITTEN FINDINGS OF THE ASSISTANT SECRETARY
FOR ELEMENTARY AND SECONDARY EDUCATION
REGARDING THE COMPLIANCE AGREEMENT BETWEEN
THE UNITED STATES DEPARTMENT OF EDUCATION AND
THE HAWAII DEPARTMENT OF EDUCATION**

I. Introduction

The Assistant Secretary for Elementary and Secondary Education (Assistant Secretary) of the U.S. Department of Education (Department) has determined, pursuant to 20 U.S.C. §§ 1234c and 1234f, that the Hawaii Department of Education (HIDOE) has failed to comply substantially with certain requirements of Title I, Part A of the Elementary and Secondary Education Act of 1965 (Title I), as amended by the No Child Left Behind Act of 2001, 20 U.S.C. § 6301 *et seq.*, and that it is not feasible for HIDOE to achieve full compliance immediately. Specifically, the Assistant Secretary has determined that HIDOE did not meet, within the statutory timeframe, a number of the Title I requirements concerning the technical quality, alignment, and reporting of results for the Hawaii State Assessment, the State's general assessment; the Hawaiian Aligned Portfolio Assessment, the State's Hawaiian native language assessment; and the Hawaii State Alternate Assessment, the State's alternate assessment for students with the most significant cognitive disabilities who cannot take the general assessment even with accommodations.

For the following reasons, the Assistant Secretary has concluded that it would be appropriate to enter into a compliance agreement with HIDOE to bring it into full compliance as soon as feasible. During the effective period of the compliance agreement, which ends three years from the date of these findings, HIDOE will be eligible to receive Title I funds as long as it complies with the terms and conditions of the agreement as well as the provisions of Title I and other applicable Federal statutory and regulatory requirements.

II. Relevant Statutory and Regulatory Provisions

A. Title I, Part A of the Elementary and Secondary Education Act of 1965, as amended by the No Child Left Behind Act of 2001

Title I of the Elementary and Secondary Education Act of 1965 (Title I), as amended by the No Child Left Behind Act of 2001, 20 U.S.C. § 6301 *et seq.*, provides financial assistance, through State educational agencies, to local educational agencies to provide services in high-poverty schools to students who are failing or at risk of failing to meet the State's student academic achievement standards. Under Title I, each State, including the District of Columbia and Puerto Rico, was required to adopt academic content and student academic achievement standards in at least mathematics, reading or language arts, and science. These standards must include the same knowledge and levels of achievement expected of all public school students in the State. Content standards must specify what all students are expected to know and be able to do; contain coherent and rigorous content; and encourage the teaching of advanced skills. Achievement standards must be aligned with the State's academic content standards and must describe at least three levels of proficiency to determine how well students in each grade are mastering the content standards. A State must provide descriptions of the competencies

associated with each student's academic achievement level and must determine the assessment scores ("cut scores") that differentiate among the achievement levels.

Each State was also required to implement a student assessment system used to evaluate whether students are mastering the subject material reflected in the State's academic content standards. By the 2005–2006 school year, States were required to administer mathematics and reading or language arts assessments yearly during grades 3–8 and once during grades 10–12. Further, beginning with the 2007–2008 school year, each State was required to administer a science assessment in at least one grade in each of the following grade spans: 3–5, 6–9, and 10–12. A State's assessment system must:

- Be the same assessment system used to measure the achievement of all public school students in the State;
- Be designed to provide coherent information about student attainment of State academic content standards across grades and subjects;
- Provide for the inclusion of all students in the grades assessed, including students with disabilities and limited English proficient (LEP) students;
- Be aligned with the State's academic content and student academic achievement standards;
- Express student results in terms of the State's student academic achievement standards;
- Be valid, reliable, and of adequate technical quality for the purposes for which they are used and be consistent with nationally recognized professional and technical standards;
- Involve multiple measures of student academic achievement, including measures that assess higher order thinking skills and understanding of challenging content;
- Objectively measure academic achievement, knowledge, and skills without evaluating or assessing personal family beliefs and attitudes;
- Enable results to be disaggregated by gender, each major racial and ethnic group, migrant status, students with disabilities, English proficiency status, and economically disadvantaged students;
- Provide individual student reports; and
- Enable itemized score analyses.

