Burden Hours: 567.

Abstract: Videotape study of 8th grade math and science classrooms in the United States, the Czech Republic, France, Japan, the Netherlands, and One Asian Nation during the 1998-1999 school year. Designed and conducted by the U.S., this study supplements the Main TIMSS-R academic assessment data collection in which 45 to 50 countries are expected to participate. This study is based on and extends the work of the previous TIMSS video study. That study included only mathematics and compared the U.S. data with two other countries—Japan and Germany. This study will include science in addition to mathematics lessons, will be conducted in five high-achieving nations, and will collect and produce video tapes that will be useful for improving teaching practices.

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collection and Dissemination Activities: Comment Request

AGENCY: Energy Information Administration, DOE.

ACTION: Agency electric power information collection and dissemination activities: Proposed confidentiality comment request.

SUMMARY: The Energy Information Administration (EIA) is soliciting comments concerning the proposed revision to the EIA procedure of confidentiality treatment given to electric power data collected and disseminated by the EIA through a series of primarily mandatory surveys (Form EIA-411 is voluntary). This notice lists the electric power data elements the EIA considers could cause substantial competitive harm if made available to the public and EIA is proposing that these elements will be considered confidential if the provider documents substantial harm due to unrestricted disclosure.

DATES: Written comments must be submitted by August 31, 1998. The urgency to review and implement this policy requires close adherence to the scheduled comment period. If unusual circumstances arise during the comment period which could cause a delay in meeting the scheduled response date, please notify the contact person listed below at once. Effort will be made to accommodate all interested responders to this notice.

ADDRESSES: Send comments to John G. Colligan, EI-53; Energy Information Administration, U.S. Department of Energy, 1000 Independence Avenue, S.W.; Washington, D.C. 20585-0650; (202) 426-1174; e-mail jcolliga@eia.doe.gov; and fax (202) 426-1311.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the electric power forms and instructions should be directed to John Colligan at the address listed above. Please note, the EIA is not seeking comments on the survey forms per se, but rather on the level of confidentiality of specific data elements. A separate notice regarding forms design is being published and distributed.

SUPPLEMENTARY INFORMATION:

- I. Background
- II. Current Actions
- III. Request for Comments

I. Background

In order to fulfill its responsibilities under the Federal Energy Administration Act of 1974 (FEAA) (Pub. L. 93-275) and the Department of Energy Organization Act (Pub. L. 95-91), the Energy Information Administration (EIA) is obliged to carry out a central, comprehensive, and unified energy data and information program. As part of this program, EIA collects, evaluates, assembles, analyzes, and disseminates data and information related to energy resource reserves, production, demand, and technology, and related economic and statistical information relevant to the adequacy of energy resources to meet demands in the near and longer term future for the Nation's economic and social needs.

The EIA, as part of its continuing effort to reduce paperwork and respondent burden (required by the Paperwork Reduction Act of 1995 (Pub. L. 104-13)), conducts a presurvey consultation program to provide the general public and other Federal agencies with an opportunity to comment on proposed and/or continuing reporting forms. This program helps to prepare data requests in the desired format, minimize reporting burden, develop clearly understandable reporting forms, and assess the impact of collection requirements on respondents. Also, EIA will later seek approval by the Office of Management and Budget (OMB) for the collections under Section 3507(h) of the Paperwork Reduction Act of 1995 (Pub. L. 104-13, Title 44, U.S.C. Chapter 35).

The EIA conducts surveys to collect electric power data from electric utilities, electric power marketers, nonutility electric power producers (cogenerators, small power producers, and other nonutility electric power generators), and the North American Electric Reliability Council regions. The electric power data collected include but are not limited to: ownership; accounting/financial; generation; type and character of fuels consumed; capacity; heat rates; heat rate components; demand; purchases; sales; peak loads; imports/exports; revenues; plants; equipment; distribution systems; reliability; load management; and environmental data. EIA also collects projections of load, capacity, and other related information.

The EIA surveys used to collect this data and other information are:

EIA-411, "Coordinated Bulk Power Supply Program;"

EIA-412, "Annual Report of Public Electric Utilities;"