20 U.S.C. § 6311(b)(3); 34 C.F.R. § 200.2.

In addition to a general assessment, States were required to develop and administer at least one alternate assessment for students with disabilities who cannot participate in the general assessment, with or without accommodations. 34 C.F.R. § 200.6(a)(2). An alternate assessment may be based on grade-level academic achievement standards, alternate academic achievement standards, or modified academic achievement standards. Like the general assessment, any alternate assessment must satisfy the requirements for high technical quality, including validity, reliability, accessibility, objectivity, and consistency with nationally recognized professional and technical standards.

B. The General Education Provisions Act

The General Education Provisions Act (GEPA) provides a number of options when the Assistant Secretary determines a recipient of Department funds is "failing to

comply substantially with any requirement of law applicable to such funds.” 20 U.S.C. § 1234c. In such a case, the Assistant Secretary is authorized to:

- (1) Withhold funds;
- (2) Compel compliance through a cease and desist order;
- (3) Enter into a compliance agreement with the recipient; or
- (4) Take any other action authorized by law.

20 U.S.C. § 1234c(a).

Under section 457 of GEPA, the Assistant Secretary may enter into a compliance agreement with a recipient that is failing to comply substantially with specific program requirements. 20 U.S.C. § 1234f. The purpose of a compliance agreement is “to bring the recipient into full compliance with the applicable requirements of law as soon as feasible and not to excuse or remedy past violations of such requirements.” 20 U.S.C. § 1234f(a). Before entering into a compliance agreement with a recipient, the Assistant Secretary must hold a hearing at which the recipient, affected students and parents or their representatives, and other interested parties are invited to participate. At that hearing, the recipient has the burden of persuading the Assistant Secretary that full compliance with applicable requirements of law is not feasible until a future date and that a compliance agreement is a viable means for bringing about such compliance. 20 U.S.C. § 1234f(b)(1). If, on the basis of all the evidence presented, the Assistant Secretary determines that full compliance is genuinely not feasible until a future date and that a compliance agreement is a viable means for bringing about such compliance, the Assistant Secretary must make written findings to that effect and must publish those findings, together with the substance of any compliance agreement, in the *Federal Register*. 20 U.S.C. § 1234f(b)(2).

A compliance agreement must set forth an expiration date, not later than three years from the date of the written findings, by which time the recipient must be in full compliance with all program requirements. 20 U.S.C. § 1234f(c)(1). In addition, a compliance agreement must contain the terms and conditions with which the recipient must comply during the period that agreement is in effect. 20 U.S.C. § 1234f(c)(2). If the recipient fails to comply with any of the terms and conditions of the compliance agreement, the Assistant Secretary may consider the agreement to be no longer in effect, and may take any of the compliance actions set forth above. 20 U.S.C. § 1234f(d).

III. Analysis

A. Overview of Issues To Be Resolved in Determining Whether a Compliance Agreement Is Appropriate

In deciding whether a compliance agreement between the Assistant Secretary and HIDEO is appropriate, the Assistant Secretary must first determine whether compliance by HIDEO with the Title I standards and assessment requirements is genuinely not feasible until a future date. 20 U.S.C. § 1234f(b)(2). Second, the Assistant Secretary must determine whether HIDEO will, within a period of up to three years from the date of these written findings, be able to come into compliance with the Title I requirements. Not only must HIDEO come into full compliance by the end of the effective period of the compliance agreement, it must also make steady and measurable progress toward that objective while the compliance agreement is in effect. If such an outcome is not possible,

then a compliance agreement between the Assistant Secretary and HIDOE would not be appropriate.

B. HIDOE Has Failed to Comply Substantially With Title I Standards and Assessment Requirements

In August 2007, HIDOE submitted evidence of its standards and assessment system. The Assistant Secretary submitted that evidence to a panel of experts for peer review. Following that review, the Assistant Secretary concluded that HIDOE's standards and assessment system did not meet a number of the Title I requirements. Specifically, the Assistant Secretary determined that, to demonstrate its compliance, HIDOE had to submit the following evidence:

ACADEMIC ACHIEVEMENT STANDARDS

Hawaii State Assessment (HSA):

1. The subject area representation for panels that reviewed the performance level descriptors.
2. A plan and process for the future selection of panels to ensure representation of all relevant stakeholder groups.

Hawaii State Alternate Assessment (HSAA):

1. Evidence of approved and adopted alternate academic achievement standards for students with the most significant cognitive disabilities in reading and mathematics for each of grades 3-8 and 10.
2. Evidence that the alternate academic achievement standards include the following for each content area:
 - a. At least three levels of achievement, including two levels of high achievement (*e.g.*, proficient and advanced) that determine how well students are mastering the State's academic content standards, and a third level of achievement (*e.g.*, basic) to provide information about the progress of lower-achieving students toward mastering the two levels of high achievement;
 - b. Descriptions of the competencies associated with each achievement level; and
 - c. Assessment scores ("cut scores") that differentiate among the achievement levels.
3. Documentation that the State has reported separately the number and percentage of students with disabilities assessed using an alternate assessment based on alternate academic achievement standards, an alternate assessment based on grade-level academic achievement standards, and the general HSA assessment, both with and without accommodations.
4. Evidence that the State has documented the involvement of diverse stakeholders in the development of its alternate academic achievement standards.

TECHNICAL QUALITY*HSA:*

1. Plan and timeline for conducting a consequential validity study.
2. Documentation of how the State will address inter-rater agreement rates for short-answer and extended-response items that were less than the established target.
3. Procedures for the standardization of the accommodation that allows for the explanation of directions using simplified vocabulary.
4. Plan and timeline for conducting a study to determine the extent to which the use of accommodations and alternate assessments yield meaningful scores including the use of simplified language and read aloud accommodations (consistent with requirements described under Critical Elements 4.3 d and 4.5 c & d of the Peer Review Guidance).

HSAA:

1. Evidence that the State has documented validity (in addition to the alignment of the HSAA with the academic content standards), as described in the *Standards for Educational and Psychological Testing* (AERA/APA/NCME, 1999).
2. Evidence that the State has provided documentation of the standards-setting process, including a description of the selection of judges, methodology employed, and final results.
3. Evidence that the State has considered the issue of reliability, as described in the *Standards for Educational and Psychological Testing* (AERA/APA/NCME, 1999).
4. Evidence that the State has ensured that its alternate assessment system is fair and accessible to all eligible students, including students with limited English proficiency.
5. Evidence that the State has taken steps (such as bias review of items) to ensure fairness in the development of the alternate assessment.
6. If different test forms or formats are used for the alternate assessment, evidence that the State has ensured that the meaning and interpretation of the results are consistent.
7. Evidence that the State has established:
 - a. Clear criteria for the administration, scoring, analysis, and reporting components of its alternate assessment; and
 - b. A system for monitoring and improving the on-going quality of its alternate assessment.

Hawaii Aligned Portfolio Assessment (HAPA):

1. Evidence that the cut scores for 2007 operationalize the content-specific performance level descriptors that are used for both the HAPA and the HSA. This evidence should include documentation related to the process of reviewing the 2006 cut scores for use in 2007, including a description of the preparation of the panel(s) for their task, a demographic description of the participants, and results of their deliberations.
2. Evidence that the State's scoring for oral fluency is valid and consistent across scorers.
3. Evidence that all students are being included in the assessment program.

4. Documentation of the comparability of the oral fluency tasks for the HAPA and the items from the HSA.

ALIGNMENT

HSA:

1. The blueprints for reading and mathematics for each required tested grade with the number of items developed for each standard.
2. Documentation showing that the full range of knowledge is assessed for each required tested grade for reading and mathematics.
3. Results of the item review panel, including the number of items reviewed, rejected, and revised, as well as alignment to benchmark and depth of knowledge levels for each required tested grade for reading and mathematics.
4. Documentation showing how the State addressed each of the cells in the December 2006 Rob Ely alignment analysis that resulted in ratings of “weak” or “no” alignment, including the number and extent of changes made.

HSAA:

1. Evidence that the State has taken steps to ensure alignment between its alternate assessments and its academic content and alternate student academic achievement standards.
2. Evidence that the State has developed ongoing procedures to maintain and improve alignment between the alternate assessment(s) and academic content and alternate student academic achievement standards over time, particularly if gaps have been noted.

HAPA:

1. Evidence showing how the State addressed or will address the concerns from the September 2006 Rob Ely alignment analysis.
2. Documentation demonstrating how the State addressed or will address the comments related to “Source of Challenge” identified by reviewers participating in the alignment analysis.

INCLUSION

HSA:

1. Statewide spring 2007 participation rates for reading and mathematics in the required grades. Totals must be disaggregated by gender, ethnicity, special education status, LEP status, economically disadvantaged status, and migrant status.

HSAA:

1. Evidence that the State has implemented alternate assessments for students whose disabilities do not permit them to participate in the regular assessment even with accommodations.

2. Evidence of guidelines and training that the State has in place to ensure that all students with disabilities taking the alternate assessment are included appropriately in the State assessment system.
3. Evidence that the State has developed clear guidelines for Individualized Educational Program (IEP) Teams to apply in determining which assessment is most appropriate for a student.
4. Regarding the alternate academic achievement standards:
 - a. Evidence that the State has developed clear guidelines for IEP Teams to apply in determining when a child's cognitive disability justifies assessment based on alternate academic achievement standards; and
 - b. Evidence showing the steps the State has taken to instruct regular and special education teachers and appropriate staff on how to properly administer assessments (including making use of accommodations) for students with the most significant cognitive disabilities.

REPORTING

HSA:

1. Samples of the school-level achievement reports disaggregated by required subgroups by grade level and subject area for 2007.
2. Statewide achievement results disaggregated by the required subgroups by grade level and subject areas for 2007.

HSAA:

1. Evidence that the State's reporting system facilitates appropriate, credible, and defensible interpretation and use of its assessment data.
2. Evidence that the State has provided for the production of individual interpretive, descriptive, and (non-clinical) diagnostic reports that indicate relative strengths and instructional needs and possess the following characteristics:
 - a. Express results in terms of the State's alternate academic achievement standards rather than numerical values (*e.g.*, scale scores or percentiles);
 - b. Provide information for parents, teachers, and principals to help them understand and address a student's specific academic needs; and
 - c. Display the information in a format and language that is understandable to parents, teachers, and principals (*e.g.*, through the use of descriptors that describe what students know and can do at different performance levels) and include interpretative guidance for these audiences.
3. Evidence that the State ensures that these individual student reports will be delivered to parents, teachers, and principals as soon as possible after the alternate assessment has been administered.

HAPA:

1. A complete set of reports for individual students and schools.

C. HIDOE Cannot Correct Immediately Its Noncompliance With the Title I Standards and Assessment Requirements

Under Title I, HIDOE was required to implement its final assessment system no later than the 2005–2006 school year. 20 U.S.C. § 6311(b)(3). The evidence that HIDOE submitted in August 2007 indicated that, well after the statutory deadline had passed, its standards and assessment system still did not fully meet Title I requirements. In addition, due to the enormity and complexity of the work that is needed to be done to bring HIDOE's standards and assessment system into full compliance, HIDOE cannot immediately comply with all of the Title I requirements. As a result, the Assistant Secretary finds that it is not genuinely feasible for HIDOE to come into compliance until a future date.

D. HIDOE Can Meet the Terms and Conditions of a Compliance Agreement and Come Into Full Compliance with the Requirements of Title I Within Three Years

At the public hearing, which was held on March 27, 2008, HIDOE presented evidence of its commitment and capability to come into compliance with the Title I standards and assessment requirements within three years. For example, HIDOE has begun working with a technical advisory committee and is providing clarifying information and gathering evidence related to the Hawaii State Assessment and the Hawaiian Aligned Portfolio Assessment. HIDOE also plans to work with technical advisors to develop a new alternate assessment based on alternate academic achievement standards for students with disabilities who are unable to participate in the general assessment, even with appropriate accommodations.

Finally, HIDOE has developed a comprehensive action plan, incorporated into the compliance agreement, which sets out a very specific schedule that HIDOE has agreed to meet during the next three years for attaining compliance with the Title I standards and assessment requirements. As a result, HIDOE is committed not only to coming into full compliance within three years but to meeting a stringent, but reasonable, schedule for doing so. The action plan also sets out documentation and reporting requirements with which HIDOE must comply. These provisions will allow the Assistant Secretary to ascertain promptly whether HIDOE is meeting each of its commitments under the compliance agreement and is on schedule to achieve full compliance within the effective period of the agreement.

The task of developing a standards and assessment system that meets the Title I requirements is not a quick or easy one. However, the Assistant Secretary has determined that, given the commitment of HIDOE to comply with the terms and conditions of the compliance agreement, it is possible for HIDOE to come into full compliance with the Title I standards and assessment requirements within three years.

IV. Conclusion

For the foregoing reasons, the Assistant Secretary finds the following: (1) that full compliance by HIDOE with the standards and assessment requirements of Title I is genuinely not feasible until a future date; and (2) that HIDOE can meet the terms and conditions of the attached compliance agreement and come into full compliance with the standards and assessment requirements of Title I within three years of the date of these

findings. Therefore, the Assistant Secretary has determined that it is appropriate to enter into a compliance agreement with HIDEO. Under the terms of 20 U.S.C. § 1234f, that compliance agreement becomes effective on the date of these findings.

Dated: November 6, 2008

Assistant Secretary
Office of Elementary and Secondary Education

Appendix B

Compliance Agreement

Under Title I of the Elementary and

Secondary Education Act

Between

The United States Department of Education

And

The Hawaii Department of Education

August 29, 2008

**COMPLIANCE AGREEMENT UNDER TITLE I
OF THE ELEMENTARY AND SECONDARY EDUCATION ACT
BETWEEN THE UNITED STATES DEPARTMENT OF EDUCATION
AND THE HAWAII DEPARTMENT OF EDUCATION**

Title I of the Elementary and Secondary Education Act of 1965 (Title I), as amended by the No Child Left Behind Act of 2001, requires each State receiving Title I funds to satisfy certain requirements.

Each State was required to adopt academic content and student academic achievement standards in at least mathematics, reading or language arts, and, beginning in the 2005-2006 school year, science. These standards must include the same knowledge and levels of achievement expected of all public school students in the State. Content standards must specify what all students are expected to know and be able to do; contain coherent and rigorous content; and encourage the teaching of advanced skills. Achievement standards must be aligned with the State's academic content standards and must describe at least three levels of proficiency to determine how well students in each grade are mastering the content standards. A State must provide descriptions of the competencies associated with each student's academic achievement level and must determine the assessment scores ("cut scores") that differentiate among the achievement levels.

Each State was also required to implement a student assessment system used to evaluate whether students are mastering the subject material reflected in the State's academic content standards. By the 2005-2006 school year, States were required to administer mathematics and reading or language arts assessments yearly during grades 3-8 and once during grades 10-12. Further, beginning with the 2007-2008 school year, each State is required to administer a science assessment in at least one grade in each of the following grade spans: 3-5, 6-9, and 10-12. A State's assessment system must:

- Be the same assessment system used to measure the achievement of all public school students in the State;
- Be designed to provide coherent information about student attainment of State academic content standards across grades and subjects;
- Provide for the inclusion of all students in the grades assessed, including students with disabilities and limited English proficient (LEP) students;
- Be aligned with the State's academic content and student academic achievement standards;
- Express student results in terms of the State's student academic achievement standards;
- Be valid, reliable, and of adequate technical quality for the purposes for which they are used and be consistent with nationally recognized professional and technical standards;
- Involve multiple measures of student academic achievement, including measures that assess higher order thinking skills and understanding of challenging content;
- Objectively measure academic achievement, knowledge, and skills without evaluating or assessing personal family beliefs and attitudes;
- Enable results to be disaggregated by gender, each major racial and ethnic group, migrant status, students with disabilities, English proficiency status, and economically disadvantaged students;
- Provide individual student reports; and

- Enable itemized score analyses.

In addition to a general assessment, States were required to develop and administer at least one alternate assessment for students with disabilities who cannot participate in the general assessment, with or without accommodations. An alternate assessment may be based on grade-level achievement standards, alternate achievement standards, or modified achievement standards. Like the general assessment, any alternate assessment must satisfy the requirements for high technical quality, including validity, reliability, accessibility, objectivity, and consistency with nationally recognized professional and technical standards.

States were also required to implement an annual assessment of English language proficiency in the four domains of reading, writing, speaking, and listening.

The Hawaii Department of Education (HIDOE) failed to timely meet certain requirements relating to its Hawaii State Assessment, Hawaiian Aligned Portfolio Assessment, and Hawaii State Alternate Assessment. In order to be eligible to continue to receive Title I funds while working to comply with the statutory and regulatory requirements, Patricia Hamamoto, Superintendent of Education, indicated HIDOE's interest in entering into a compliance agreement with the United States Department of Education (Department). On March 27, 2008, the Department conducted a public hearing regarding: (1) whether HIDOE's full compliance with Title I is not feasible until a future date; and (2) HIDOE's ability to come into compliance with the Title I requirements for an alternate assessment system within three years.

Pursuant to this Compliance Agreement under 20 U.S.C. Section 1234f, HIDOE must be in full compliance with the outstanding requirements no later than three years from the date of the Assistant Secretary's written findings, a copy of which is attached to, and incorporated by reference into, this Agreement. In order to achieve compliance with the standards and assessment requirements, HIDOE must submit the following evidence:

ACADEMIC ACHIEVEMENT STANDARDS

Hawaii State Assessment (HSA):

3. The subject area representation for panels that reviewed the performance level descriptors.
4. A plan and process for the future selection of panels to ensure representation of all relevant stakeholder groups.

Hawaii State Alternate Assessment (HSAA):

5. Evidence of approved and adopted alternate academic achievement standards for students with the most significant cognitive disabilities in reading and mathematics for each of grades 3-8 and 10.
6. Evidence that the alternate academic achievement standards include the following for each content area:
 - a. At least three levels of achievement, including two levels of high achievement (e.g., proficient and advanced) that determine how well students are mastering the State's academic content standards, and a third level of achievement (e.g., basic) to provide information about the progress of lower-achieving students toward mastering the two levels of high achievement;

- b. Descriptions of the competencies associated with each achievement level; and
 - c. Assessment scores (“cut scores”) that differentiate among the achievement levels.
7. Documentation that the State has reported separately the number and percentage of students with disabilities assessed using an alternate assessment based on alternate academic achievement standards, an alternate assessment based on grade-level academic achievement standards, and the general HSA assessment, both with and without accommodations.
8. Evidence that the State has documented the involvement of diverse stakeholders in the development of its alternate academic achievement standards.

TECHNICAL QUALITY

HSA:

5. Plan and timeline for conducting a consequential validity study.
6. Documentation of how the State will address inter-rater agreement rates for short-answer and extended-response items that were less than the established target.
7. Procedures for the standardization of the accommodation that allows for the explanation of directions using simplified vocabulary.
8. Plan and timeline for conducting a study to determine the extent to which the use of accommodations and alternate assessments yield meaningful scores including the use of simplified language and read aloud accommodations (consistent with requirements described under Critical Elements 4.3 d and 4.5 c & d of the Peer Review Guidance).

HSAA:

8. Evidence that the State has documented validity (in addition to the alignment of the HSAA with the academic content standards), as described in the *Standards for Educational and Psychological Testing* (AERA/APA/NCME, 1999).
9. Evidence that the State has provided documentation of the standards-setting process, including a description of the selection of judges, methodology employed, and final results.
10. Evidence that the State has considered the issue of reliability, as described in the *Standards for Educational and Psychological Testing* (AERA/APA/NCME, 1999).
11. Evidence that the State has ensured that its alternate assessment system is fair and accessible to all eligible students, including students with limited English proficiency.
12. Evidence that the State has taken steps (such as bias review of items) to ensure fairness in the development of the alternate assessment.
13. If different test forms or formats are used for the alternate assessment, evidence that the State has ensured that the meaning and interpretation of the results are consistent.
14. Evidence that the State has established:
 - a. Clear criteria for the administration, scoring, analysis, and reporting components of its alternate assessment; and
 - b. A system for monitoring and improving the on-going quality of its alternate assessment.

Hawaii Aligned Portfolio Assessment (HAPA):

5. Evidence that the cut scores for 2007 operationalize the content-specific performance level descriptors that are used for both the HAPA and the HSA. This evidence should include documentation related to the process of reviewing the 2006 cut scores for use in 2007, including a description of the preparation of the panel(s) for their task, a demographic description of the participants, and results of their deliberations.
6. Evidence that the State's scoring for oral fluency is valid and consistent across scorers.
7. Evidence that all students are being included in the assessment program.
8. Documentation of the comparability of the oral fluency tasks for the HAPA and the items from the HSA.

ALIGNMENT*HSA:*

5. The blueprints for reading and mathematics for each required tested grade with the number of items developed for each standard.
6. Documentation showing that the full range of knowledge is assessed for each required tested grade for reading and mathematics.
7. Results of the item review panel, including the number of items reviewed, rejected, and revised, as well as alignment to benchmark and depth of knowledge levels for each required tested grade for reading and mathematics.
8. Documentation showing how the State addressed each of the cells in the December 2006 Rob Ely alignment analysis that resulted in ratings of "weak" or "no" alignment, including the number and extent of changes made.

HSAA:

3. Evidence that the State has taken steps to ensure alignment between its alternate assessments and its academic content and alternate student academic achievement standards.
4. Evidence that the State has developed ongoing procedures to maintain and improve alignment between the alternate assessment(s) and academic content and alternate student academic achievement standards over time, particularly if gaps have been noted.

HAPA:

3. Evidence showing how the State addressed or will address the concerns from the September 2006 Rob Ely alignment analysis.
4. Documentation demonstrating how the State addressed or will address the comments related to "Source of Challenge" identified by reviewers participating in the alignment analysis.

INCLUSION*HSA:*

2. Statewide spring 2007 participation rates for reading and mathematics in the required grades. Totals should be disaggregated by gender, ethnicity, special education status, LEP status, economically disadvantaged status, and migrant status.

HSAA:

5. Evidence that the State has implemented alternate assessments for students whose disabilities do not permit them to participate in the regular assessment even with accommodations.
6. Evidence of guidelines and training that the State has in place to ensure that all students with disabilities taking the alternate assessment are included appropriately in the State assessment system.
7. Evidence that the State has developed clear guidelines for Individualized Educational Program (IEP) Teams to apply in determining which assessment is most appropriate for a student.
8. Regarding the alternate academic achievement standards:
 - c. Evidence that the State has developed clear guidelines for IEP Teams to apply in determining when a child's cognitive disability justifies assessment based on alternate academic achievement standards; and
 - d. Evidence showing the steps the State has taken to instruct regular and special education teachers and appropriate staff on how to properly administer assessments (including making use of accommodations) for students with the most significant cognitive disabilities.

REPORTING*HSA:*

3. Samples of the school-level achievement reports disaggregated by required subgroups by grade level and subject area for 2007.
4. Statewide achievement results disaggregated by the required subgroups by grade level and subject areas for 2007.

HSAA:

4. Evidence that the State's reporting system facilitates appropriate, credible, and defensible interpretation and use of its assessment data.
5. Evidence that the State has provided for the production of individual interpretive, descriptive, and (non-clinical) diagnostic reports that indicate relative strengths and instructional needs and possess the following characteristics:
 - a. Express results in terms of the State's alternate academic achievement standards rather than numerical values (*e.g.*, scale scores or percentiles);
 - b. Provide information for parents, teachers, and principals to help them understand and address a student's specific academic needs; and
 - c. Display the information in a format and language that is understandable to parents, teachers, and principals (*e.g.*, through the use of descriptors that describe what students know and can do at different performance levels) and include interpretative guidance for these audiences.
6. Evidence that the State ensures that these individual student reports will be delivered to parents, teachers, and principals as soon as possible after the alternate assessment has been administered.

HAPA:

2. A complete set of reports for individual students and schools.

During the duration of this Compliance Agreement, HIDOE is eligible to receive Title I, Part A funds if it complies with the terms and conditions of this Agreement, the

provisions of Title I, Part A beyond those covered in this Compliance Agreement, and other applicable Federal statutory and regulatory requirements. The attached action steps provide a detailed plan and specific timeline for how HIDOE will come into compliance with the Title I standards and assessment requirements. These action steps are incorporated into this Compliance Agreement and may be amended by joint written agreement of the parties, provided full compliance is still feasible by the expiration of the Agreement.

In addition to all terms and conditions set forth above, HIDOE agrees that its continued eligibility to receive Title I, Part A funds is predicated upon its compliance with all statutory and regulatory requirements of that program beyond those covered in this Compliance Agreement, including those that are not specifically addressed by this Agreement, such as any amendments to the No Child Left Behind Act of 2001.

If HIDOE fails to comply with any of the terms and conditions of this Compliance Agreement, including the action steps attached hereto, the Department may consider the Agreement no longer in effect and may take any action authorized by law, including the withholding of funds or the issuance of a cease and desist order. 20 U.S.C. §1234f(d).

The effective date of this agreement shall be this 29th day of August, 2008.

For the Hawaii Department of Education:

3.0 STATEWIDE ASSESSMENT SYSTEM					
HSAA:					
Description	Action Steps	Evidence	Office Responsible	Fiscal Resources	Completion Time
1. Evidence that the State demonstrates comparable results and alignment with the academic content and achievement standards.	<ul style="list-style-type: none"> The State will issue an RFP¹ to revise the alternate assessment that ensures compliance with all requirements of NCLB and Peer Review guidelines. The alternate assessment design will provide alignment with the academic content and alternate achievement standards and comparability across forms, students, scores, and years. The design will also consider adding items annually to provide a means of continuously improving the assessment and ensuring that students do not repeatedly encounter the same items. Review with TAC. 	• Issue RFP	SAO	Est. cost to develop the RFP \$25,000	Submission of evidence to ED: Upon completion and issuance of the Request for Proposals for a new HSAA ³ November 30, 2008.
		• TAC minutes	SAO	None	March 31, 2009.
		• Alignment study and report.	Contractor SAO	Est. cost \$25,000 ²	September 30, 2010.

¹ Almost all action steps and the generation of related evidence will be included in the RFP as prerequisites for development of a new HSAA. Thus, related information will be included in the contract that is awarded to the successful bidder. The RFP will be submitted to the TAC for review and comment prior to its release.

² The estimated three-year cost to develop, field-test, and implement a new HSAA is \$9M including staff development activities. Thus, all costs listed in this column of the action plan and timeline for HSAA activities are estimates only at this time and will be adjusted once a contractor is selected.

³ Most of the completion times for HSAA associated activities are dependent on developing and issuing an RFP for the new assessment and also on awarding of a contract for that purpose. Thus, it is highly likely that some timelines will have to be revised after the contract is awarded.

4.0 TECHNICAL QUALITY
